Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Excess and widespread rains seen over the major pulses growing states like- Maharashtra, MP, Rajasthan & Karnataka due to the cyclonic circulation during the week under review. Heavy rains not only negatively impacted on the pace of new Urad and Moong arrivals but, also the quality and to some extent the quantity as reportedly in some growing areas cases of sprouting is reported in the harvest crop. Arrivals pressure in these states reduced to half during the week, however, now it is likely to improve with clearing weather. During the weekend, Urad arrivals recorded in some of the key markets are - Lalitpur 20,000 bags (1 bag = 100 kg), Guna 7,000 bags, Ashoknagar 5,000 bags, Amravati 800 bags, Baran 700-800 bags, Kota 5000-6000 bags, Kekri 1500-2000 bags.

As per sources, Moong arrivals are still lacking and till 17th September, no arrivals were seen in major markets like- Akola, Lalitpur, Guna, Ashoknagar, Amravati which is straight signaling for reduction of Moong crop size. The largest Moong producing state Rajasthan witnessed new moong arrivals of 15,000 bags in Merthacity, 7,000 bags in Sri Ganganagar markets during the weekend. Reportedly, recent rains have affected the arrivals in key markets of Rajasthan and also there are some reports of damage to the crop besides some impact on quality.

Given situation supported the prices of both Urad and Moong in the markets. However, plenty of stocks of Moong in Central Pool and easy availability summer season produce would keep the easy availability and thus prices are not likely to witness any major upside in Moong while supply tightness prevails for which may continue to support the prices.

Meanwhile, dormancy break reports (sprouting in pods) are there mainly in Urad from Lalitpur, Khuari, Tikamgarh and Ashoknagar due to heavy rains as crop was lying in fields after harvesting. In August month also, crop get damaged due to excess rains and water logging. As per sources, around 25-30% crop has got affected due to rains and percent loss may increase if rains remain continue in coming days too. So, weather activities in coming days would be crucial to watch closely. As per IMD, fresh cyclonic circulation / low pressure area has formed over Bay of Bengal which is likely to move towards adjoining AP and Odhisa and further likely to move to central India in coming few days which may again cause good rains over the growing region, thus, further threat to the crop's quantity and quality.

This week, Tur remained in highlight as crop loss fear emerges for Tur after the heavy and continuous spells of rains. Gulbarga, Bidar, Bijapur, Bagalkot, Raichur, Yadgir in Karnataka witnessed incessant rains during the week which have deteriorated and affected the crop condition. Fields are largely wet and if situations would not get normalize soon, crop loss percent may increase.

All India Pulses area recorded at 131.91 lakh ha. as on 16th September, 2022, down by around 4% from 137.49 lakh ha., Urad acreage reported at 37.43 lakh ha, down by 3.86% from 38.94 lakh ha., Moong acreage at 33.26 lakh ha. down by 3.99% from 34.64 lakh ha and Tur sowing at 45.73 lakh ha. down by around 4.62% from 47.95 lakh ha.

Tur traded firm by around 3 to 6% during the week under review on reports of crop loss in major producing state Karnataka. It traded up by 2.67% at INR 7,700 per quintal in Latur market and traded up by 6% at INR 8,000 per quintal in Gulbarga market. In Karnataka where Tur coverage area is around 14 lakh ha., Tur crop condition was overall good till last week but, after 13th September, conditions started changing. During the period, Gulbarga, Bidar, Bijapur, Bagalkot, Raichur, Yadgir witnessed heavy and continuously rains spell which have reportedly deteriorated and affected the crop health. Fields are largely wet and if situations would not get normalize soon, crop loss percent may increase which may keep the sentiments firm. Tur prices may increase by INR 300-500 per quintal in coming week. At present, Africa is the only source for importing Tur where production remains

between 6 to 7 lakh tonne however, import time period is too important as it takes 30 to 40 days to arrive. This year Tur crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. Myanmar quotes have increased to \$955 per MT, up by \$45 per MT, from \$910 per MT last week.

Urad too traded up by 1 to 3%, on an average, at 7,200 per quintal in Mumbai and at 7,425 per quintal in Delhi on good buying interest by Dall mills of UP, Delhi and Maharashtra only for dry Dall and reports of crop loss news due to incessant rains in MP, Maharashtra and Rajasthan. Before it, demand was only from Southern Dall mills. Meanwhile, NAFED has purchased total 1,500 MT imported Urad through a tender to increase the stock. Heavy and constant rains during last week have reportedly damaged the crop in MP and some parts of UP and Rajasthan as crop is being harvested and lying-in fields. Now, market tone seems firm on the background of crop and area loss due to heavy and excess rains and price may firm up by INR 400-500 per quintal in coming days. Consequently, Myanmar quotes have improved to \$895 per MT from \$885 per MT for Faq and \$1020 per MT from \$1015 per MT for Sq variety respectively. The volume of import needs to be monitored for September. As per sources, around 23,500 MT Urad has been imported in August.

Moong prices remained steady to firm on reports of crop and area loss due to heavy rains in major producing states like Rajasthan, MP and Maharashtra. No arrivals were seen in major markets like- Akola, Lalitpur, Guna, Ashoknagar, Amravati which is straight signaling for reduction of Moong crop size. The largest Moong producing state Rajasthan witnessed new moong arrivals of 15,000 bags in Merthacity, 7,000 bags in Sri Ganganagar markets during the weekend. Reportedly, recent rains have affected the arrivals in key markets of Rajasthan and also there are some reports of damage to the crop besides some impact on quality. However, plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major firmness in Moong. However, slightly firm sentiments may prevail in coming days taking cues from lower arrivals. Moong prices may move up by INR 200-300 per quintal from the current levels right now. It traded steady at INR 6,700 per quintal in Jaipur while Moong prices moved up to INR 7,200 per quintal in Indore. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates.

Chana cash markets traded steady to firm by 2% during the week under review taking cues from firm trend seen other pulses including Tur and Urad. However, NAFED on the behalf of Centre is continuously releasing Chana at discounted rates (around INR 4351 per quintal) in heavy volume to keep the prices under check. So, any big jump in prices unlikely as of now as ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop may continue to keep check on the sentiments. Due to dispose of huge volume of Chana market prices are not likely to improve as recent decision would eat up the actual demand from the market. Further, Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops while the Chana sowing is scheduled to start from mid-October. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time.

Lentil cash market traded mixed during the week under review on reports of bumper Lentil production in Canada as well as Australia. It traded down by 1.67% at INR 5,900 per quintal in Ashoknagar and traded up by 1.56% at INR 6,500 per quintal in Kanpur. Pressure on C&F Canada quotes is still seen which may fall further taking cues of bumper crop (29.4 LMT, Canada Statistics) in Canada this year from 16.5 lakh tonne last year. Harvesting in Canada has almost over so, Lentil import may increase from October onwards owing to lower Canadian quotation and low availability of Urad and Tur crops. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to improve by 14-15 lakh tonne from 9 to 10 lakh tonne (previous estimate of different consultant) after the considering higher crop size in both the countries. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to

increase. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak. However, given the background in other pulses, fall in prices may halt but, overall, market tone seems still bearish.

International News:

According to the latest report by U.S. Department of Agriculture (USDA), the country is expected to produce around 5.03 LMT Dry Peas (of all classes), up by 29% from 3.90 LMT last year. Around 9.14 lakh acres area was estimated to be sown under it which is down by 10% from earlier forecast and around 6% from 2021 forecast. In Montana and North Dakota, harvest has been reportedly completed.

According to the latest report by U.S. Department of Agriculture (USDA), the country is expected to produce 2.20 LMT Chickpea (Chana) this year, up by 37% from last year. Around 3.59 lakh acres area has been covered under it which is up by 3% from earlier forecast. However, small Chickpea cover area is expected at 0.80 lakh acres.

According to the latest report by U.S. Department of Agriculture (USDA), US is expected to harvest around 1.2 LMT of Lentils this year which is up by 46% from around 0.82 LMT last year. Increase in sowing coverage and yield both remains main reasons behind the projected higher output. However, sowing coverage has increased by 3% to 6,70,000 acres but it is still lower by 5% from last year's coverage area. Simultaneously, yield also pegged at 766 pound, up by 160 pound from last year.

Weekly Outlook: - Urad, Tur and Moong may trade firm while Lentils and Chana may trade in a range this week.

Pulses-Wise Scenario:

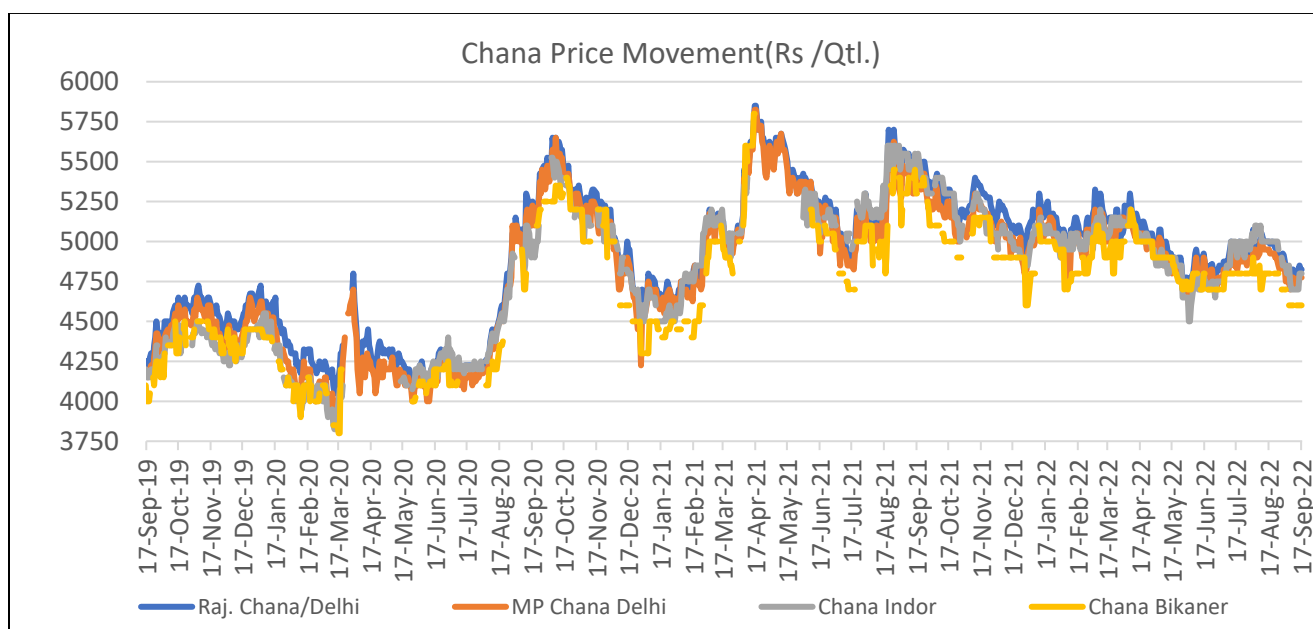

Chana

Current Scenario:

Chana cash markets traded steady to firm by 2% during the week under review taking cues from firm trend seen other pulses including Tur and Urad. However, NAFED on the behalf of Centre is continuously releasing Chana at discounted rates (around INR 4351 per quintal) in heavy volume to keep the prices under check. So, any big jump in prices unlikely as of now as ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop may continue to keep check on the sentiments. Due to dispose of huge volume of Chana market prices are not likely to improve as recent decision would eat up the actual demand from the market. Further, Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops while the Chana sowing is scheduled to start from mid-October. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time.

Outlook for the week: Chana may trade in a range due to easy availability of stocks in markets.

Following graph illustrates Chana price movement in different markets:

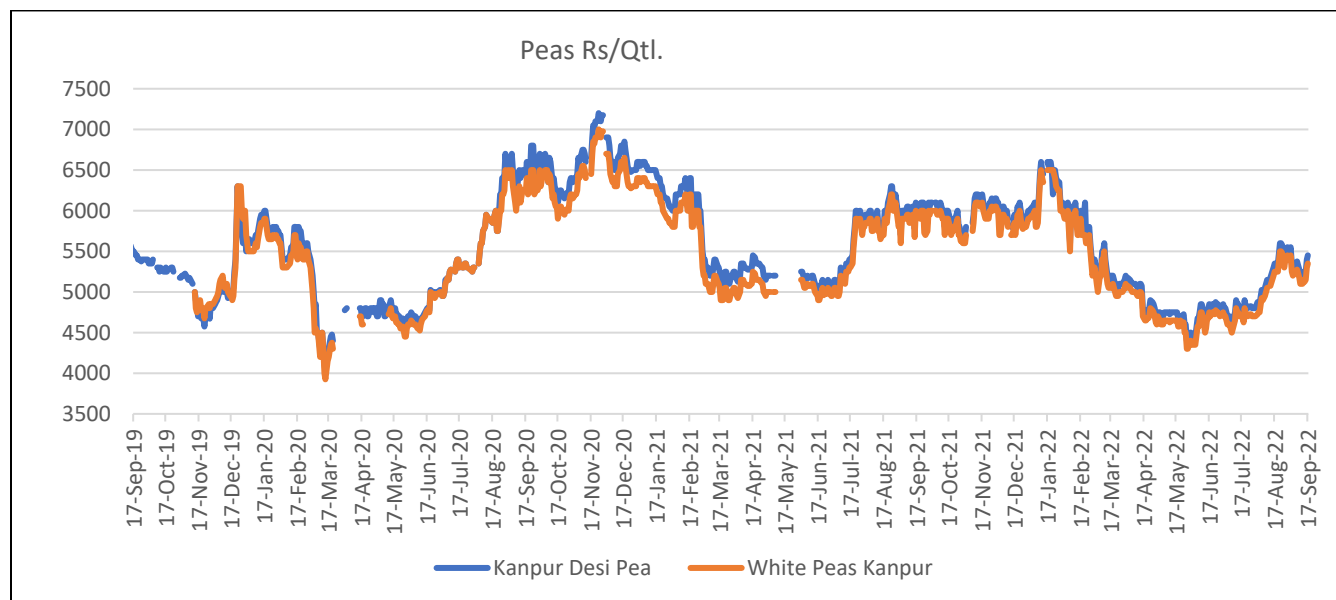

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	17.09.22	10.09.22	17.08.22	17.09.21	10.09.22

Indore Chana	4800	4700	5000	5500	2.13
Tan.Chana	4450	4450	4700	4865	0.00
Price Projection For Bikaner During September-2022 (4500-5100)					

Peas (Matar):
Current Scenario:

Pea cash market traded bullish taking cues from good demand by stockists and millers and prevailing firm trend in other pulses markets including Urad, Tur and Chana. Desi Peas prices traded up by 4.81% at INR 5,450 per quintal from INR 5,200 per quintal in Kanpur and White Peas prices traded at INR 5,350 per quintal, up by 4.90% from INR 5,100 per quintal. Market prices are likely to trade in a range of INR 100-200.

Outlook for the week: Pea market may trade in a range.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	17.09.22	10.09.22	17.08.22	17.09.21	10.09.22

Kanpur White Peas	5350	5100	5250	6000	4.90
Price Projection For Kanpur Desi During September-2022 (5200-5600)					

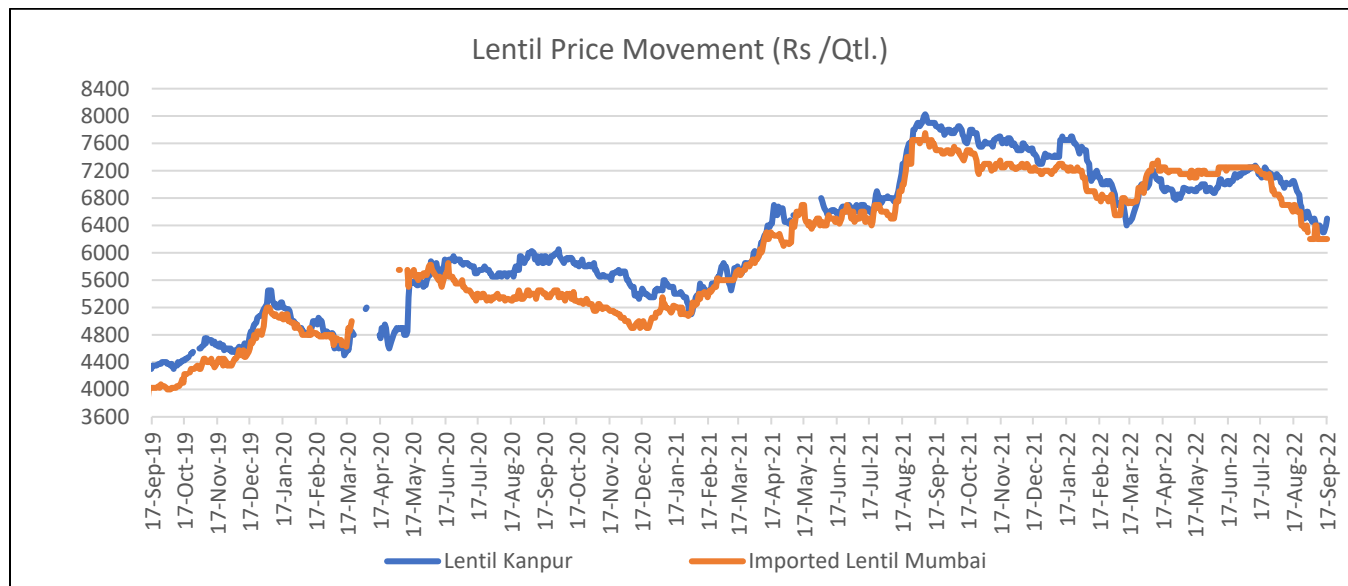

Lentils (Masoor):
Market Recap:

Lentil cash market traded mixed during the week under review on reports of bumper Lentil production in Canada as well as Australia. It traded down by 1.67% at INR 5,900 per quintal in Ashoknagar and traded up by 1.56% at INR 6,500 per quintal in Kanpur. Pressure on C&F Canada quotes is still seen which may fall further taking cues of bumper crop (29.4 LMT, Canada Statistics) in Canada this year from 16.5 lakh tonne last year. Harvesting in Canada has almost over so, Lentil import may increase from October onwards owing to lower Canadian quotation and low

availability of Urad and Tur crops. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to improve by 14-15 lakh tonne from 9 to 10 lakh tonne (previous estimate of different consultant) after the considering higher crop size in both the countries. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak. However, given the background in other pulses, fall in prices may halt but, overall, market tone seems still bearish.

Market Outlook: Overall tone seems slightly weak.

Following graph illustrates Lentil price movement in different markets:

Lentil Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	17.09.22	10.09.22	17.08.22	17.09.21	10.09.22

Price Projection For Kanpur During Sep-2022 (6300-7500)					

Pigeon Pea (Tur/Toor):

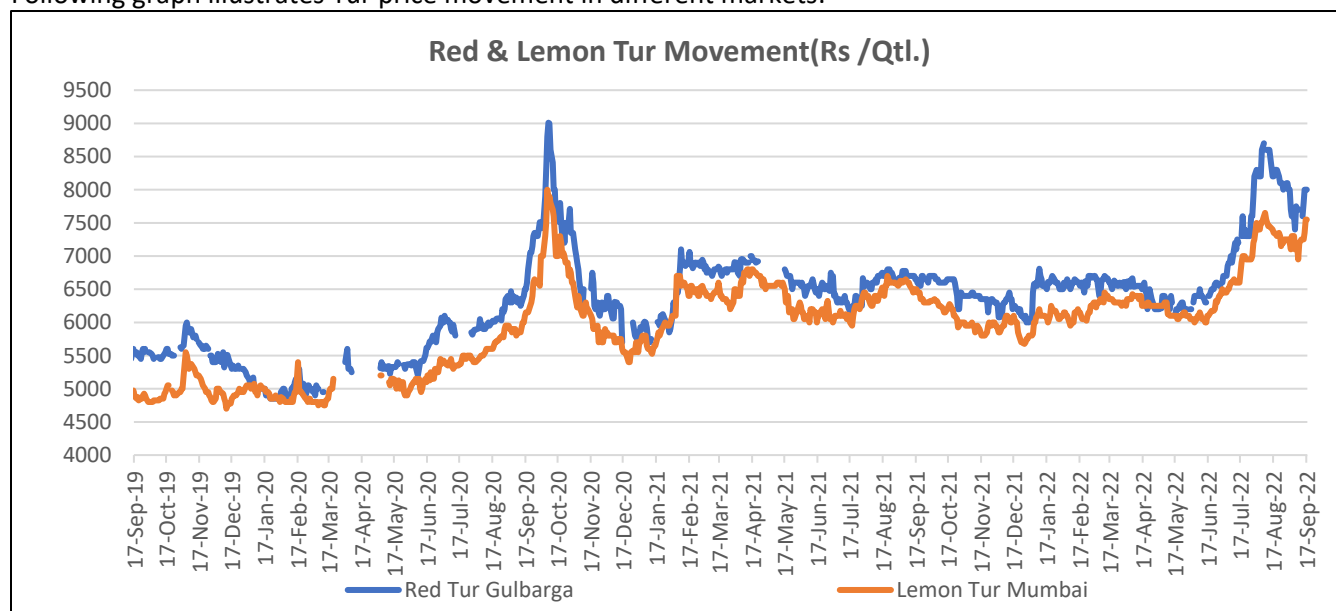

Market Recap:

Tur traded firm by around 3 to 6% during the week under review on reports of crop loss in major producing state Karnataka. It traded up by 2.67% at INR 7,700 per quintal in Latur market and traded up by 6% at INR 8,000 per quintal in Gulbarga market. In Karnataka where Tur coverage area is around 14 lakh ha., Tur crop condition was

overall good till last week but, after 13th September, conditions started changing. During the period, Gulbarga, Bidar, Bijapur, Bagalkot, Raichur, Yadgir witnessed heavy and continuously rains spell which have reportedly deteriorated and affected the crop health. Fields are largely wet and if situations would not get normalize soon, crop loss percent may increase which may keep the sentiments firm. Tur prices may increase by INR 300-500 per quintal in coming week. At present, Africa is the only source for importing Tur where production remains between 6 to 7 lakh tonne however, import time period is too important as it take 30 to 40 days to arrive. This year Tur crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. Myanmar quotes have increased to \$955 per MT, up by \$45 per MT, from \$910 per MT last week.

Outlook for the week: Mixed trend is likely this week.

Green Gram (Moong):

Market Recap:

Moong prices remained steady to firm on reports of crop and area loss due to heavy rains in major producing states like Rajasthan, MP and Maharashtra. No arrivals were seen in major markets like- Akola, Lalitpur, Guna, Ashoknagar, Amravati which is straight signaling for reduction of Moong crop size. The largest Moong producing state Rajasthan witnessed new moong arrivals of 15,000 bags in Merthacity, 7,000 bags in Sri Ganganagar markets during the weekend. Reportedly, recent rains have affected the arrivals in key markets of Rajasthan and also there are some reports of damage to the crop besides some impact on quality. However, plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major firmness in Moong. However, slightly firm sentiments may prevail in coming days taking cues from lower arrivals. Moong prices may move up by INR 200-300 per quintal from the current levels right now. It traded steady at INR 6,700 per quintal in Jaipur while Moong prices moved up to INR 7,200 per quintal in Indore. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates.

Outlook for the week: new crop arrivals may put further pressure on the cash Moong market.
