Pulses Sector- Domestic Highlights:

Most of the markets remained closed due to auspicious festival of Diwali. Market will back on track again from next week.

The Cabinet Committee on Economic Affairs has approved the hike in Minimum Support Price (MSP) for all mandated Rabi crops for Marketing Season 2023-24. MSP for Lentil increased by INR 500 to INR 6,000 per quintal from Rs 5,500 per quintal and for Chana, MSP hiked by INR 105 to INR 5,335 per quintal from INR 5,230 per quintal.

Despite the increase in MSP for Chana, its sowing area is expected to reduce by 10 to 15% this year as farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices due to lower realization to farmers in Chana throughout the season. However, Masur area is likely to increase by 8 to 10% this year as Masur prices remained up from its MSP throughout the season and farmers have realized good returns. Masur sowing area is likely to increase in MP and UP.

According to the recent release by Department of Agriculture & Farmers Welfare, farmers have covered 4.628 lakh ha area under Rabi pulses as on 21st October, 2022, up by 74.64% from 2.65 lakh ha. same time last year. Under the pulses, Chana has been sown in 3.97 lakh ha, up by 86.42% from 2.13 lakh ha, Lentil in 0.04 lakh ha, up by 32.26% from 0.03 lakh ha, Peas in 0.037 lakh ha, up by 8.82% from 0.034, Urad in 0.13 lakh ha, up by 87.14% from 0.07 lakh ha, Moong in 0.02 lakh ha, up by 42.86% from 0.014, same time last year.

Meanwhile, extended rainfall activity on formation of lows and cyclone in BOB along with late withdrawal of SW Monsoon need to be watched closely as widespread and prolonged rainfall may have some bearing on sowing as well as crop size.

Recently, Department of Consumers' Affairs, Govt. of India has fixed the base price for purchase of imported Tur at INR 79.53 per kg for Myanmar origin Tur Whole and INR 59.80 per kg for African Origin. Myanmar origin Tur prices are likely to find some support considering the decision while African Tur prices are likely to remain same / unimpacted due to this.

New Urad crop arrivals reportedly are lower by around 50-60% than last year in all the major cash markets. Out of which about 70-80% new arrivals are of inferior quality which is mostly consumed by "Papad" manufacturing units in Gujarat and Rajasthan while remaining good quality produce is consumed quickly by local trader, millers / processors and demand is continue to be good for quality produce.

Tur mostly traded down except in Indore where prices traded at INR 8,100 per quintal, up by 3.85% during the week. Tur traded at INR 7,450 per quintal, down by 1.32% in Mumbai and at INR 7,600 per quintal, down by 1.30% in Latur. Market prices were down despite the fact that import parity is higher, lower crop estimate and continuing unseasonal rains would remain supportive for prices. Recently, Department of Consumers' Affairs, Govt. of India has fixed the base price for purchase of imported Tur at INR 79.53 per kg for Myanmar origin Tur Whole and INR 59.80 per kg for African Origin. Myanmar origin Tur prices are likely to find some support considering the decision while African Tur prices are likely to remain same / unimpacted due to this. Given the higher set base import prices by govt. would provide support to the domestic prices. Consequently, the domestic prices would also get support from the same. Meanwhile, Karnataka and Maharashtra are still witnessing rainfall activity and few districts like Latur in Maharashtra has received continuous very heavy rainfall on Oct. 20th which is expected to have a negative bearing on standing Tur crop which is into flowering stage now. Already the production estimate is on lower side, any impact on yield would further lower the production numbers. International quotes for Lemon Tur remain down at \$910 per MT basis at Indian port from \$930 last week for Burmese origin. While African quotes ranges from \$690- \$915 per MT as per quality and origin. According to the 1st Advance Estimates of production of major

Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Tur production is estimated at 38.9 lakh tonne, down by 10% compared to 43.4 lakh tonne in 2021-22. AgriWatch's 2nd forecast for the season is at 32.10 LMT.

Urad prices traded mixed during the week under review as prices were under correction mood. Urad FAQ prices moved up by 1.37% to INR 7,400 per quintal in Delhi while it traded down at INR 7,025 per quintal in Chennai and at INR 7,125 per quintal in Mumbai. At present, new Urad crop arrivals reportedly are lower by around 50-60% than last year in all the major cash markets. Out of which about 70-80% new arrivals are of inferior quality which is mostly consumed by "Papad" manufacturing units in Gujarat and Rajasthan while remaining good quality produce is consumed quickly by local trader, millers / processors and demand is continue to be good for quality produce. Reportedly, demand from Karnataka, UP, MP, Delhi and other states are good which is supporting the sentiments. As per sources, rains over some parts of UP mainly Chandausi line during the week have reportedly affected the crop however, the extent of damage is yet to be known. Sources, mention that the damage is to the tune of 10%. Crop is at vegetative stage and would start to come from December onwards. On the given background, market prices may remain firm as demand is reportedly good from all over India as of now. Prices may move up by INR 200-300 per quintal from current levels. Myanmar C&F quotes decreased to \$845 for FAQ from \$850 per MT and SQ variety quoted at \$985 per MT from \$990 per MT basis Indian ports.

Moong cash market too traded mixed during the week under review. It traded at INR 7,200 per quintal, up by 1.41% from 7,100 per quintal in Jaipur and at INR 7,600 per quintal, down by 1.30%, in Jalgaon. Buying interest from millers in southern and northern India is reportedly subdued at present amidst mostly **mogar** quality arrivals in various markets of Rajasthan. Moong buying at MSP in various states is not letting the prices going down and prices are likely to trade range bound till the buying at MSP is on. Otherwise, sufficient stocks in Central Pool and new arrivals from Kharif crop would keep easy availability. Comfortable supply would keep prices in check/restrict any major upside.

Chana cash markets traded steady to firm during the week under review on revived festival demand and expectation of seed demand for sowing purposes. Rabi Chana sowing has started in Rajasthan at present. However, its sowing (as per sources) is expected to reduce by 10 to 15% this year as farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices due to lower realization to farmers in Chana throughout the season. On other hand, NAFED's regular selling is restricting any major upside in prices. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Lentil cash market traded firm during the week under review on festival season good demand couple with stockists and miller buying interest for making daal from all over Indian is supporting the sentiment at present. Lentil traded at INR 6,950 per quintal, up by 3.73% from INR 6,700 per quintal in Kanpur and at INR 6,300 per quintal, up by 3.28% from INR 6,100 per quintal in Ashoknagar. Market prices are likely to remain up this week too on buying support. Lentil sowing coverage is expected to increase by 5 to 7% this year as it has been remained fruitful for farmers throughout the season. India has imported around 43,872 tonne Lentil (tentative figure) during September. Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 9.24 lakh tonne Lentil during the year 2022-23.

International News:

However, its sowing (as per sources) is expected to reduce by 10 to 15% this year as farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices due to lower realization to farmers in Chana throughout the season. On other hand, NAFED's regular selling is restricting any major upside in prices. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Peas (Matar):

Current Scenario:

Peas physical market prices traded down during the week under review due to continuous selling of Chana by NAFED at lower levels couple with poor buying interest from stockists and millers. Peas traded down by 1 to 1.50% down, on an average, due to selling of Chana at cheaper prices which is competitive to the Peas. Selling of Chana is making Peas distractive owing to higher prices than Chana. Desi Peas and White Peas prices traded at INR 5,150 per quintal, down by 1.44% and INR 5,050 per quintal, down by 1.46% from INR 5,125 per quintal respectively. Given the background, market prices are likely to trade steady to range bound.
