Pulses Sector- Domestic Highlights:

According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, total kharif pulses production during 2022-23 is estimated at 83.70 lakh tonne. Under the Pulses, Tur production is estimated at 38.9 lakh tonne, down by around 10% compared to 43.4 lakh tonne in 2021-22. Urad production is estimated to be at 18.4 lakh tonne, down by 5%, from 19.4 in 2021-22 and Moong at 17.5 lakh tonne, up by 18% from 14.8 lakh tonne in 2021-22.

This week too heavy to very heavy and widespread rains seen over the major pulses growing states like- Maharashtra, MP, Rajasthan due to the cyclonic circulation as already predicated by IMD. Heavy rains have severely impacted the standing as well as harvested crops. Further, the pace of new Urad and Moong arrivals along with its quality has suffered due to continuous rains and as per sources, percentage loss may increase to 30% or higher from 20-25% estimated earlier.

New Urad crop arrival in Udgir, Maharashtra reported at around 75 qtl. which was fetched at INR 6500-6800 per quintal. During the weekend, Urad arrivals recorded in some of the key markets are - Baran 500 Qtl, Indore 3,000 Qtl, Katani 350 Qtl, Jalgaon 400 Qtl. Moong arrival remained at 15,000 Qtl in Mertacity, 400 Qtl in Jalgaon, 750 Qtl in Kekri.

As per the latest report of Min. of Agriculture, all India Pulses area recorded at 132.83 lakh ha. as on 23rd September, 2022, down by around 3.94% from 138.28 lakh hectare, Urad acreage reported at 37.73 lakh ha., down by nearly 3.87% from 39.26 lakh ha., Moong acreage at 33.37 lakh ha., down by 3.84% from 34.71 lakh ha. and Tur sowing at 46.03 lakh ha. area, down by 4.52% from 48.22 lakh ha.

Tur traded steady to firm by around 4% during the week under review on reports of crop loss in major producing state Karnataka. It traded up by 4.23% at INR 7,400 per quintal in Indore market and traded steady at INR 7,700 per quintal in Latur market due to subdued demand from local Dall mills. Some incidents of sterility mosaic disease in Bidar and adjoining areas of Karnataka have been noticed. Tur crop is at vegetative stage in these areas and the incidents may negatively affect the growth of the crop which would translate into lower yield. Earlier also there was damage due to the rains in July-August in key growing states. Moving ahead yields are also expected to reduce as excess rains would affect the flowering of the crop. Quotation for Burmese Tur also improved to \$960 per MT from \$955 per MT last week C&F Mumbai. However, price rise in Tur likely to capped due to continuous/regular influx of Tur from South African countries at lower prices compared to Myanmar origin which is compelling the Burmese traders to keep their quotations lower too. On the other hand, imported stuff from African origin is likely to get consumed quickly and thereafter, prices may again move up. Till new crop arrivals starts in India as well as in Myanmar, Africa is the only source for importing Tur where production is likely between 6 to 7 lakh tonne. Meanwhile, as per preliminary AgriWatch estimate, Tur production for Kharif 2022-23 is likely to be around 32-33 Lakh MT (LMT) this year, down by around 12% from 37.11 LMT last year.

Urad traded mixed during the week under review. It traded up by 0.70% at INR 7,150 per quintal in Chennai while it remained down by 2.70% at INR 7,200 per quintal in Mumbai due to increased arrivals of inferior quality. Market prices are likely to remain slightly weak due to arrivals of inferior quality new crop which is fetching at lower prices and in turn weighing on the sentiments. Demand is expected to improve once the new crop quality improves which may remain supportive for prices. Stocks at major ports like – Mumbai and Chennai are also reportedly very lower or negligible. At present, good buying interest from Dall mills of Jalgaon is reportedly only for good quality while its new arrivals are at lower side. Dall demand from UP, Delhi and Maharashtra line is reportedly steady as of now. Meanwhile, the market participants are in wait and watch and are trying to assess the crop loss due to rains before entering into the market. Further, Urad crop in key growing regions (MP, UP and partly in Rajasthan)

are in harvesting stage and recent continuous rains may further affect the crops yield and quality as well. Myanmar quotes have fallen to \$875 per MT from \$895 per MT for Faq and \$1020 per MT from \$1035 per MT for Sq variety respectively C&F at Mumbai port. The volume of import needs to be monitored for September. As per sources, around 23,500 MT Urad has been imported in August.

Moong cash market traded mixed during the week under review. It traded at INR 7,000 per quintal, up by 4.48% from 6,700 per quintal in Jaipur and at INR 7,000 per quintal, down by 2.78% from 8,000 per quintal in Indore. There is no impact of recent heavy rains over MP, UP and Maharashtra on the crops as the harvesting is mostly over while in Rajasthan about 15-20% harvesting is left. However, the rains have affected the new crop arrivals in the markets and has also increased the moisture content in the new crop (harvested seed). Further, farmers are also holding stocks as there are talks that NAFED will start procurement from early October at MSP which would fetch higher prices to farmers compared to prevailing market prices. Prices are expected to improve once the procurement starts thereafter, comfortable supply would keep prices in check. Plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major firmness in Moong. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates.

Chana cash markets traded almost steady during the week under review due to continuous selling by NAFED at lower levels (around INR 4331 per quintal) in heavy volume to keep the prices under check. So, any big jump in prices unlikely as of now as ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop may continue to keep check on the sentiments. Further, Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops like wheat, mustardseed and spices while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in prices of Chana is unlikely at this point of time.

Lentil cash market traded mixed during the week under review on reports of bumper Lentil production in Canada as well as Australia and Lentil imports in huge volume (1,16,000 tonne, -estimated) during August. Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during the year 2022-23. Thus, global market surplus is likely to improve by 14-15 lakh tonne from 9 to 10 lakh tonne after considering higher crop size in both the countries. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Under the given situation, farmers in India too may release their stocks (around 10 to 15% stocks) before Rabi sowing, expected from mid-Oct. Overall tone remains weak for lentil prices.

International News:

According to the latest report by U.S. Department of Agriculture (USDA), the country is expected to produce around 5.03 LMT Dry Peas (of all classes), up by 29% from 3.90 LMT last year. Around 9.14 lakh acres area was estimated to be sown under it which is down by 10% from earlier forecast and around 6% from 2021 forecast. In Montana and North Dakota, harvest has been reportedly completed.

According to the latest report by U.S. Department of Agriculture (USDA), the country is expected to produce 2.20 LMT Chickpea (Chana) this year, up by 37% from last year. Around 3.59 lakh acres area has been covered under it which is up by 3% from earlier forecast. However, small Chickpea cover area is expected at 0.80 lakh acres.

According to the latest report by U.S. Department of Agriculture (USDA), US is expected to harvest around 1.2 LMT of Lentils this year which is up by 46% from around 0.82 LMT last year. Increase in sowing coverage and yield both remains main reasons behind the projected higher output. However, sowing coverage has increased by 3%

to 6,70,000 acres but it is still lower by 5% from last year's coverage area. Simultaneously, yield also pegged at 766 pound, up by 160 pound from last year.

Weekly Outlook: - Urad, Tur and Moong may trade firm while Lentils and Chana may trade in a range this week.

Pulses-Wise Scenario:

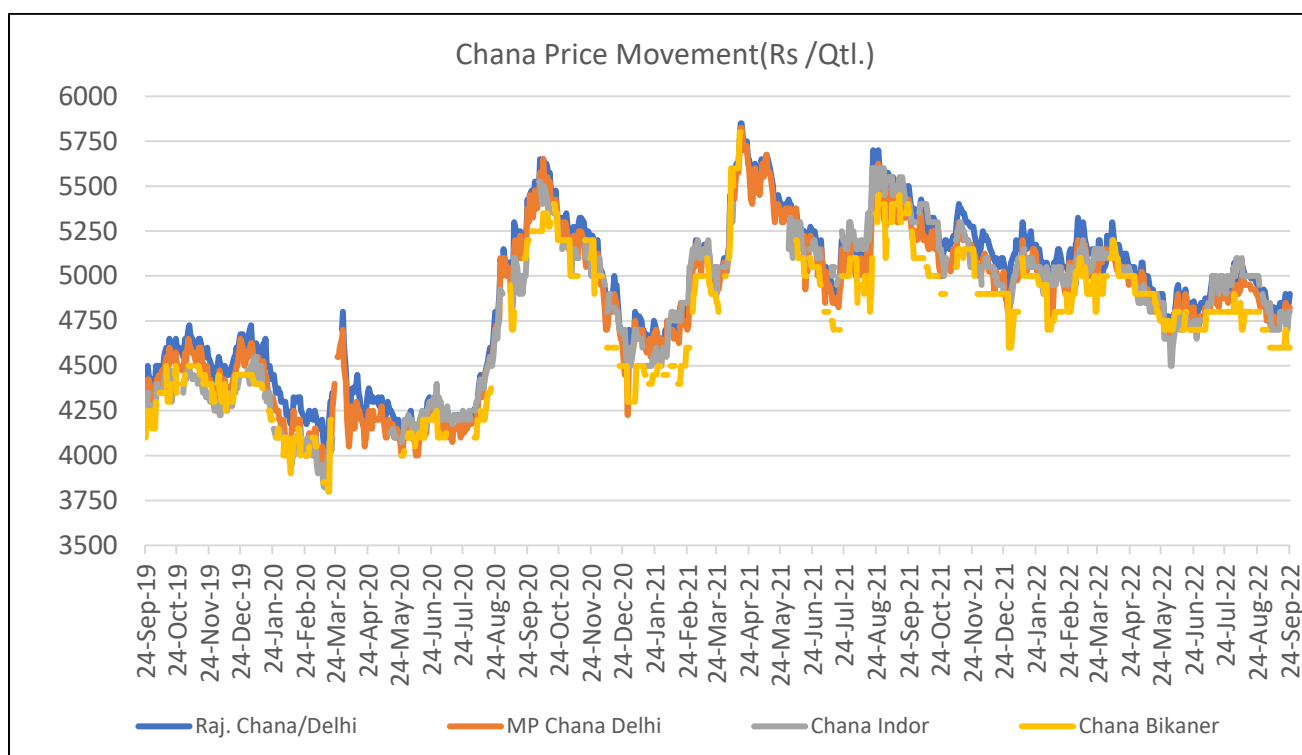

Chana

Current Scenario:

Chana cash markets traded almost steady during the week under review due to continuous selling by NAFED at lower levels (around INR 4331 per quintal) in heavy volume to keep the prices under check. So, any big jump in prices unlikely as of now as ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop may continue to keep check on the sentiments. Further, Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops like wheat, mustardseed and spices while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in prices of Chana is unlikely at this point of time.

Outlook for the week: Chana may trade in a range due to easy availability of stocks in markets.

Following graph illustrates Chana price movement in different markets:

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	23.09.22	16.09.22	21.08.22	21.09.21	14.09.22

Pigeon Pea (Tur/Toor):

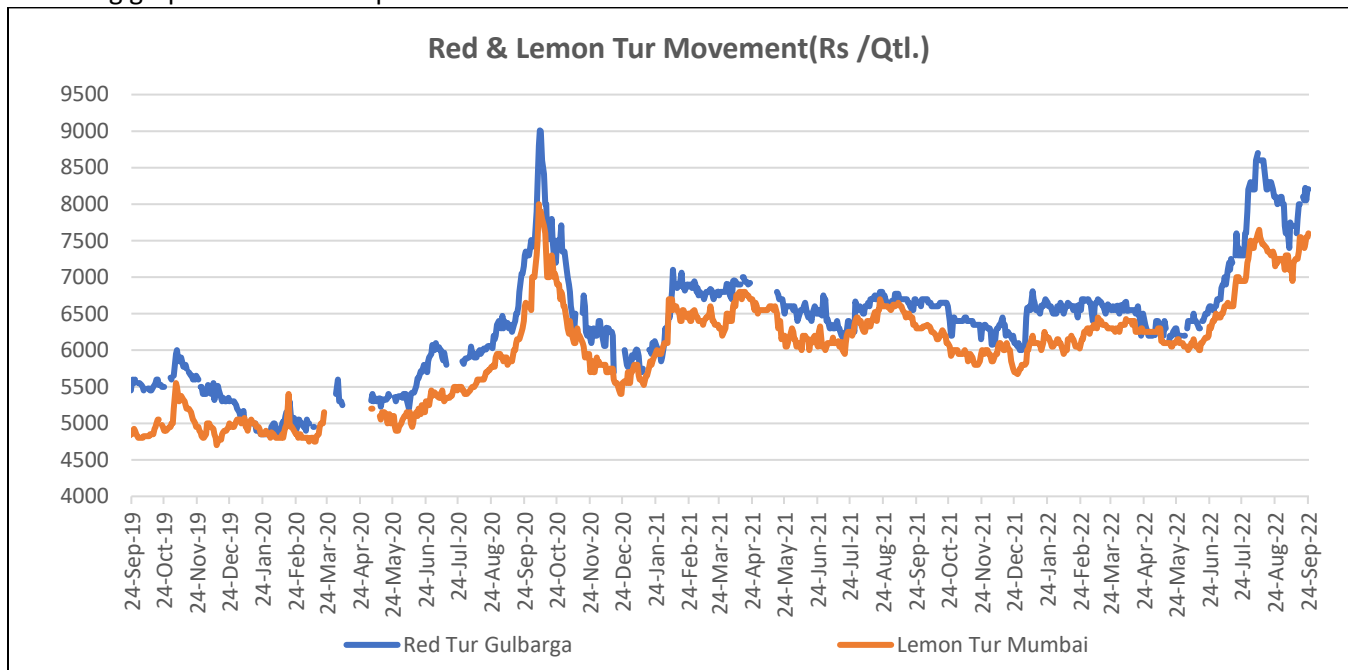

Market Recap:

Tur traded steady to firm by around 4% during the week under review on reports of crop loss in major producing state Karnataka. It traded up by 4.23% at INR 7,400 per quintal in Indore market and traded steady at INR 7,700 per quintal in Latur market due to subdued demand from local Dall mills. Some incidents of sterility mosaic disease in Bidar and adjoining areas of Karnataka have been noticed. Tur crop is at vegetative stage in these areas and the incidents may negatively affect the growth of the crop which would translate into lower yield. Earlier also there was damage due to the rains in July-August in key growing states. Moving ahead yields are also expected to reduce as excess rains would affect the flowering of the crop. Quotation for Burmese Tur also improved to \$960 per MT from \$955 per MT last week C&F Mumbai. However, price rise in Tur likely to capped due to continuous/regular

influx of Tur from South African countries at lower prices compared to Myanmar origin which is compelling the Burmese traders to keep their quotations lower too. On the other hand, imported stuff from African origin is likely to get consumed quickly and thereafter, prices may again move up. Till new crop arrivals starts in India as well as in Myanmar, Africa is the only source for importing Tur where production is likely between 6 to 7 lakh tonne. Meanwhile, as per preliminary AgriWatch estimate, Tur production for Kharif 2022-23 is likely to be around 32-33 Lakh MT (LMT) this year, down by around 12% from 37.11 LMT last year.

Outlook for the week: Mixed trend is likely this week.

Green Gram (Moong):

Market Recap:

Moong cash market traded mixed during the week under review. It traded at INR 7,000 per quintal, up by 4.48% from 6,700 per quintal in Jaipur and at INR 7,000 per quintal, down by 2.78% from 8,000 per quintal in Indore. There is no impact of recent heavy rains over MP, UP and Maharashtra on the crops as the harvesting is mostly over while in Rajasthan about 15-20% harvesting is left. However, the rains have affected the new crop arrivals in the markets and has also increased the moisture content in the new crop (harvested seed). Further, farmers are also holding stocks as there are talks that NAFED will start procurement from early October at MSP which would fetch higher prices to farmers compared to prevailing market prices. Prices are expected to improve once the procurement starts thereafter, comfortable supply would keep prices in check. Plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any

major firmness in Moong. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates.

Outlook for the week: new crop arrivals may put further pressure on the cash Moong market. Following graph illustrates Pea price movement in different markets:

Moong Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
