Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Heavy to very heavy rains reported in Gulbarga, Bidar and adjoining area of Karnataka which are Tur belts. If rains continue for next few days with similar volume, it could damage the crop health. Latur, Parbhani, Aurangabad, Ahmednagar in Maharashtra also recorded excess rains which are Moong belts. Also, Moong arrivals from early sown variety have already started coming into and arrivals pace is bound to increase gradually in coming days.

Khamgaon in Maharashtra too witnessed new Moong crop arrivals during the week under review where around 40-50 bags arrivals reported which fetched INR 7,150 per quintal in Muhurat trading. However, moisture level of around 16-18% remains cause of concern. Ashok Nagar and Guna of MP seen only 20-25 bags arrivals of new Urad crop with higher moisture level. In Sri Ganganagar, new Moong arrivals remained at 200 bags. As per sources, around 80% Moong crop has been harvested in Karnataka and likely to come in market yard soon.

Weather activities during September would be crucial to watch closely as Moong and Urad crops are almost ready in fields and any heavy spell of rains may have shattering affect particularly on Urad including Moong. Meanwhile, according to the Indian Meteorological Department's recent forecast for heavy rainfall spell over South Peninsular & Northeast may further have a negative bearing on the final yield of short duration crops mainly Urad and Moong.

Centre's recent decision to dispose off 15 lakh tonne Chana at discounted rate of INR 8 per kg, is putting pressure on whole pulses market sentiments including Chana too. It shows that Govt. is keen to keep the grains particularly Pulses prices under check and it may come with more stringent steps in future too whenever Pulses prices to start moving sky rocketed. So, not much firm trend is likely

All India Pulses area recorded at 130.9 lakh as on 9th September, 2022, down by around 4.15% from 136.57 lakh hectare, Urad acreage at 36.96 lakh ha, down by 4% from 38.48 lakh ha., Moong acreage at 33.10 lakh ha., down by 4% from 34.52 lakh ha and Tur sowing at 45.49 lakh ha., down by around 5% from 47.78 lakh ha.

Tur traded bearish during the week under review and it traded down by 1% at INR 7,400 per quintal in Kadapa market while Tur prices traded down by 5% at INR 7,600 per quintal in Gulbarga market. Reports of crop loss due to excess rains over major producing state namely Karnataka and IMD's prediction of more rains in September month also supporting the sentiments but simultaneously, Centre's decision over Tur stock declaration is still impacting the sentiments and traders are trading cautiously as participants are of the view that Govt. may take some more stringent steps to control the rising prices as we have seen in case of Chana recently. Import size from Africa and weather conditions in major producing states like Karnataka, Maharashtra, UP and Telangana would be crucial for next few days as IMD has predicted for more rains over South Peninsular & Northeast which may further have a negative bearing on the final yields. At present, Africa is the only source for importing Tur where production remains between 6 to 7 lakh tonne however, import time period is too important as it take 45 to 50 days to metalize. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. The short-term outlook seems weak as of now. Myanmar is offering Tur at \$900 per MT, basis Indian port.

Urad prices traded steady to slightly weak during the week under review despite the fact that heavy rains in August have affected the **Urad** crop negatively in MP and some parts of UP and Rajasthan, Urad prices traded steady in most of the markets including Mumbai and Delhi while it traded down by 1.78% at INR 6,900 per quintal in Chennai. IMD's prediction of more rains in September may take toll on Urad crop as crop is being harvested and lying-in fields. If it happens rains, crop may have shattering effect and resulting yield loss. It could take the prices as well as sentiments slightly firm side. Right now, Centre's recent decision of Chana selling at discounted rate is keeping the prices down and it may remain slightly down for more some-time on the back of Govt. decision. Otherwise, market tone seems firm on the background of crop and area loss due to heavy and excess rains. Negative impact of devaluation of Myanmar currency Kyat from 1850 to 2100 against Dollar has now over as C&F quotes have already fallen by around \$90-100 till date to \$880 per MT for Faq and \$1010 per MT for Sq variety respectively. The volume of import needs to be monitored for August and September.

Moong prices traded mostly down by 1 to 3% except Jalgaon where it traded up by 1.33% at INR 7,600 per quintal. However, Moong prices remained down by around 1 to 3% during the week under review. It traded at INR 6,700 per quintal, down by 0.73% in Jaipur while it traded at INR 6,200 per quintal, down by 3% from INR 6,400 per quintal in Indore. Moong is expected to trade down in coming week taking cue of increasing arrivals which is bound to increase between September-October and good availability of summer stocks after bumper production (8.5 lakh tonne). As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely at present. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Sep would be crucial for the Kharif crop size.

Chana cash markets traded steady to down by 2% during the week under review as Centre's decision to sell 15 LMT Chana under PDS schemes continue to put pressure on the sentiments. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop also capping on firm sentiments. Due to dispose of huge volume of Chana market prices are not likely to improve as recent decision would eat up the actual demand from the market. Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops while the Chana sowing is scheduled to start from mid-October. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time.

Lentil cash market traded down by around 1.50 to 5%, on an average, during the week under review. It traded at INR 6,350 per quintal, down by 1.55% from INR 6,450 per quintal in Kanpur while it traded at INR 5,900 per quintal, down by 4.84% from INR 6,200 per quintal in Ashok Nagar. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$750 per MT. It may decline further by \$25-30 by mid-September ahead of bumper crop (29.4 LMT, Canada Statistics) in Canada this year. Good pace of harvesting in Canada amidst conducive weather is keeping global market sentiments under check. Crop size is now likely to be at record 29.40 lakh tonne this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to improve by 14-15 lakh tonne from 9 to 10 lakh tonne (previous estimate of different consultant) after the considering higher crop size in both the countries. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak.

International News:

New data released by Statistics Canada recently reveals that Chickpea production in Canada is expected to be around 1.33 lakh tonne, up by 75% from 76,000 tonne same time last year.

As per the recent report by Statistics Canada, Dry Pea production in the country is expected to swell well by around 60% to 36.1 lakh tonne during Marketing Year 2022-23 from 22.57 lakh tonne same time last year. Agency's previous estimate was of 34 to 34.5 lakh tonne. Two major producing states like- Saskatchewan and Alberta are expected to produce 18.10 lakh tonne and 15.40 lakh tonne Dry Pea respectively.

Massive rise has been projected for Lentil production in Canada for 2022-23. Around 81 % increase from last year is considered a hefty increase and it would make global supply at comfortable level. This year Canada is going to harvest 25 to 29 LMT crop. Dry Peas production too has been pegged at 36 LMT, up by around 60% from last year. We see a significant rise in Chickpeas production, but quantity of the crop is insignificant and it does not affect the global supply.

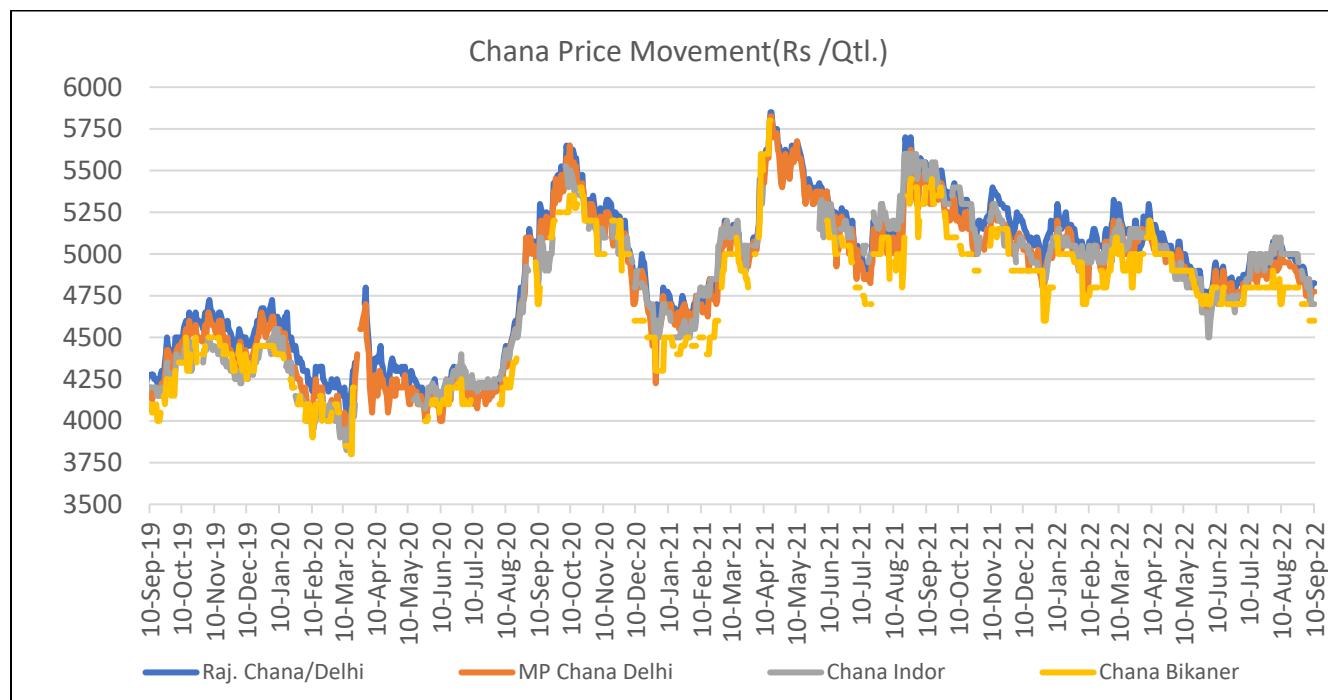

Weekly Outlook: - Slightly weak trend is expected this week.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash markets traded steady to down by 2% during the week under review as Centre's decision to sell 15 LMT Chana under PDS schemes continue to put pressure on the sentiments. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop also capping on firm sentiments. Due to dispose of huge volume of Chana market prices are not likely to improve as recent decision would eat up the actual demand from the market. Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops while the Chana sowing is scheduled to start from mid-October. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time.

Outlook for the week: Any spike in prices is unlikely.

Following graph illustrates Chana price movement in different markets:

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	10.09.22	03.09.22	10.09.22	10.09.21	03.09.22
Delhi Chana(Raj)	4825	4825	5050	5475	0.00
Bikaner Chana	4600	4600	4700	5400	0.00
Indore Chana	4700	4800	5000	5450	-2.08
Tan.Chana	4450	4575	4600	4900	-2.73
Price Projection For Bikaner During September-2022 (4500-5000)					

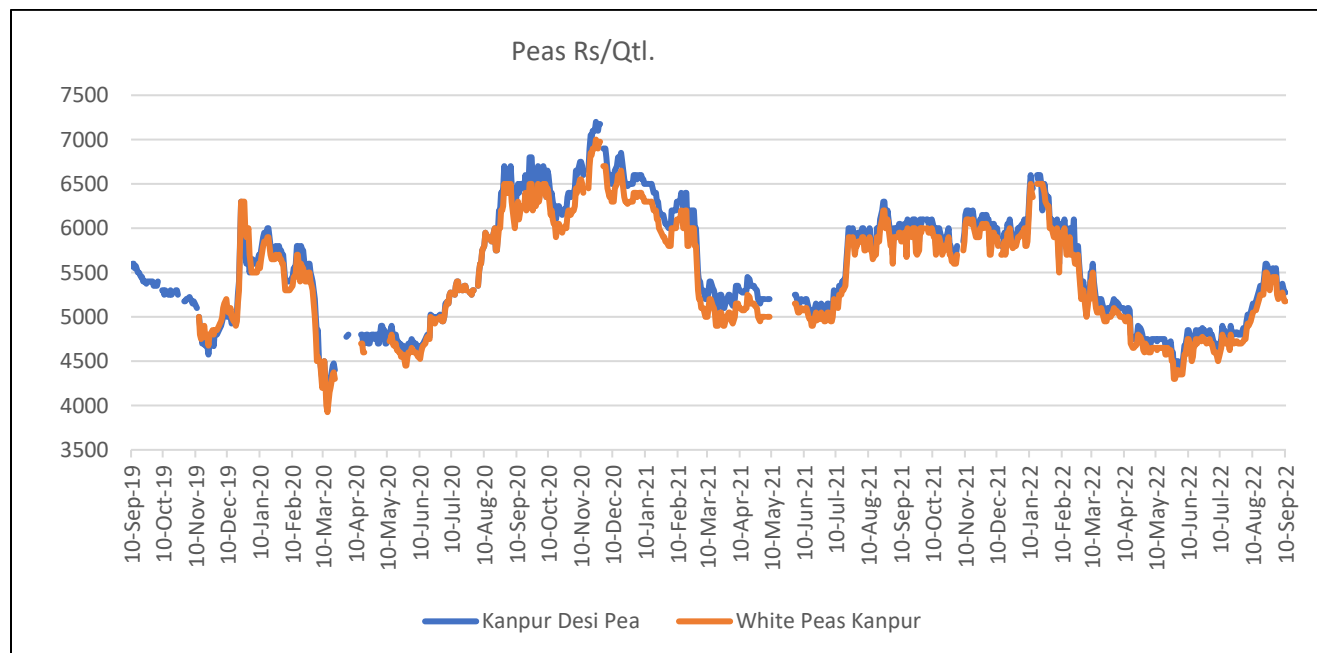

Peas (Matar):

Current Scenario:

Pea cash market too traded slightly weak during the week under review taking bearish cues from other pulses including Chana. Desi Peas prices traded down at INR 5,275 per quintal, down marginally by 0.47% from INR 5,300 per quintal in Kanpur while White Peas prices remained at INR 5,175 per quintal, down by 0.48% from INR 5,200 per quintal. Market prices are likely to trade steady to marginally weak amidst easy availability of Chana at cheaper rates which has potential to eat up Pea demand.

Outlook for the week: Pea market may trade in a range.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	10.09.22	03.09.22	10.09.22	10.09.21	03.09.22
Kanpur Desi Peas	5275	5300	5150	6000	-0.47
Kanpur White Peas	5175	5200	5050	5950	-0.48
Price Projection For Kanpur Desi During September-2022 (4900-5400)					

Lentils (Masoor):

Market Recap:

Lentil cash market traded down by around 1.50 to 5%, on an average, during the week under review. It traded at INR 6,350 per quintal, down by 1.55% from INR 6,450 per quintal in Kanpur while it traded at INR 5,900 per

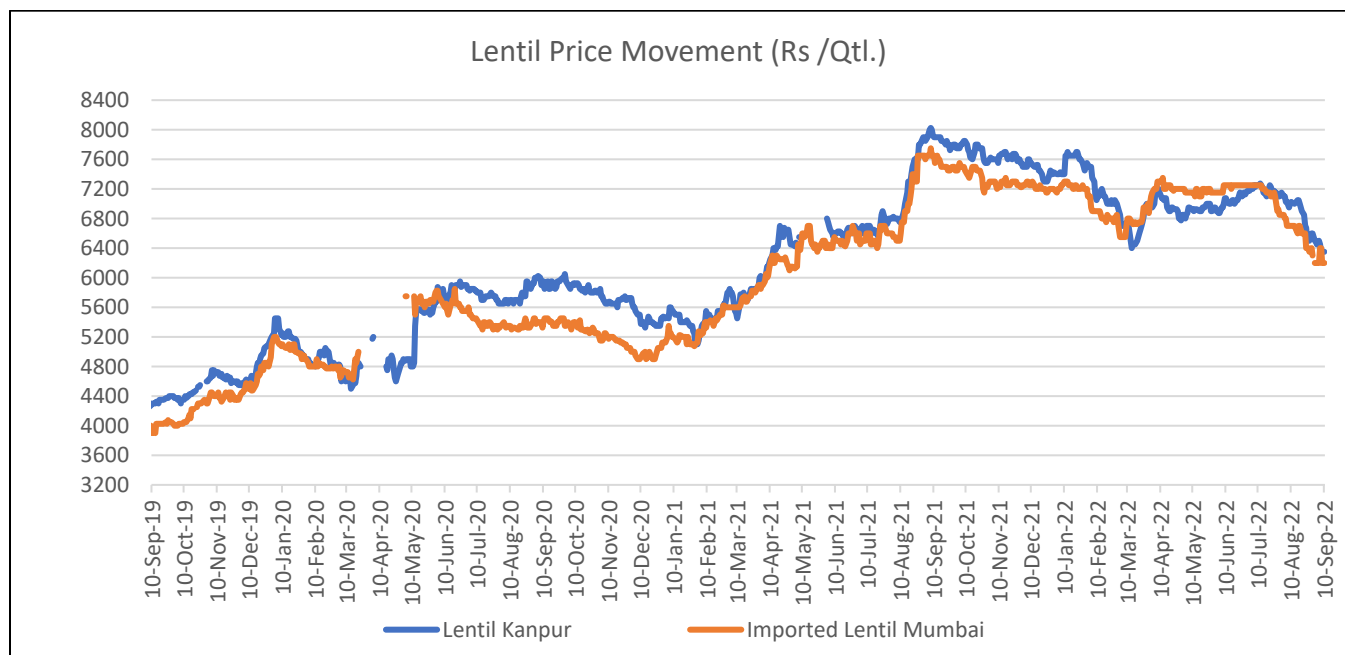

quintal, down by 4.84% from INR 6,200 per quintal in Ashok Nagar. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$750 per MT. It may decline further by \$25-30 by mid-September ahead of bumper crop (29.4 LMT, Canada Statistics) in Canada this year.

Good pace of harvesting in Canada amidst conducive weather is keeping global market sentiments under check. Crop size is now likely to be at record 29.40 lakh tonne this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to improve by 14-15 lakh tonne from 9 to 10 lakh tonne (previous estimate of different consultant) after the considering higher crop size in both the countries.

On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak.

Market Outlook: Overall tone seems slightly weak.

Following graph illustrates Lentil price movement in different markets:

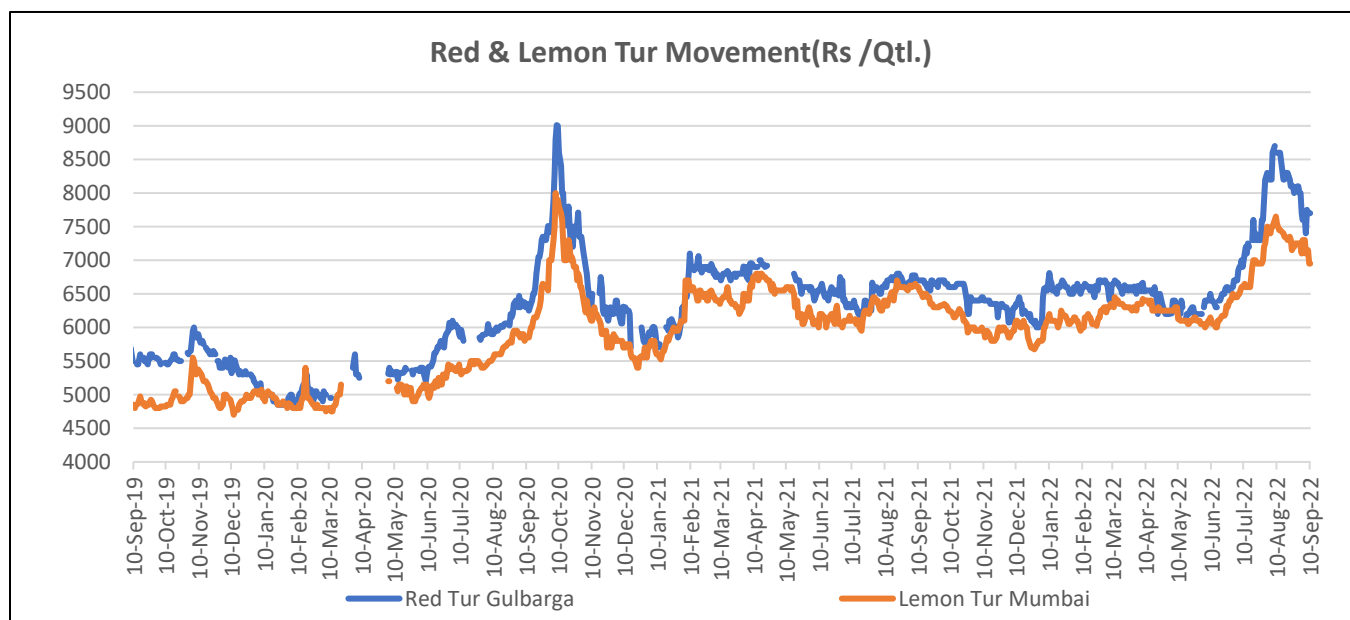

Lentil Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	10.09.22	03.09.22	10.09.22	10.09.21	03.09.22

Ashok Nagar	5900	6200	6450	7200	-4.84
Price Projection For Kanpur During September-2022 (6200-7100)					

Pigeon Pea (Tur/Toor):
Market Recap:

Tur traded bearish during the week under review and it traded down by 1% at INR 7,400 per quintal in Kadapa market while Tur prices traded down by 5% at INR 7,600 per quintal in Gulbarga market. Reports of crop loss due to excess rains over major producing state namely Karnataka and IMD's prediction of more rains in September month also supporting the sentiments but simultaneously, Centre's decision over Tur stock declaration is still impacting the sentiments and traders are trading cautiously as participants are of the view that Govt. may take some more stringent steps to control the rising prices as we have seen in case of Chana recently. Import size from Africa and weather conditions in major producing states like Karnataka, Maharashtra, UP and Telangana would be crucial for next few days as IMD has predicted for more rains over South Peninsular & Northeast which may further have a negative bearing on the final yields. At present, Africa is the only source for importing Tur where production remains between 6 to 7 lakh tonne however, import time period is too important as it take 45 to 50 days to metalize. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. The short-term outlook seems weak as of now. Myanmar is offering Tur at \$900 per MT, basis Indian port.

Outlook for the week: Mixed trend is likely this week.

Following graph illustrates Tur price movement in different markets:

Tur % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	10.09.22	03.09.22	10.09.22	10.09.21	03.09.22

Green Gram (Moong):

Market Recap:

Moong prices traded mostly down by 1 to 3% except Jalgaon where it traded up by 1.33% at INR 7,600 per quintal. However, Moong prices remained down by around 1 to 3% during the week under review. It traded at INR 6,700 per quintal, down by 0.73% in Jaipur while it traded at INR 6,200 per quintal, down by 3% from INR 6,400 per quintal in Indore. Moong is expected to trade down in coming week taking cue of increasing arrivals which is bound to increase between September-October and good availability of summer stocks after bumper production (8.5 lakh tonne). As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely at

present. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Sep would be crucial for the Kharif crop size.

Outlook for the week: new crop arrivals may put further pressure on the cash Moong market. Following graph illustrates Pea price movement in different markets:

Moong Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
