Pulses Sector- Domestic Highlights:

As per media reports, NAFED had procured about 11,158 tonnes of Green gram so far in Karnataka in the ongoing Kharif marketing season. Currently Moong prices are ruling below the set MSP of Rs. 7,755 per quintal in major markets of the country.

As per IMD, rainfall is expected over Tamil Nadu till 11th November and rainfall is continuing from last week. This may affect Rabi Urad sowing as well as may cause damage to the sown crop in growing regions. However, so far there are no such report received from the state.

Mozambique shipment issue has been resolved completely now and loading activity will be smoothened now onwards. In a legal hearing at Judicial Court of Nampula, Republic of Mozambique, the case filed by Royal group Vs ETG and Others, the judgement was given in favour of ETG and others.

The Mozambique issue is almost resolved, meanwhile, the issue surfaced its head due to FATF's action due to which Banks denied outward remittance to Myanmar, Mozambique and Tanzania, However, banks are taking little more time in remittance amid verification of documents etc. as reported by the sources.

Further, due to significant increase in MSP of Lentils by INR 500 per Qtl from last year and prevailing higher market prices, motivating farmers to bring more acres under Lentil cultivation this Rabi. Besides, imports are also expected to be higher this season amid higher global supply which would keep a check on Masur prices domestically and may restrict any sudden rise. As per sources, Pakistan is continuously buying Masur from Canada which is supporting the prices at the origin (Canada).

On other hand, prevailing lower chana prices throughout the year along with comparative lower increase in MSP would force farmers to switch to other lucrative crops this Rabi. It is very likely that during the current Rabi season, Chana area may be diverted to Lentil, Wheat and Mustard majorly with slight diversion towards Spices (Coriander and Cumin). Chana sowing is expected to reduce this year by almost 10-15% while Masur coverage is expected to increase by 10-12% this year as farmers have benefited by higher Masur prices throughout the year.

On Rabi sowing front, according to the recent release by Department of Agriculture & Farmers Welfare, farmers have covered 29.06 lakh ha area under Rabi pulses as on 04th November, 2022, up by 7.10% from same period last year. Under the pulses, Chana has been sown on 22.08 lakh ha, up by 11.13% from corresponding period last year, Lentil sown in 2.04 lakh ha, down by 11.56%, Peas in 1.98 lakh ha, up by 0.88% from 1.96, Urad in 0.92 lakh ha, up by 6.31% and Moong is sown in 0.07 lakh ha, down by 26.02% from 0.09, same time last year.

International News:

According to most recent numbers from Statistics Canada, the current marketing year maintained a stronger tone in exporting red lentils. 210,785 metric tonnes (MT) in total were exported during September, an increase of 268% over the 57,214 MT exported during the previous month (August). The overall amount of export sales, upto date is 267,999 MT, up from 247,499 in the prior marketing year. It exported 43,325 MT of Red Lentils to India.

According to data from the Australia Bureau of Statistics, Exports increased from 62,309 metric tonnes (MT) the previous month to a total of 67,800 MT during September. This increased exports throughout the marketing year, upto date to 893,990, up 9% from the previous year. With 20,155 MT, Bangladesh was the month's biggest consumer. United Arab Emirates ranked second with 13,488 MT, followed by India in second place with 16,367 MT.

According to recent data from Statistics Canada, at this stage in the current marketing year, shipments of yellow peas from Canada have performed better than they did in September of the previous year. 421,476 metric tonnes (MT) in total were exported throughout September, an increase of 1% over the 28,341 MT exported during the same period last year. Movement has totaled 449,818 MT so far, which is less than the 494,459 MT of the previous marketing year.

According to figures from the Australia Bureau of Statistics, the movement of chickpeas in Australia during September increased dramatically compared to the previous month. Export sales increased from 33,220 metric tonnes (MT) in the preceding month to a total of 71,469 MT during the month. Shipments have increased this marketing year to 549,860, up from 34% last year.

Weekly Outlook: - Pulses prices may trade steady to slightly down except Moong this week.

Pulses-Wise Scenario:

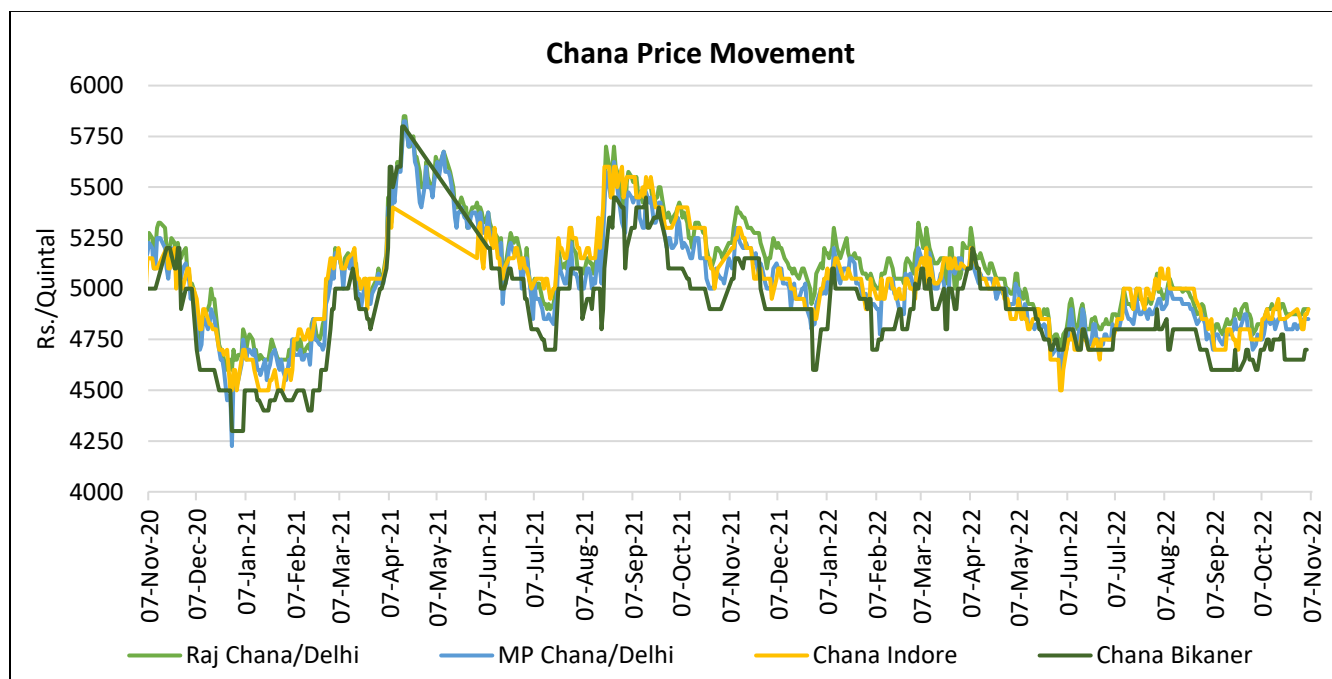

Chana

Current Scenario:

Chana cash markets traded almost steady during the week under review. Chana at Indore traded at INR 4,900 per quintal last week. With the continuous selling of Chana at lower prices by NAFED, Chana prices are likely to trade in a range and prices may fluctuate in the range of INR 100-200 per quintal due to easy availability at lower prices. At present, demand for sowing may be only a factor that may keep supporting the sentiment besides the substitution demand (reportedly HORECA industry is substituting Chana from Tur, however, the percentage is appx. 10-12% only). Otherwise, fundamentals are weak on plenty of stocks available at cheaper rates. Rabi Chana sowing has started, however, as per sources, it is expected to remain less by 10 to 15% this year as farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices due to lower realization for Chana to farmers throughout the season. As per Ministry of Agriculture, Chana has sown on 22.08 lakh ha as compared to 19.87 lakh ha, up by almost 11%.

Outlook for the week: Chana prices may fluctuate in the range of INR 100-200 per quintal.

Peas (Matar):
Current Scenario:

Peas physical market prices traded slightly down during week under review on renewed demand. Desi Peas and White Peas prices traded at INR 5,025 per quintal, slightly up by 2.43% and INR 4,950 per quintal, down by 1.98% from INR 5,038 per quintal respectively. Given the background, market prices are likely to trade steady to range bound.

Outlook for the week: Pea market may trade steady to slightly down this week too.

Lentils (Masoor):

Market Recap:

Lentil cash market mostly traded weak except Indore where it traded up by 2.6% to INR 6,467 per quintal from INR 6,300 per quintal. On the other hand, it traded down by 0.37% to INR 6,800 per quintal in Kanpur. Market prices are likely to remain steady now as an extra demand for the festive season is almost over now. Only routine demand is reported from consuming centres at present. Lentil sowing coverage is expected to increase by 5 to 7% this year as the farmers continue to get remunerative prices throughout the season. Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year against 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 9.24 lakh tonne Lentil during the year 2022-23.

Market Outlook: Market prices are likely to remain steady to range bound this week.

Pigeon Pea (Tur/Toor):
Market Recap:

Tur traded steady to slightly down in various markets in the country during the week under review. It traded unchanged at INR 7,700 per quintal in Latur and at INR 7,600 per quintal in Indore and it traded at INR 8,100 per quintal in Gulbarga market. However, Tur lemon at Mumbai has seen slight decline by 2% as compared to previous week and traded at INR 7,433 per quintal from INR 7,575 per quintal. At present, Tur is at flowering to pod formation / development stages in Karnataka and no major threat is seen currently under the prevailing weather condition. Around 10 to 15% loss has already been reported due to bad weather conditions during July to October. Crop condition in Maharashtra is average to normal despite an early loss due to flooding and excess rains in July-Oct. Overall, given the mismatch in supply-demand amid lower crop estimate and higher import parity may continue to lend support the inner tone and prices may move up by INR 400-500 per quintal in the medium term while a range bound movement might be seen during the coming week.

Outlook for the week: Range bound movement might be seen during the coming week in Tur.

Following graph illustrates Tur price movement in different markets:

Black Matpe (Urad):

Market Recap:

Urad prices traded steady to slightly down during the week. Urad FAQ traded steady at INR 7,100 per quintal at Mumbai. Similarly, in Chennai, Urad SQ has traded down by 2% from INR 8,138 to INR 7,985 per quintal. At present, demand for superior as well as inferior quality Urad is very good in all major mandis of the country. With the start of normal activities after a weeklong holiday, Urad arrivals have reportedly increased in bench mark market Lalitpur. However, arrival pressure is still lower from same time last year. Daily arrivals are 40 to 50 % lower right now against the normal of 20,000-22,000 Qtl. to 8,000-10,000 qtl. Out of the total supply, around 40-50% quantity is reportedly of inferior quality. Almost in the entire Urad markets arrivals are very less whereas demand is reportedly good which may support the prices moving ahead. The new crop arrivals are further expected to reduce in coming days which would also support the prices. Prices may move up by INR 200-300 per quintal from current levels. Myanmar C&F quotes increased to \$840 for FAQ from \$830 per MT and SQ variety quoted at \$975 per MT from \$970 per MT, basis Indian ports.

Outlook for the week: Prices may move up by INR 200-300 per quintal from current levels.

Green Gram (Moong):

Market Recap:

Moong cash market traded firm during the week mainly due to the ongoing procurement drive in various states. Moong prices may touch MSP level but further increase in prices will be restricted due to sufficient supply side. At Jaipur, Moong prices moved up by 4.6% from the level of INR 7,200 per quintal to INR 7,533 per quintal during the week under review. Moong at Jalgaon has also seen an increase of 1.9% and traded at level of INR 7,860 per quintal from INR 7,716 per quintal. However, Moong prices were steady in Indore market at INR 7,200 per quintal. Moong buying at MSP in various states is not letting the prices to go down and are likely to trade range bound with slightly firm bias till the buying on MSP continues. As per Ministry of Agriculture, Rabi Moong has been sown on 0.07 lakh ha as compared to 0.09 lakh ha, lower by 26% as on 04th November 2022.

Outlook for the week: Moong prices are likely to trade range bound with slightly firm bias.
