Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Most of the markets remained closed due to auspicious festival of Navratri and Dussehra. Market will back on track again Monday onward. The spell of unseasonal rains remain disturbing not only for Kharif harvesting but also Rabi sowing.

In line with IMD predictions, rains observed in major parts of main Pulses producing states like Maharashtra, UP, Rajasthan, Madhya Pradesh and Karnataka during the week. Rains at this point of time has not only affected the new crop arrivals but also quality of the produce (moisture content will increase) which may have a bearing on the quality of the produce. Moreover, recent rains may delay the Rabi crop sowing / planting due to presence of excess moisture in the field. Tur crop has reportedly turned yellow in some areas of Karnataka due to excess rains and farmers have been advised to make proper drainage system to drain out the excess water. However, weather is reportedly conducive in other growing belts of the state.

Department of Agriculture & Farmers' Welfare has recently given its nod for procurement of Kharif Moong at MSP of INR 7,755 per quintal under the PSS in Karnataka, Tamil Nadu, UP, Telangana, Chhattisgarh and Haryana. NAFED has already commenced its procurement in Karnataka. Now, with this new development, Moong prices are likely to move up marginally in coming days but, comfortable supply would keep prices in check. Plenty of stocks in Central Pool and continuous supply from summer crop and now from Kharif crop would keep easy availability and thus prices are not likely to witness an unexpected spike in Moong cash market.

Meanwhile, according to the recent release by Department of Agriculture & Farmers Welfare, farmers have covered 0.384 lakh ha area under Chana, considerably up from 0.014 lakh ha last year till 7th October, 2022. With the help of excess rainfall and late withdrawal of Southwest monsoon this year, farmers have started Rabi sowing early taking advantage of good moisture level in the field. If weather opens up, Rabi sowing activities are likely to gain momentum. However, as per market sources, Chana sowing is likely to decrease this year compared to last year owing to poor realization in Chana and farmers may shift to other lucrative crops like Mustard seed, Wheat etc.

As per the sources, seed demand for Chana seems weak in Maharashtra as of now in comparison to last year. Maharashtra contributes around 20-25% of the country's total Chana production.

Canadian Lentil quotes at Indian ports remained steady at \$850-860 per MT as Canadian traders are not ready to sell in volume below the given range. Apart from it, demand in domestic market is likely to improve now, may lend some support to cash Masur markets in the near term. Disparity at the current price too would remain supportive to cash market in Central India. Under the prevailing market fundamentals Masur may move up by INR 100-200 from the current level. Sowing is about to start and area under Masur is expected to increase by 5 to 7% this year.

Tur traded firm during the week under review. It traded at INR 8,200 per quintal, up by 3.80% from INR 7,900 per quintal in Gulbarga and at INR 7,500 per quintal in Mumbai, up by 1.35% from INR 7,400 per quintal despite the fact that demand in processed Tur (Dall) is down from retailers / wholesalers and consequently the demand for raw Tur is subdued from millers/processors. Also, fear of Govt. interventions if price rises, also keeping the trade participants away from bulk buying. They are mostly trying to sell/dispose their high-priced old stocks before entering into fresh deals as major part of their capital is chocked with. International quotation for Tur has come down by \$25 to \$920 per MT from \$945 last week due to easy availability from South African countries at cheaper rates. Tur prices are likely to trade steady in coming week. Meanwhile, Tur imports during 1st Sept to 21st Sept at Chennai reportedly pegged at 21,300 MT while a vessel carrying approximately 24,000 MT of African origin was scheduled to berth soon. According to the 1st Advance Estimates of production of major Kharif crops

for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Tur production is estimated at 38.9 lakh tonne, down by 10% compared to 43.4 lakh tonne in 2021-22. Against it AgriWatch is expecting production at 32-33 LMT.

This week too, **Urad** traded down by 0.70 to 1.50% during the week under review on increased arrivals of inferior quality. It traded down by 0.70% to INR 7,100 per quintal in Mumbai while it decreased by 1% to INR 7,300 per quintal from INR 7,375 per quintal in Chennai. Market prices are likely to remain weak due to arrivals of inferior quality from the new crop which is fetching at lower prices and in turn weighing on the sentiments. Recent rains in some part of MP may impact the arrival as well as quality of the produce and prevent the harvested crop from drying which in turn would lead to quality issue. On the other hand, demand is reportedly good from Andhra Pradesh, Chhattisgarh, Orissa, Rajasthan, Gujarat, Maharashtra and Tamil Nadu right now only for good quality produce while the volume for the same is at lower side. It is clear signal that supply of quality crop would remain tight this year. Myanmar C&F quotes decreased slightly to \$840 for FAQ from \$860 per MT and SQ variety quoted at \$980 per MT from \$1000 per MT basis Indian ports. Meanwhile, Urad imports during 1st Sept to 21st Sept at Chennai reportedly recorded at 30,850 MT. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, total kharif Urad production is estimated at 18.4 lakh tonne, down by 5%, from 19.4 in 2021-22. AgriWatch expects Urad production during 2022-23 season would at 21.12 lakh tonne lower from 22.91 lakh tonne.

Moong cash market mixed during the week under review. It traded at INR 7,100 per quintal, up by 2.90% from 6,900 per quintal in Jaipur and at INR 7,800 per quintal, steady at previous level in Jalgaon. Despite the start of new season and end of harvesting in almost all the key growing states, arrival pressure is still low because farmers are holding back their produce as they wanted to sell their produce at MSP (Rs 7755/Qtl.) to Govt. The crop size and quality has been affected due to excess and continuous rains observed even after harvesting period. In the wake of nod for procurement of Kharif Moong at MSP of INR 7,755 per quintal under the PSS in Karnataka, Tamil Nadu, UP, Telangana, Chhattisgarh and Haryana market prices may improve slightly from current levels. NAFED has already commenced its procurement in Karnataka. Now, with this new development, Moong prices are likely to move up marginally in coming days but, comfortable supply would keep prices in check. Plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major jump. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Moong production during 2022-23 is estimated at 17.5 lakh tonne, up by 18% from 14.8 lakh tonne in 2021-22.

Chana cash markets traded mixed during the week under review due to continuous selling by NAFED at lower levels in heavy volume for keeping the prices under check and sluggish demand from Dall mills. Traders are remaining aloof from taking part for any new deals as they are scared of NAFED continuous intervention in the market throughout the season. So, any big jump in prices is unlikely. Ample availability in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop may continue to keep market well supplied and prices down. Further, Now, there are apprehensions that if Chana prices remain below MSP, farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in prices of Chana is unlikely at this point of time. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Lentil cash market traded firm during the week under review as Canadian traders are not ready to sell their stocks in volume below a certain level which supported the falling sentiments. Lentil traded at INR 6,550 per quintal, up by 0.77% from INR 6,500 per quintal in Kanpur and at INR 6,100 per quintal, up by 1.67% from INR 6,000 per quintal in Raipur. Apart from it, demand in domestic market is likely to improve now may lend some support to cash Masur markets in the near term. Disparity at the current price too would remain supportive to cash market in Central India. Masur may move up by INR 100-200 from the current level. India has imported

around 1,16,000 tonne Lentil (estimated) during August. On the other hand, Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during the year 2022-23. Thus, global market surplus is likely to improve by 14-15 lakh tonne from 9 to 10 lakh tonne after considering higher crop size in both the countries.

International News:

According to the latest report by U.S. Department of Agriculture (USDA), the country is expected to produce around 5.03 LMT Dry Peas (of all classes), up by 29% from 3.90 LMT last year. Around 9.14 lakh acres area was estimated to be sown under it which is down by 10% from earlier forecast and around 6% from 2021 forecast. In Montana and North Dakota, harvest has been reportedly completed.

According to the latest report by U.S. Department of Agriculture (USDA), the country is expected to produce 2.20 LMT Chickpea (Chana) this year, up by 37% from last year. Around 3.59 lakh acres area has been covered under it which is up by 3% from earlier forecast. However, small Chickpea cover area is expected at 0.80 lakh acres.

According to the latest report by U.S. Department of Agriculture (USDA), US is expected to harvest around 1.2 LMT of Lentils this year which is up by 46% from around 0.82 LMT last year. Increase in sowing coverage and yield both remain main reasons behind the projected higher output. However, sowing coverage has increased by 3% to 6,70,000 acres but it is still lower by 5% from last year's coverage area. Simultaneously, yield also pegged at 766 pound, up by 160 pound from last year.

Weekly Outlook: - Pulses prices may trade in a range this week except Tur which is likely to move upside.

Pulses-Wise Scenario:

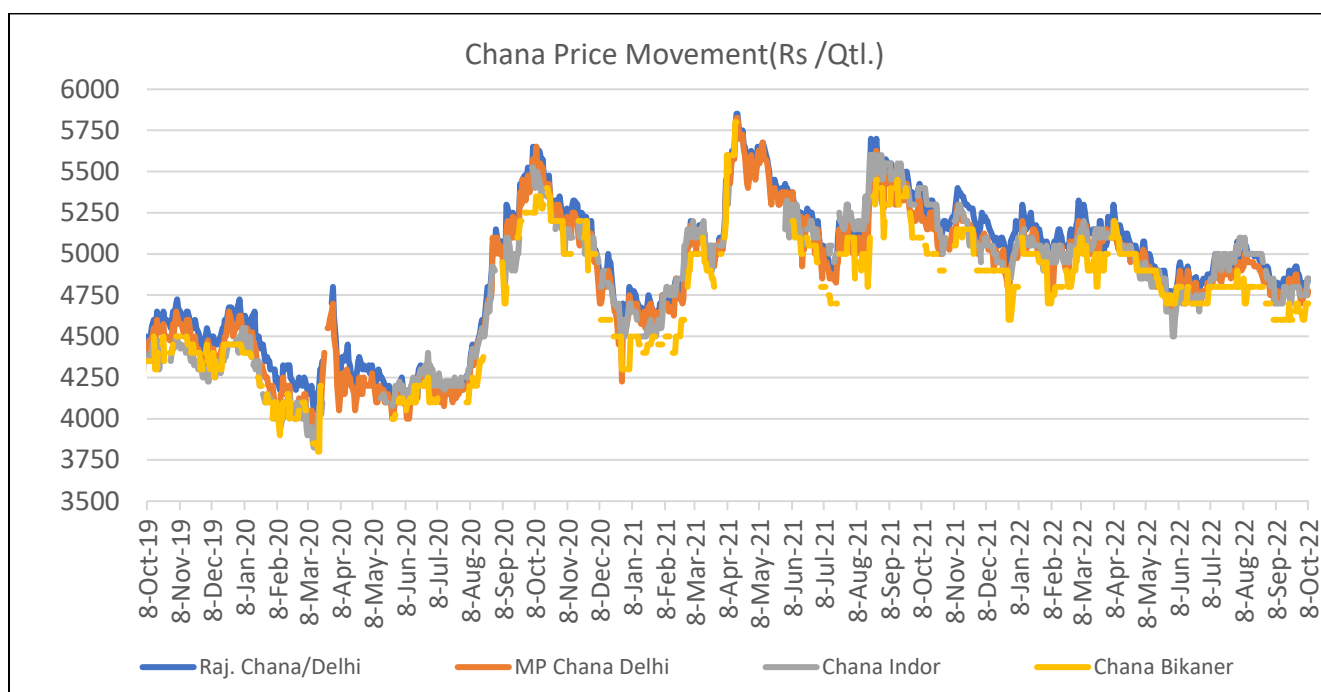

Chana

Current Scenario:

Chana cash markets traded mixed during the week under review due to continuous selling by NAFED at lower levels in heavy volume for keeping the prices under check and sluggish demand from Dall mills. Traders are remaining aloof from taking part for any new deals as they are scared of NAFED continuous intervention in the market throughout the season. So, any big jump in prices is unlikely. Ample availability in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop may continue to keep market well supplied and prices down. Further, Now, there are apprehensions that if Chana prices remain below MSP, farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in prices of Chana is unlikely at this point of time. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Outlook for the week: Chana may trade in a range due to easy availability of stocks in markets.

Following graph illustrates Chana price movement in different markets:

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	08.10.22	01.10.22	08.09.22	08.10.21	10.01.22

Bikaner Chana	4700	4650	4600	5100	1.08
Indore Chana	4850	4750	4700	5400	2.11
Tan.Chana	4350	4400	4500	4950	-1.14
Price Projection For Bikaner During October-2022 (4500-5100)					

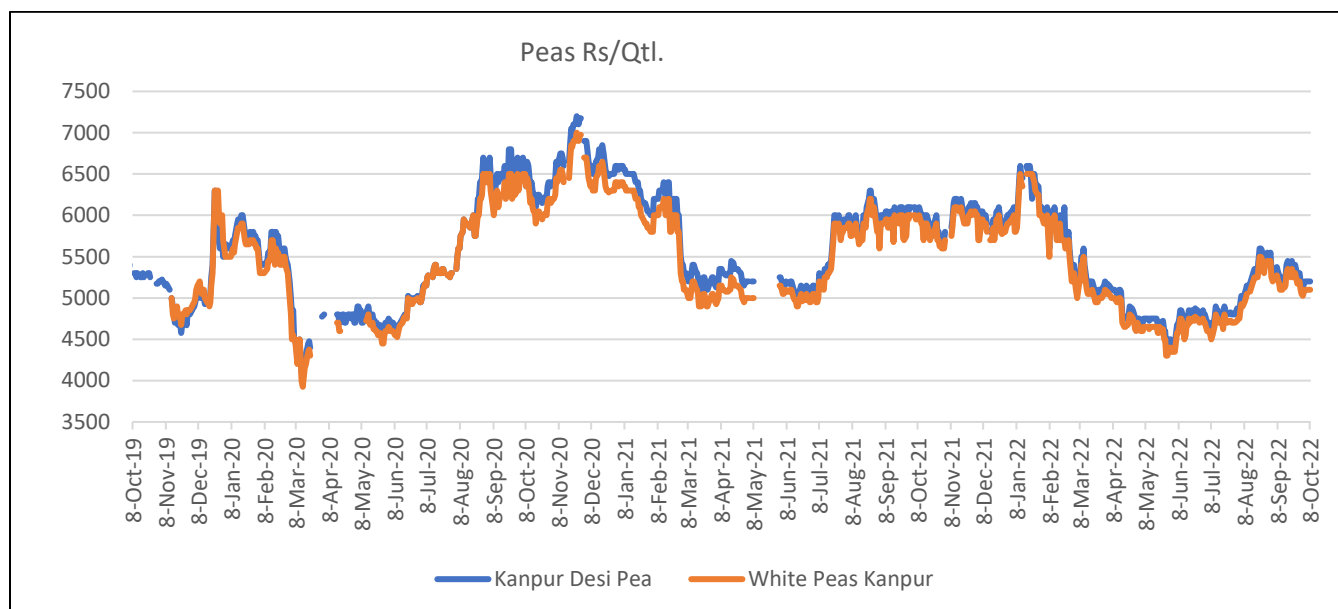

Peas (Matar):

Current Scenario:

Peas physical market prices traded up due to festive season demand from stockists and millers at current levels. However, traders are in view that regular selling of Chana by NAFED at lower prices may keep the prices under check. Desi Peas and White Peas prices traded at INR 5,200 per quintal, up by 1.46% from INR 5,125 per quintal and at INR 5,100 per quintal, up by 1.49% from INR 5,025 per quintal in Kanpur. Market prices are likely to move with minor fluctuation.

Outlook for the week: Pea market may trade in a range this week.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	08.10.22	01.10.22	08.09.22	08.10.21	10.01.22

Kanpur White Peas	5100	5025	5225	5950	1.49
Price Projection For Kanpur Desi During October-2022 (4900-5400)					

Lentils (Masoor):

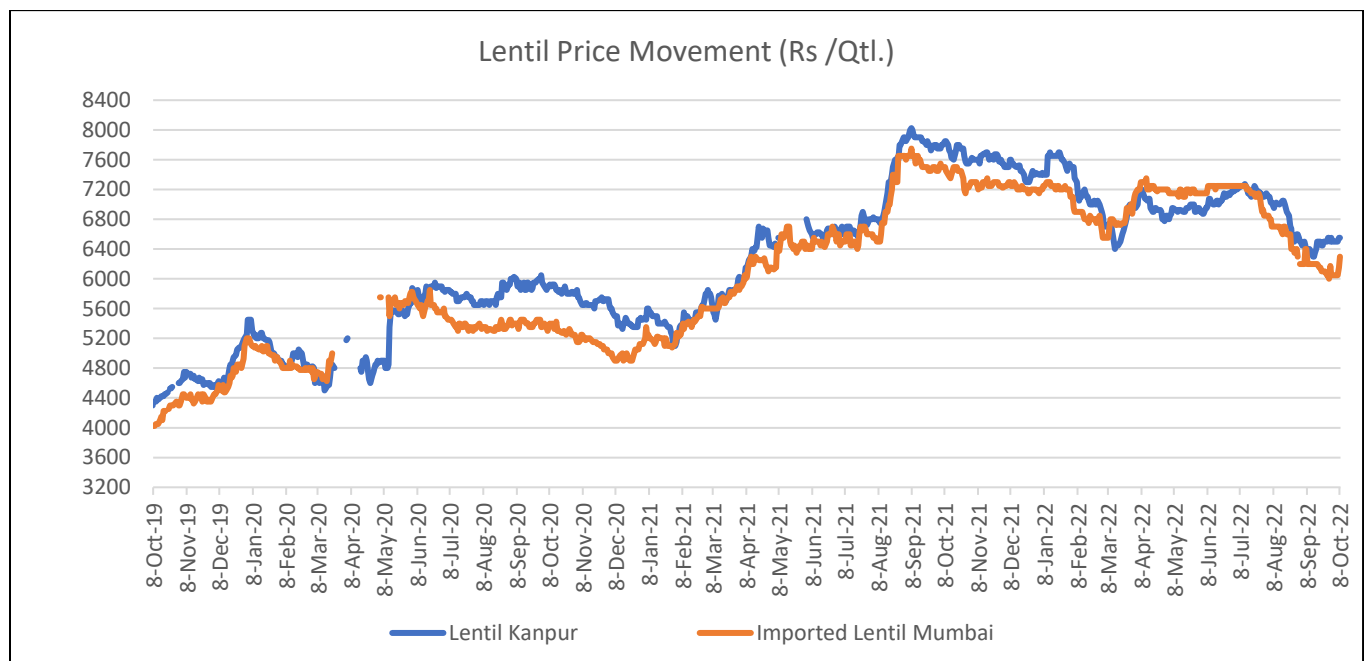

Market Recap:

Lentil cash market traded firm during the week under review as Canadian traders are not ready to sell their stocks in volume below a certain level which supported the falling sentiments. Lentil traded at INR 6,550 per quintal, up by 0.77% from INR 6,500 per quintal in Kanpur and at INR 6,100 per quintal, up by 1.67% from INR 6,000 per quintal in Raipur. Apart from it, demand in domestic market is likely to improve now may lend some support to cash Masur markets in the near term. Disparity at the current price too would remain supportive to

cash market in Central India. Masur may move up by INR 100-200 from the current level. India has imported around 1,16,000 tonne Lentil (estimated) during August. On the other hand, Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during the year 2022-23. Thus, global market surplus is likely to improve by 14-15 lakh tonne from 9 to 10 lakh tonne after considering higher crop size in both the countries.

Market Outlook: Prices are likely to move up by INR 10-200 per quintal.

Following graph illustrates Lentil price movement in different markets:

Lentil Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	08.10.22	01.10.22	08.09.22	08.10.21	10.01.22

Price Projection For Kanpur During October-2022 (6300-7500)					

Pigeon Pea (Tur/Toor):

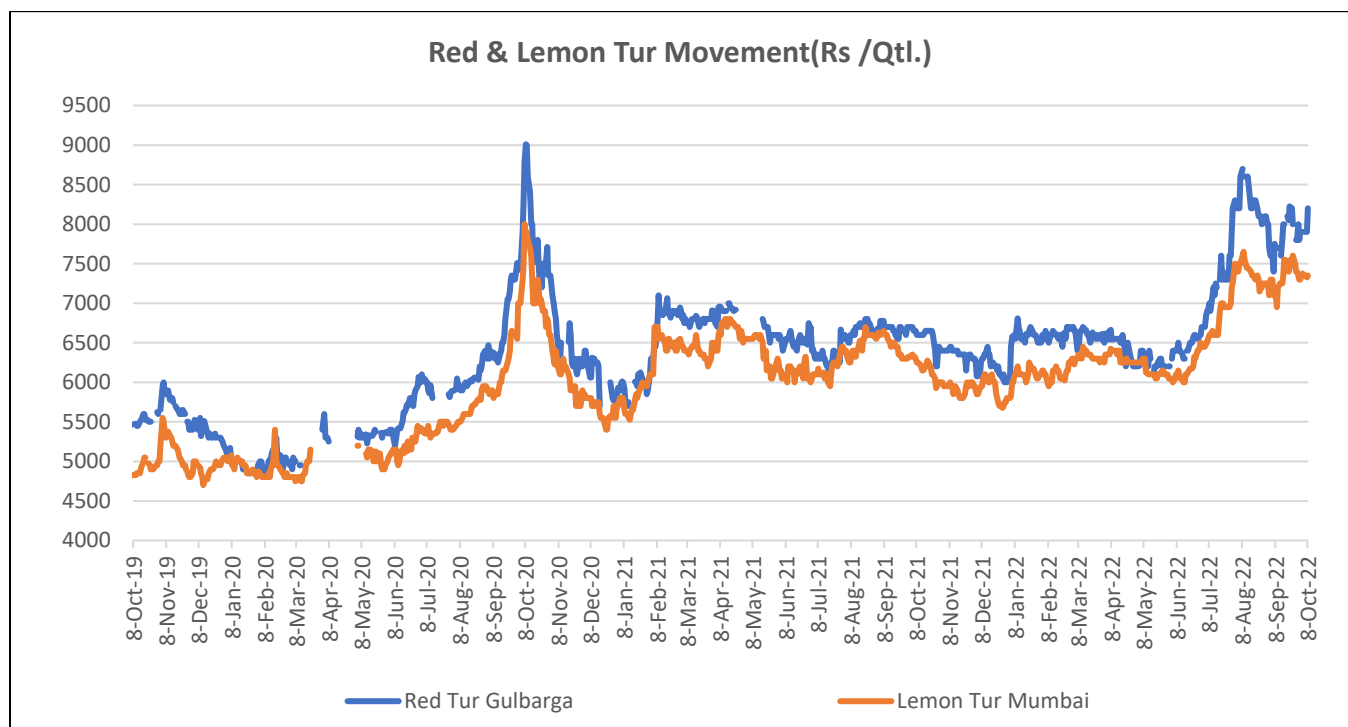

Market Recap:

Tur traded firm during the week under review. It traded at INR 8,200 per quintal, up by 3.80% from INR 7,900 per quintal in Gulbarga and at INR 7,500 per quintal in Mumbai, up by 1.35% from INR 7,400 per quintal despite the fact that demand in processed Tur (Dall) is down from retailers / wholesalers and consequently the demand

for raw Tur is subdued from millers/processors. Also, fear of Govt. interventions if price rises, also keeping the trade participants away from bulk buying. They are mostly trying to sell/dispose their high-priced old stocks before entering into fresh deals as major part of their capital is chocked with. International quotation for Tur has come down by \$25 to \$920 per MT from \$945 last week due to easy availability from South African countries at cheaper rates. Tur prices are likely to trade steady in coming week. Meanwhile, Tur imports during 1st Sept to 21st Sept at Chennai reportedly pegged at 21,300 MT while a vessel carrying approximately 24,000 MT of African origin was scheduled to berth soon. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Tur production is estimated at 38.9 lakh tonne, down by 10% compared to 43.4 lakh tonne in 2021-22. Against it AgriWatch is expecting production at 32-33 LMT.

Outlook for the week: Tur prices are likely to trade steady in coming week.

Following graph illustrates Tur price movement in different markets:

Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	08.10.22	01.10.22	08.09.22	08.10.21	10.01.22

Mumbai	7350	7300	7150	6250	0.68
Price Projection For Gulbarga During October 2022 (7600-8300)					

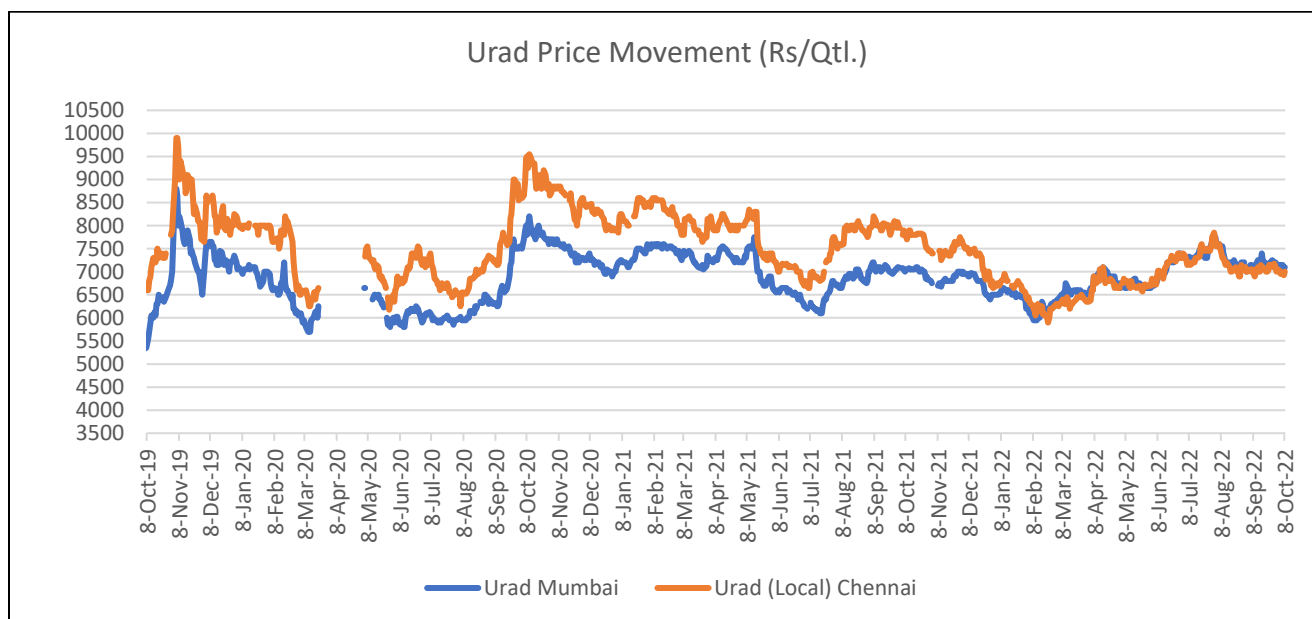

Black Matpe (Urad):

Market Recap:

This week too, **Urad** traded down by 0.70 to 1.50% during the week under review on increased arrivals of inferior quality. It traded down by 0.70% to INR 7,100 per quintal in Mumbai while it decreased by 1% to INR 7,300 per quintal from INR 7,375 per quintal in Chennai. Market prices are likely to remain weak due to arrivals of inferior quality from the new crop which is fetching at lower prices and in turn weighing on the sentiments. Recent rains in some part of MP may impact the arrival as well as quality of the produce and prevent the harvested crop from drying which in turn would lead to quality issue. On the other hand, demand is reportedly good from Andhra Pradesh, Chhattisgarh, Orissa, Rajasthan, Gujarat, Maharashtra and Tamil Nadu right now only for good quality produce while the volume for the same is at lower side. It is clear signal that supply of quality crop would remain tight this year. Myanmar C&F quotes decreased slightly to \$840 for FAQ from \$860 per MT and SQ variety quoted at \$980 per MT from \$1000 per MT basis Indian ports. Meanwhile, Urad imports during 1st Sept to 21st Sept at Chennai reportedly recorded at 30,850 MT. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, total kharif Urad production is estimated at 18.4 lakh tonne, down by 5%, from 19.4 in 2021-22. AgriWatch expects Urad production during 2022-23 season would at 21.12 lakh tonne lower from 22.91 lakh tonne.

Outlook for the week: Prices may trade steady to slightly weak during the week.

Following graph illustrates Urad price movement in different markets:

Urad Prices per Quintal

Green Gram (Moong):

Market Recap:

Moong cash market mixed during the week under review. It traded at INR 7,100 per quintal, up by 2.90% from 6,900 per quintal in Jaipur and at INR 7,800 per quintal, steady at previous level in Jalgaon. Despite the start of new season and end of harvesting in almost all the key growing states, arrival pressure is still low because farmers are holding back their produce as they wanted to sell their produce at MSP (Rs 7755/Qtl.) to Govt. The crop size and quality has been affected due to excess and continuous rains observed even after harvesting period. In the wake of nod for procurement of Kharif Moong at MSP of INR 7,755 per quintal under the PSS in Karnataka, Tamil Nadu, UP, Telangana, Chhattisgarh and Haryana market prices may improve slightly from current levels. NAFED has already commenced its procurement in Karnataka. Now, with this new development, Moong prices are likely to move up marginally in coming days but, comfortable supply would keep prices in check. Plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major jump. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Moong production during 2022-23 is estimated at 17.5 lakh tonne, up by 18% from 14.8 lakh tonne in 2021-22.

Outlook for the week: Buying on MSP may support the prices for short while. Following graph illustrates Pea price movement in different markets:

Moong Prices per Quintal
