Pulses Sector- Domestic Highlights:

According to the 1st Advance Estimates of production of Kharif Pulses for 2022-23 released by the Agriculture Department of Rajasthan, Kharif Moong production during 2022-23 is estimated to increase by 46% to 13,21,460 MT from 9,05,713 MT, Urad at 2,55,660 MT, up by 64% from 1,55,626 MT and Tur is estimated at 6,673 MT which is almost similar to previous year's production of 6,708 MT.

As per IMD's latest report, conditions are becoming favorable for further withdrawal of Southwest monsoon from some more parts of India. Late withdrawal of monsoon this year couple with good and widespread rains over Central, Southern along with North and Northwest India, has provided good residual moisture for Rabi crops and it is likely that Rabi sowing/planting will start on time with good pace.

Meanwhile, a cyclonic circulation lies over West-central Bay of Bengal off Andhra Pradesh coast in lower & middle tropospheric levels. There may be rains in some part of Karnataka during next few days where Tur crop is in crucial vegetative stage or entering into early reproductive phase. If volume of rains remains heavy, it may impact the crop negatively.

A vessel with 23,800 tonne Tur has reached at Mumbai port and around 1.50 lakh tonne Tur is expected to reach India in October. Tur imports from African countries are expected to increase in October and November month due to cheaper price. Lower quotes from South African countries are also putting pressure on Myanmar Tur prices. If, import volume at lower prices increases from Africa, it may put some pressure on prices in local markets and in turn, prices may slip from its current levels.

Daily average Urad arrivals recorded in some of the key markets are - Lalitpur 14,000-15,000 Qtl, Ashoknagar 7,500-8,000 Qtl, Jalgaon 3,000-3,500 Qtl, Indore 1,500-2,000 Qtl, Kota 8,000-10,000 Qtl, Kekri 500-700 Qtl and in Gulbarga 1,000-1,500 Qtl.

Similarly, Moong arrivals recorded in some of the key markets – Gulbarga 1,000-1,500 Qtl, Indore 500-700 Qtl, Kekri 3,000 Qtl.

As per the latest report of Min. of Agriculture, all India Pulses area recorded at 133.68 lakh ha. as on 30th September, 2022, down by around 3.96% from 139.2 lakh hectare, Urad acreage reported at 38.27 lakh ha., down by nearly 3.27% from 39.57 lakh ha., Moong acreage at 33.44 lakh ha., down by 3.88% from 34.79 lakh ha. and Tur sowing at 46.15 lakh ha. area, down by 4.44% from 48.29 lakh ha.

Tur traded mostly down except in Indore where it traded at INR 7,500 per quintal, up by 1.35% from INR 7,400 per quintal reportedly due to increase in some local demand. However, Tur prices traded at INR 7,900 per quintal, down by 1.25% in Gulbarga and at INR 7,400 per quintal, down by 5.13% in Latur on subdued demand from processed Tur Dall from millers/processors. At present, traders are reluctant to take any fresh deals. They are mostly trying to sell/dispose their high-priced old stocks before entering into fresh deals as their capital is chocked which is affecting their buying / demand. Moreover, as per IMD, there are chances of more rains during October over the southern states besides forming of low-pressure area over Bay-of-Bengal which may also likely to have impact on southern part of the country. Tur crop is already in stress due to recent and earlier heavy / excess rains, further rains would again have a negative impact on crop which is moving towards reproductive phase.

Quotation for Burmese Tur decreased to \$945 per MT from \$960 per MT last week C&F Mumbai due to increased import volume. If, import volume at lower prices increases from Africa, it may put some pressure on prices in local markets and in turn, prices may slip from its current levels. Africa is the only source for importing Tur right

now (Domestic and Myanmar crop likely from January 2023) where production is likely between 6 to 7 lakh tonne. Meanwhile, as per preliminary AgriWatch estimate, Tur production for Kharif 2022-23 is likely to be around 32-33 Lakh MT (LMT) this year, down by around 12% from 37.11 LMT last year.

Urad traded down by 0.50 to 1% during the week under review on increased arrivals of inferior quality. It traded down by 0.69% at INR 7,150 per quintal in Mumbai while it remained down by 1.40% at INR 7,050 per quintal in Chennai. Market prices are likely to remain slightly weak due to arrivals of inferior quality new crop which is fetching at lower prices and in turn weighing on the sentiments. However, good demand for superior quality is being observed currently from Dall mills of Andhra Pradesh, Maharashtra and Tamil Nadu which is restricting any major decline in prices as of now. Meanwhile, Urad imports during 1st Sept to 21st Sept at Chennai reportedly pegged at 30,850 MT. Urad Demand is expected to improve once the new crop quality improves which may remain supportive for prices. Stocks at major ports like – Mumbai and Chennai are also reportedly very lower or negligible. Myanmar quotes have fallen to \$860 per MT from \$875 per MT for Faq and \$1000 per MT from \$1020 per MT for Sq variety respectively C&F at Mumbai port. The volume of import needs to be monitored for October. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23, kharif Urad production is estimated to be at 18.4 lakh tonne, down by 5%, from 19.4 in 2021-22. AgriWatch expects Urad production during 2022-23 season would at 21.12 lakh tonnes lower from 22.91 lakh tonnes.

Moong cash market too traded down during the week under review. It traded at INR 6,900 per quintal, down by 1.43% from 7,000 per quintal in Jaipur and at INR 7,800 per quintal, down by 2.58% from 8,000 per quintal in Jalgaon. Despite start of new season and end of harvesting in almost all the key growing states, Moong arrival pressure is still lower because farmers are holding back their produce as they wanted to sell their produce at MSP (Rs 7755/Qtl.) to Govt. The procurement of Moong likely to start from early October in key states. Prices are expected to improve once the procurement starts thereafter, comfortable supply would keep prices in check. Plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major firmness in Moong. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23, Moong production during 2022-23 is estimated at 17.5 lakh tonne, up by 18% from 14.8 lakh tonne in 2021-22 while AgriWatch production estimate is of 14 lakh tonne.

Chana cash markets traded mixed during the week under review due to continuous selling by NAFED at lower levels in heavy volume for keeping the prices under check and lower demand from Dall mills. Traders are remaining aloof from taking part for any new deals as they are fearing of NAFED intervention in the market through selling at lower prices. So, any big jump in prices unlikely as of now as ample availability in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop may continue to keep check on the sentiments. Further, Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops like Wheat, Mustardseed and Spices while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in prices of Chana is unlikely at this point of time. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Lentil cash market traded mixed during the week under review on reports of Lentil import at higher volume and poor participation by Dall mills. It traded at INR 6,000 per quintal, down by 2.44% from INR 6,150 per quintal in Raipur and at INR 6,100 per quintal, up by 3.39% from INR 5,900 per quintal. Dall mills have reportedly stopped the new purchasing as they want to sell off their previous stocks of higher prices before taking any new position. Also, they are running short off money because demand for Dall is lower as of now. India has imported around 1,16,000 tonne Lentil (estimated) during August. Meanwhile, Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during the year 2022-23. Thus, global market surplus is likely to improve. On better crop prospects, stockists in local markets too have started releasing

stocks at discounted price. Under the given situation, farmers in India too may release their stocks (around 10 to 15% stocks) before Rabi sowing, expected from mid-Oct. Overall tone remains weak for lentil prices.

Weekly Outlook: - Pulses prices may trade in a range this week except Urad which is likely to move upside.

Pulses-Wise Scenario:

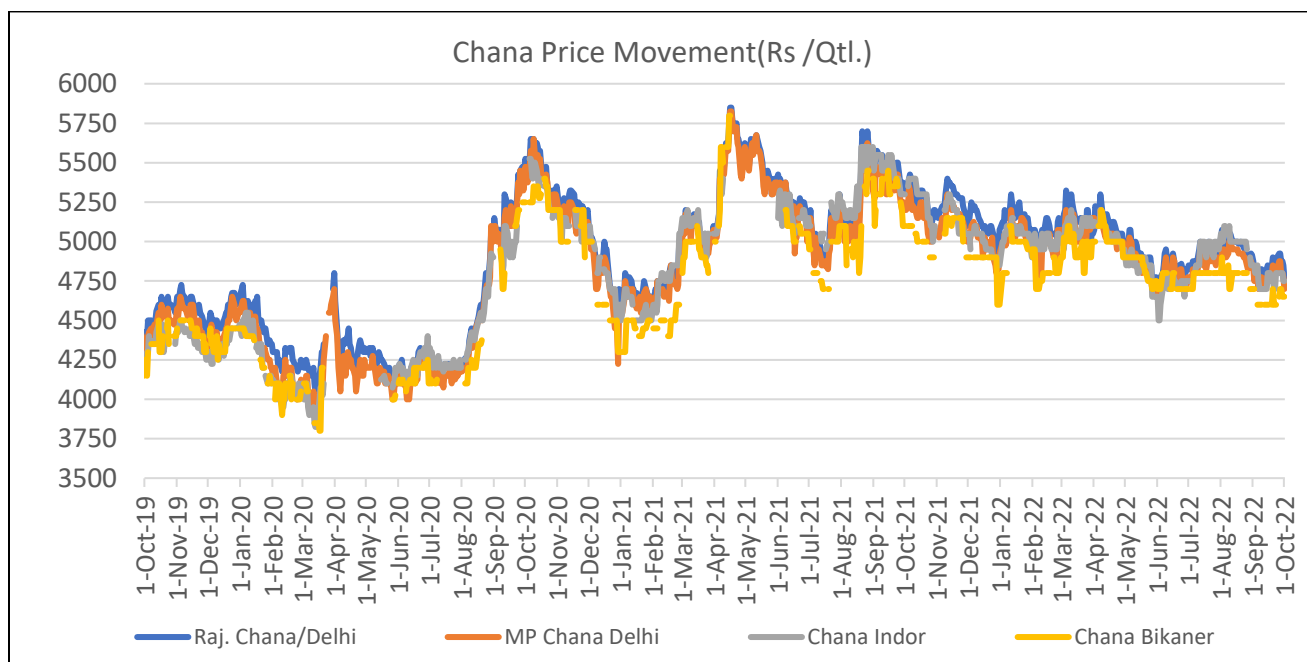

Chana

Current Scenario:

Chana cash markets traded mixed during the week under review due to continuous selling by NAFED at lower levels in heavy volume for keeping the prices under check and lower demand from Dall mills. Traders are remaining aloof from taking part for any new deals as they are fearing of NAFED intervention in the market through selling at lower prices. So, any big jump in prices unlikely as of now as ample availability in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop may continue to keep check on the sentiments. Further, Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops like Wheat, Mustardseed and Spices while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in prices of Chana is unlikely at this point of time. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Outlook for the week: Chana may trade in a range due to easy availability of stocks in markets.

Following graph illustrates Chana price movement in different markets:

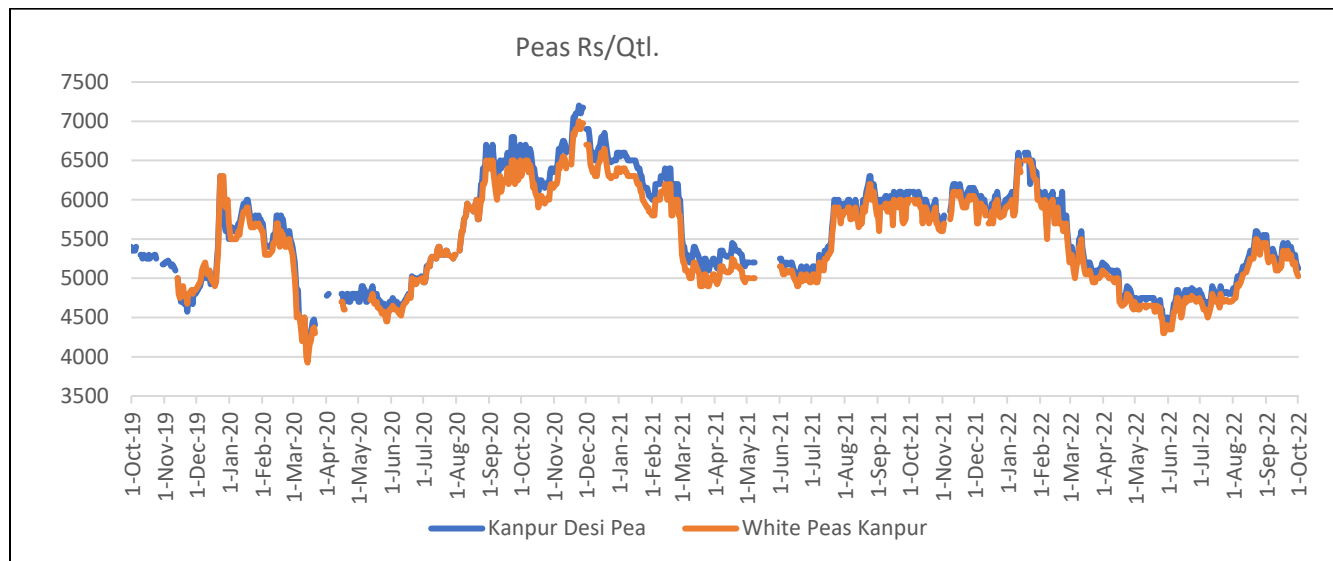

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	01.10.22	24.09.22	01.09.22	01.10.21	24.09.22

Tan.Chana	4400	4400	4500	5025	0.00
Price Projection For Bikaner During October-2022 (4500-5100)					

Peas (Matar):
Current Scenario:

Peas physical market prices traded down due to lower demand from millers and regular selling of Chana by NAFED at lower prices. Desi Peas and White Peas prices traded down at INR 5,125 per quintal, down by 5% from INR 5,400 per quintal and at INR 5,025 per quintal, down by 5% from INR 5,300 per quintal in Kanpur. Market prices are likely to trade in a range.

Outlook for the week: Pea market may trade in a range this week.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	01.10.22	24.09.22	01.09.22	01.10.21	24.09.22

Price Projection For Kanpur Desi During October-2022 (4900-5400)					

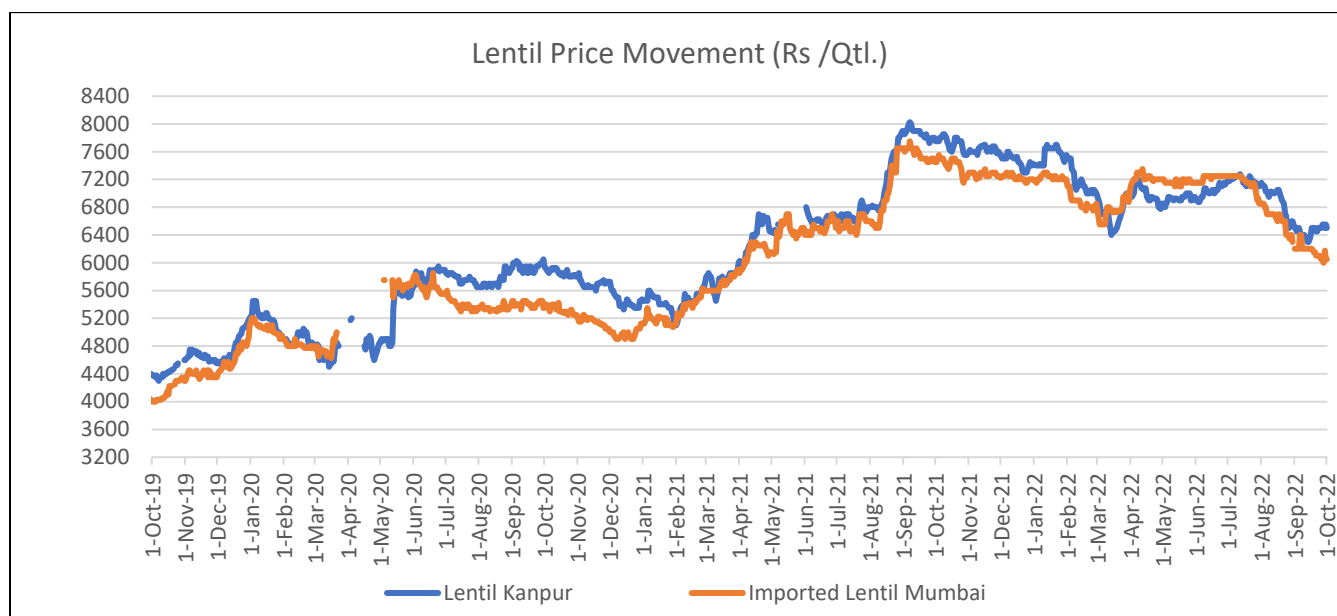

Lentils (Masoor):
Market Recap:

Lentil cash market traded mixed during the week under review on reports of Lentil import at higher volume and poor participation by Dall mills. It traded at INR 6,000 per quintal, down by 2.44% from INR 6,150 per quintal in Raipur and at INR 6,100 per quintal, up by 3.39% from INR 5,900 per quintal. Dall mills have reportedly stopped the new purchasing as they want to sell off their previous stocks of higher prices before taking any new position. Also, they are running short off money because demand for Dall is lower as of now. India has imported around

1,16,000 tonne Lentil (estimated) during August. Meanwhile, Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during the year 2022-23. Thus, global market surplus is likely to improve. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Under the given situation, farmers in India too may release their stocks (around 10 to 15% stocks) before Rabi sowing, expected from mid-Oct. Overall tone remains weak for lentil prices.

Market Outlook: Prices may trade in a range.

Following graph illustrates Lentil price movement in different markets:

Lentil Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over

Price Projection For Kanpur During October-2022 (6300-7500)					

Pigeon Pea (Tur/Toor):

Market Recap:

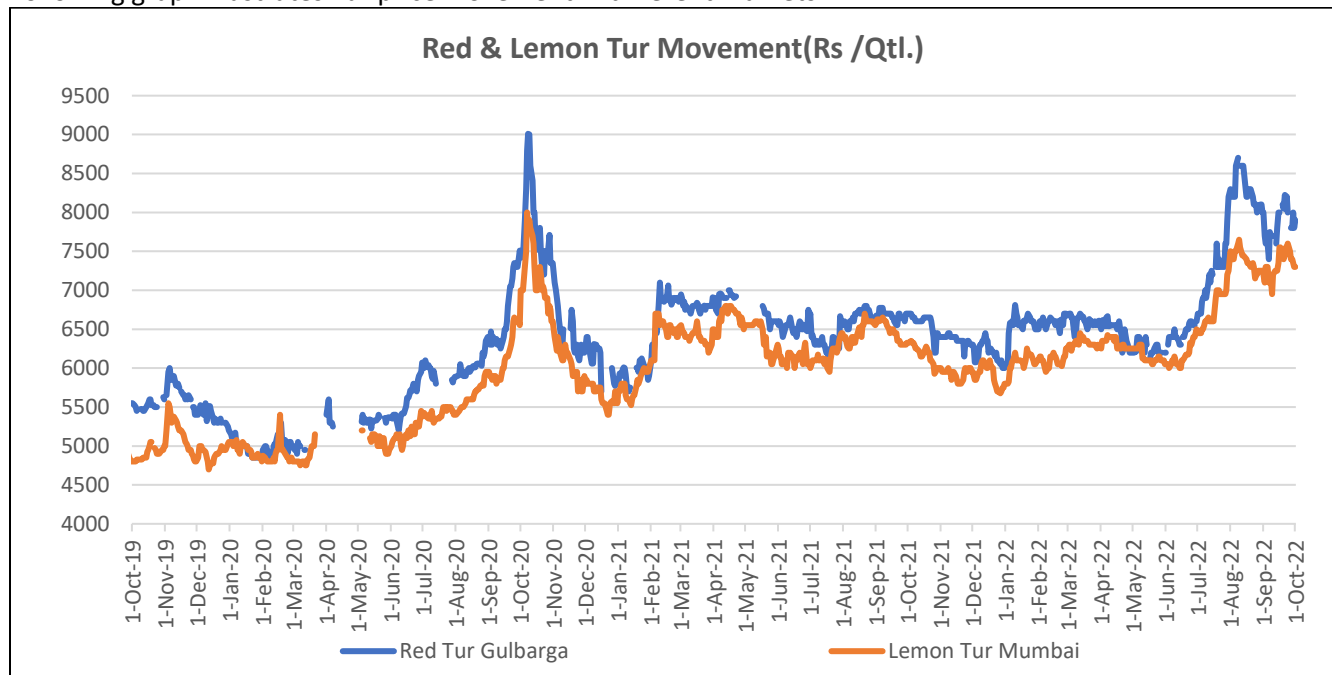

Tur traded mostly down except in Indore where it traded at INR 7,500 per quintal, up by 1.35% from INR 7,400 per quintal reportedly due to increase in some local demand. However, Tur prices traded at INR 7,900 per quintal, down by 1.25% in Gulbarga and at INR 7,400 per quintal, down by 5.13% in Latur on subdued demand from

processed Tur Dall from millers/processors. At present, traders are reluctant to take any fresh deals. They are mostly trying to sell/dispose their high-priced old stocks before entering into fresh deals as their capital is chocked which is affecting their buying / demand. Moreover, as per IMD, there are chances of more rains during October over the southern states besides forming of low-pressure area over Bay-of-Bengal which may also likely to have impact on southern part of the country. Tur crop is already in stress due to recent and earlier heavy / excess rains, further rains would again have a negative impact on crop which is moving towards reproductive phase.

Quotation for Burmese Tur decreased to \$945 per MT from \$960 per MT last week C&F Mumbai due to increased import volume. If, import volume at lower prices increases from Africa, it may put some pressure on prices in local markets and in turn, prices may slip from its current levels. Africa is the only source for importing Tur right now (Domestic and Myanmar crop likely from January 2023) where production is likely between 6 to 7 lakh tonne. Meanwhile, as per preliminary AgriWatch estimate, Tur production for Kharif 2022-23 is likely to be around 32-33 Lakh MT (LMT) this year, down by around 12% from 37.11 LMT last year.

Outlook for the week: Mixed trend is likely this week.

Following graph illustrates Tur price movement in different markets:

Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	01.10.22	24.09.22	01.09.22	01.10.21	24.09.22

Green Gram (Moong):
Market Recap:

Moong cash market too traded down during the week under review. It traded at INR 6,900 per quintal, down by 1.43% from 7,000 per quintal in Jaipur and at INR 7,800 per quintal, down by 2.58% from 8,000 per quintal in Jalgaon. Despite start of new season and end of harvesting in almost all the key growing states, Moong arrival pressure is still lower because farmers are holding back their produce as they wanted to sell their produce at

MSP (Rs 7755/Qtl.) to Govt. The procurement of Moong likely to start from early October in key states. Prices are expected to improve once the procurement starts thereafter, comfortable supply would keep prices in check. Plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major firmness in Moong. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23, Moong production during 2022-23 is estimated at 17.5 lakh tonne, up by 18% from 14.8 lakh tonne in 2021-22 while AgriWatch production estimate is of 14 lakh tonne.

Outlook for the week: new crop arrivals may put further pressure on the cash Moong market. Following graph illustrates Pea price movement in different markets:
