Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Among the major Pulses growing states like Maharashtra, UP, Rajasthan and Madhya Pradesh, only Karnataka remains the exceptional where rains are still being observed, that to, in heavy volume. Tur crop is mainly in vegetative to flowering stage in the state. The crop is already under stress due to continuous and excess rainfall during the August-September. Tur crop has reportedly turned yellow in some areas and failed to attain height. As per traders, due to continuous rainfall, crop production is expected to fall by 15-20% this year and loss percent may increase if the intensity of rains remain high in October too.

Moreover, Rabi sowing this year is likely to get delayed by 10 to 15 days due to the continuous and prolonged rainfall and late withdrawal of monsoon. Continuous rainfall has not only affected the Moong, Urad and Tur quality but also the crop size. Among the Kharif pulses, Urad remains the major commodity which affected majorly in both the aspects.

Further, as per IMD's forecast, a low-pressure area likely to get formed over Bay-of-Bengal from Oct. 17th onwards and may turn into Cyclone/Super Cyclone. As of now it is expected to make landfall over Odisha (Puri) and move upwards towards eastern MP and UP. It would also bring heavy to very rains over some parts Chhattisgarh, West-Bengal and Jharkhand. This would cause delay in Rabi sowing also affect the quality of the Kharif pulses (moisture will increase) as well as affect the supplies.

According to the recent release by Department of Agriculture & Farmers Welfare, farmers have covered 1.00 lakh ha area under Chana, up by manifold from 0.014 lakh ha same time last year as on 14th October, 2022. Till date, Rajasthan is the only state where Chana sowing has started with significant increase in area amid good soil moisture condition due to good rainfall activity this season and late withdrawal of SW Monsoon. However, Rabi Pulses sowing in other major Pulses growing states like MP, Maharashtra, Karnataka, UP, AP etc. are yet to start.

As per sources, National Cooperative Consumers' Federation (NCCF) is likely to provide some relaxation in its Standard Quality Specification for Tur. NCCF till now, accepts Tur with only 12% moisture (African origin) and 14% (Burma origin) while moisture content for both the countries usually remains above these levels.

Tur traded mostly firm except in Gulbarga where prices eased by 2.44% at INR 8,000 per quintal during the week. Tur traded at INR 7,450 per quintal, up by 1.36% in Mumbai and at INR 7,700 per quintal, up by 2.67% in Latur. In Karnataka, good rains are still being observed with expectation of more rains in coming days too after heavy to excess rainfall activity in September. Tur crop is mainly in vegetative to flowering stage in the key growing states. Tur crop is already under stress following continuous rainfall. Tur prices are expected to trade firm in coming days reportedly due to some issues in Tur vessel loading in Mozambique. On the other hand, demand for processed Tur (Dall) from retailers/ wholesalers is reportedly slow and consequently the demand for raw Tur is subdued from millers/processors. Traders mostly trying to sell/dispose their high-priced old stocks before entering into fresh deals as major part of their capital is chocked which is affecting their buying or demand. International quotes for Lemon Tur remain high at \$925 per MT basis at Indian port from \$915 last week for Burmese origin. While African quotes ranges from \$700- \$930 per MT as per quality and origin. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Tur production is estimated at 38.9 lakh tonne, down by 10% compared to 43.4 lakh tonne in 2021-22. AgriWatch's 2nd forecast for the season is at 32.10 LMT.

Urad traded firm by 0.50 to 1%, on an average during the week under review. It traded up by 0.36% at INR 7,050 per quintal in Chennai and at INR 7,400 per quintal, up by 0.68% in Delhi. New Urad crop arrivals in major markets of MP and Rajasthan have decreased by around 1/3rd in comparison to same time last year. Also, crop quality is not up to the mark as of now and only inferior quality crop arrivals are seen majorly. As per traders, around 30-40% arrivals are of inferior (having yellowish look or daagi) quality out of total arrivals and around 70% volume of total arrivals are being purchased by Rajasthan and Gujarat states alone. Apart from it, good demand is

continued from MP, UP, Karnataka, Tamil Nadu etc. which is supporting the sentiments. On the given background, market prices may trade steady with firm sentiments as demand is reportedly good from all over India as of now. Myanmar C&F quotes increased to \$860 for FAQ from \$840 per MT and SQ variety quoted at \$997 per MT from \$980 per MT basis Indian ports. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, total kharif Urad production is estimated at 18.4 lakh tonne, down by 5%, from 19.4 in 2021-22. AgriWatch expects Kharif Urad production during 2022-23 season would at 12.87 LMT.

Moong cash market traded up by 1 to 3%, on an average, during the week under review. It traded at INR 7,300 per quintal, up by 2.82% from 7,100 per quintal in Jaipur and at INR 7,900 per quintal, up by 1.28%, in Jalgaon. The crop size and quality has been affected due to excess and continuous rains observed even after harvesting period. Buying interest from millers in southern and northern India is reportedly good which is supporting the sentiment amidst Mogar quality produce arrivals in various markets of Rajasthan. Meanwhile, Moong buying at MSP in various states has provided support to the prices despite the fact that there are sufficient stocks in Central Pool as well as continuous supply from summer crop and now from Kharif crop would keep easy availability. Moong prices are likely to trade steady to range bound in coming days however, comfortable supply would keep prices in check/restrict any major upside. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Moong production during 2022-23 is estimated at 17.5 lakh tonne, up by 18% from 14.8 lakh tonne in 2021-22. AgriWatch expects Kharif Moong production during 2022-23 season would at 13.99 LMT.

Chana cash markets too traded up during the week under review on revived festival demand and expectation of seed demand for sowing purposes. Rabi Chana sowing has started in Rajasthan at present. However, its sowing (as per sources) is expected to reduce by 7 to 10% this year as farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices due to lower realization to farmers in Chana throughout the season. On other hand, NAFED's regular selling is restricting any major upside in prices. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Lentil cash market traded firm during the week under review on revived demand from millers and reports of Canadian traders are not ready to sell their stocks at lower price level amid good demand from Indian importers. Lentil traded at INR 6,800 per quintal, up by 3.82% from INR 6,550 per quintal in Kanpur and at INR 6,300 per quintal, up by 3.28% from INR 6,100 per quintal in Raipur. Canadian Lentil quotes are not coming down from \$790 per MT C&F basis Indian port. Apart from it, coming festival season domestic demand has also improved supporting the sentiments. Disparity of INR 100-200 per quintal at the current prices for import would remain supportive to cash market. Also, there are reports that Lentil is being used for mixing with Tur. Lentil sowing coverage is expected to increase by 5 to 7% this year as it has been remained fruitful for farmers throughout the season. India has imported around 1,16,000 tonne Lentil (estimated) during August. On the other hand, Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 9.24 lakh tonne Lentil during the year 2022-23.

International News:

According to the latest report published by Canadian Grain Commission (CGC), Canada exported 4,700 MT Lentil during September 26 to October 2, 2022. Accumulative Lentil export recorded at 2,85,300 MT during the season to date, up by 39% from 2,05,300 MT during the period previous season.

Australia Bureau of Statistics' recent data suggests that Australia exported 37,003 MT Chickpea during the August, slightly down by 4% from 38,677 in July. Accumulative export during the Marketing Year recorded at 4,82,307 MT, down by around 36% from 7,57,726 MT same period during previous MY. Pakistan emerged as major buyer with buying 29,172 MT following Nepal (2,605 MT) & Canada (1,651 MT).

Australia Bureau of Statistics' recent data suggests that Australia exported 64,405 MT Lentil during the August, down by 38% from 103,205 in July. Thus, accumulative export during the Marketing Year recorded at 8,28,287 MT which is up by 5% from same period during previous MY. India emerged as major buyer with buying 24,970 MT followed by Sri Lanka (13,869 MT) and Bangladesh (10,507 MT).

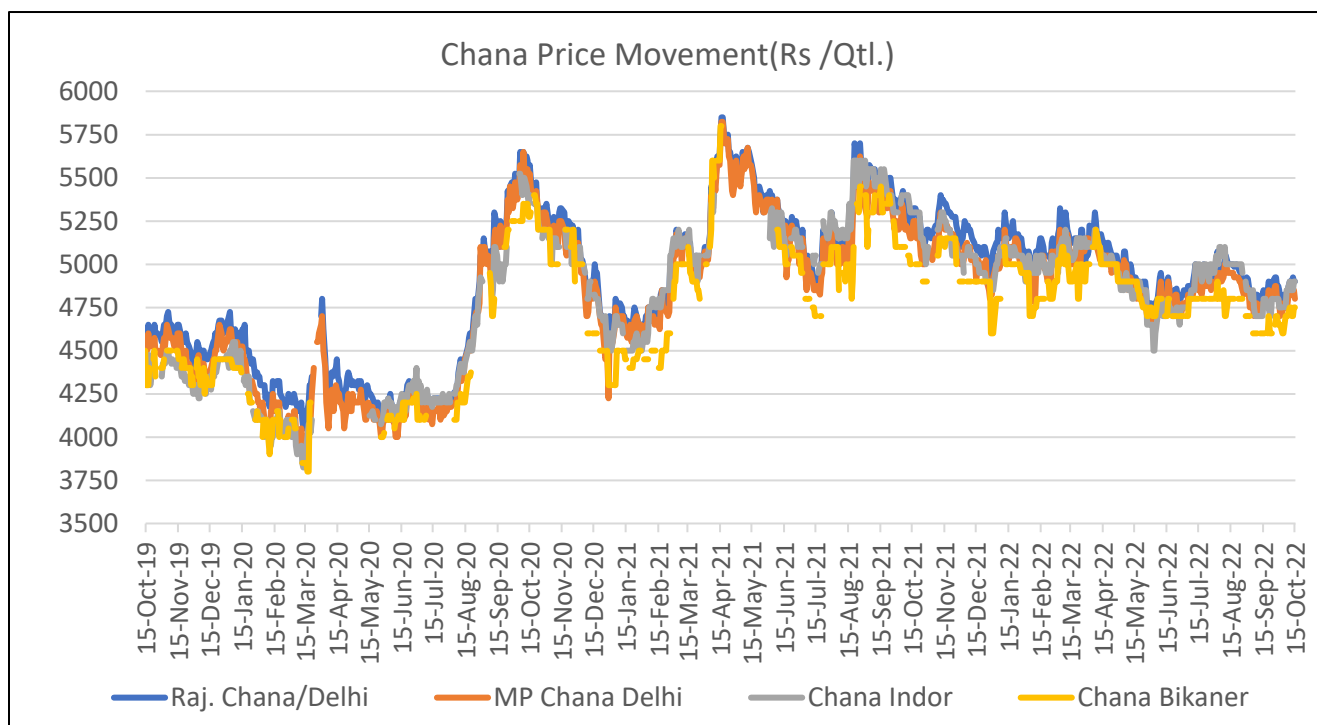

Weekly Outlook: - Pulses prices may trade steady to firm this week due to revived demand for festival season.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash markets too traded up during the week under review on revived festival demand and expectation of seed demand for sowing purposes. Rabi Chana sowing has started in Rajasthan at present. However, its sowing (as per sources) is expected to reduce by 7 to 10% this year as farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices due to lower realization to farmers in Chana throughout the season. On other hand, NAFED's regular selling is restricting any major upside in prices. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Outlook for the week: Chana may trade range bound with minor fluctuation.

Following graph illustrates Chana price movement in different markets:

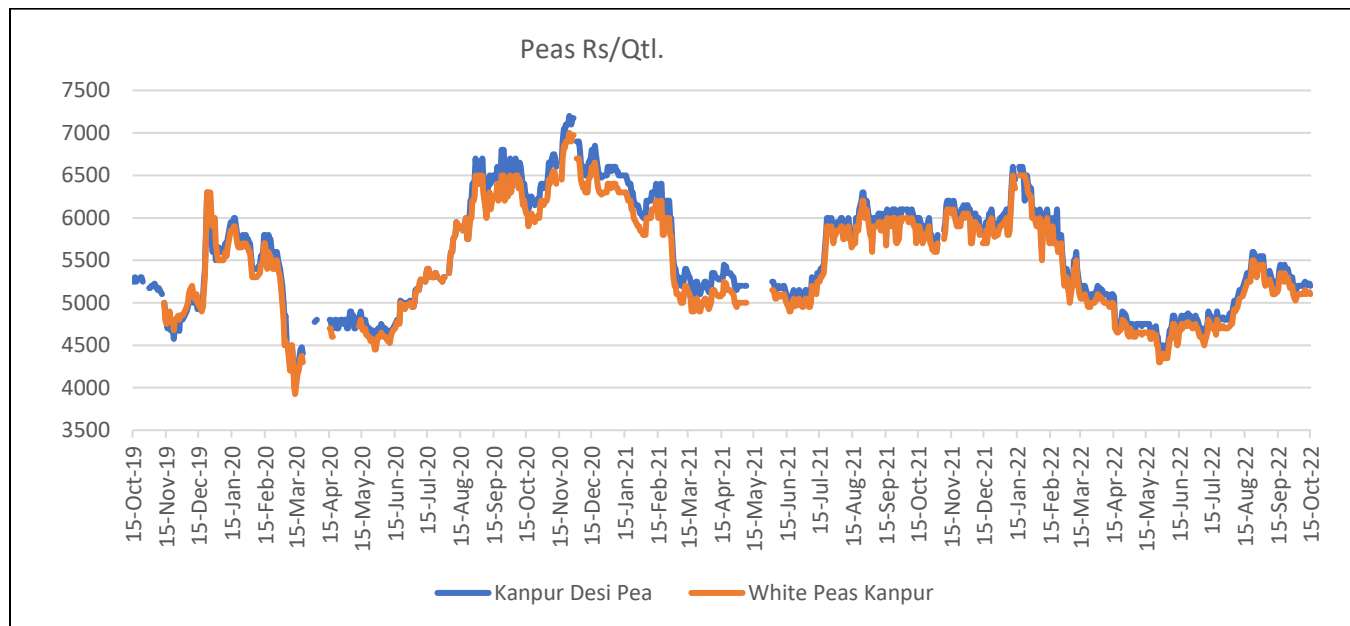

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	15.10.22	08.10.22	15.10.22	13.10.21	08.10.22
Delhi Chana(Raj)	4900	4850	4850	5250	1.03
Bikaner Chana	4700	4650	4600	5100	1.08
Indore Chana	4900	4850	4800	5300	1.03
Tan.Chana	4450	4350	4450	4950	2.30
Price Projection For Bikaner During October-2022 (4500-5100)					

Peas (Matar):
Current Scenario:

Peas physical market prices traded steady during the week under review due to continuous selling of Chana by NAFED at lower levels couple with poor buying interest from stockists and millers. Desi Peas and White Peas prices traded at previous levels of INR 5,200 per quintal and INR 5,100 per quintal respectively. Market prices are likely to trade steady to range bound.

Outlook for the week: Pea market may trade in a range this week too.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	15.10.22	08.10.22	15.10.22	13.10.21	08.10.22

Kanpur White Peas	5100	5100	5150	5700	0.00

Price Projection For Kanpur Desi During October-2022 (4900-5400)

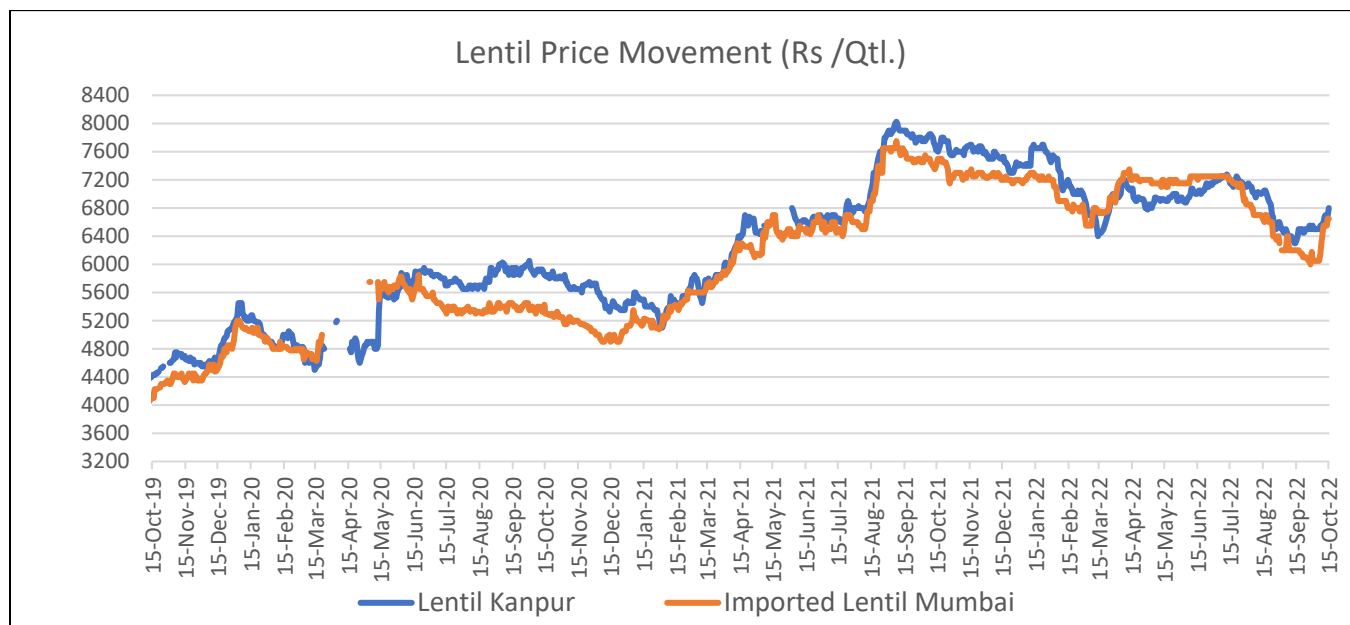

Lentils (Masoor):
Market Recap:

Lentil cash market traded firm during the week under review on revived demand from millers and reports of Canadian traders are not ready to sell their stocks at lower price level amid good demand from Indian importers. Lentil traded at INR 6,800 per quintal, up by 3.82% from INR 6,550 per quintal in Kanpur and at INR 6,300 per quintal, up by 3.28% from INR 6,100 per quintal in Raipur. Canadian Lentil quotes are not coming down from \$790 per MT C&F basis Indian port. Apart from it, coming festival season domestic demand has also improved supporting the sentiments. Disparity of INR 100-200 per quintal at the current prices for import would remain

supportive to cash market. Also, there are reports that Lentil is being used for mixing with Tur. Lentil sowing coverage is expected to increase by 5 to 7% this year as it has been remained fruitful for farmers throughout the season. India has imported around 1,16,000 tonne Lentil (estimated) during August. On the other hand, Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 9.24 lakh tonne Lentil during the year 2022-23.

Market Outlook: Prices are likely to move up by INR 10-200per quintal.

Following graph illustrates Lentil price movement in different markets:
