Pulses Sector- Domestic Highlights:

According to **IMD**, weather is likely to be clear and dry across all major Rabi Pulses grown areas in India except Rajasthan where scattered rainfall is predicted on 1st March. It is major Chana producing state which has recorded 5% more acreage under sowing to 21.43 lakh ha. this year and the crop is in maturity to harvesting stage and could affect the yields of the same. However, there has been no threat to the lentil and peas crop which is mainly in central India and temp. as of now is conducive for the crops.

The rising temperature, is also posing a threat to summer crops mainly Moong and partly Urad as the residual soil moisture will deplete fast which would lead to lower sown area where irrigation is unavailable.

Meanwhile, **new Chana and Masur** crop arrivals have started in some places of MP and UP but in small quantities and is expected to increase post Holi festival.

Moreover, an alarm regarding ill effect of **El Nino** is being raised in India which may, if happens, have potential to have bearings on Indian crop production in Kharif season including Urad, Moong & Tur. Now, IMD has cleared that El Niño would be at the “neutral level” during next three months and its real impact on the southwest monsoon could only be assessed by April.

As per trade sources, total 55,225 MT imported Pulses including Tur, Urad have arrived at **Chennai** port during 1 to 20th February, 2023. Amongst which 31,400 MT is Tur, 23,825 MT Urad.

Meanwhile, Rabi Chana crop **procurement drive** for 2023 is set to start soon and various State Govts. have set target for procurement. Registration process would start from 27th February in Maharashtra while registration timeline has been extended upto 15th March for Chana and Masur procurement on MSP.

International News

According to the Agriculture and Agri-Food Canada's (AAFC) February Outlook for the 2022-2023 crop year, Dry Peas production in the country is expected to decrease by 5% to 3.3 million tonnes during 2023-24 due to predicted decrease in seeding area as farmers are expected to attract towards other crop on better return. However, export volume during 2022-23 is likely to increase to 2.5 million tonnes on increased exports to Bangladesh.

According to the Agriculture and Agri-Food Canada's (AAFC) February Outlook for the 2022-2023 crop year, Lentil production in Canada during 2023-24 is estimated to increase by 15% to 2.65 million tonnes from 2.3 million tonnes despite the expected fall in seeded area to 1.73 million ha. due to lower return compared to other crops. However, export is expected to increase to 2.3 million tonnes in 2022-23 due to strong demand from India and Turkey.

Weekly Outlook: - Pulses likely to trade range bound except Tur and Urad which may increase by INR 200-300 per quintal during the week.

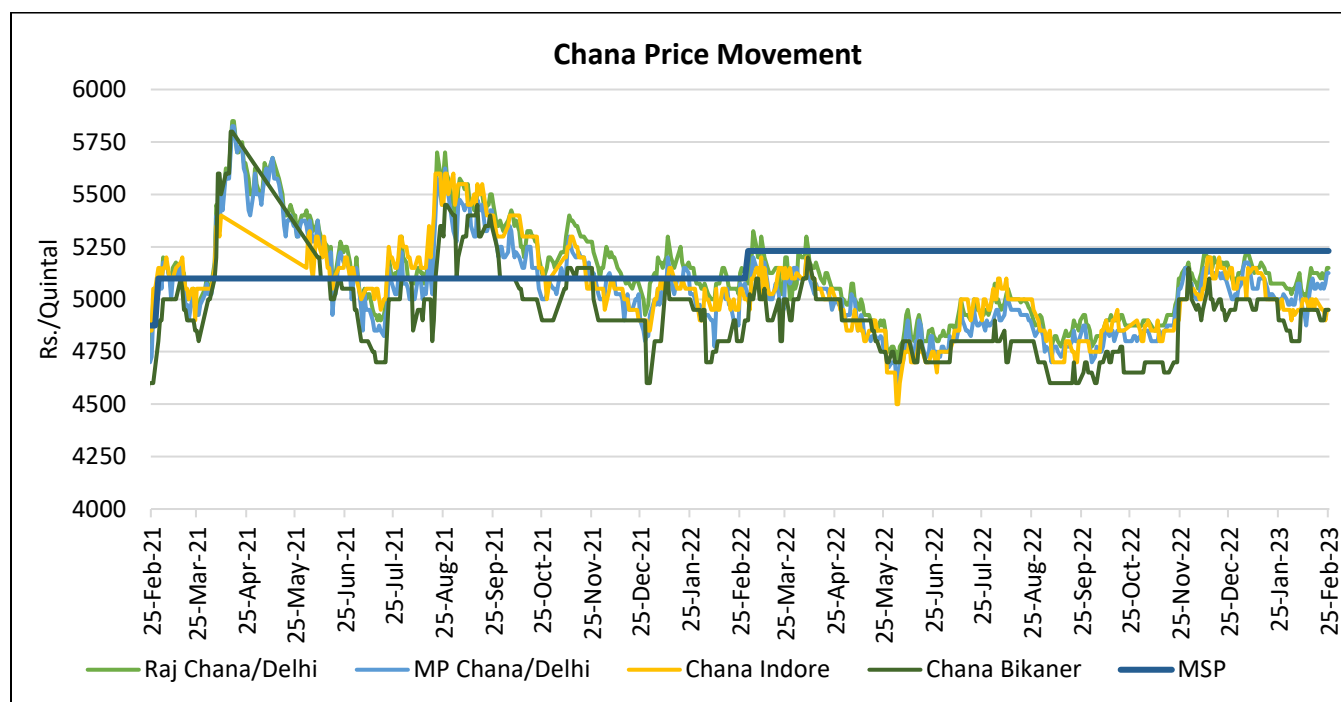

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana traded mixed in a range of + / - 1% during the week under review. In Delhi, Rajasthan origin Chana traded at INR 5150 per quintal, up by 0.49% while it traded down at INR 4950 per quintal in Indore. However, it remained unchanged at INR 4950 per quintal in Bikaner. New crop arrivals have started in some mandis of Rajasthan, MP and UP and expected to increase after Holi. Overall, the crop condition is reportedly good so far. Any sudden spike in prices not likely as of now considering hefty stock with NAFED (around 18-20 LMT) and around 10% jump in sowing area in Maharashtra along with gradually increase in new crop arrivals in North India. However, Chana prices may find support and increase towards MSP of INR 5335 per quintal as and when procurement drive starts. Chana prices likely to move in the range of +/- INR 100 per quintal.

Outlook for the week: Chana prices likely to move sideways and in the range of +/- INR 100 per quintal. Following graph illustrates Chana price movement in different markets:

Peas (Matar):

Current Scenario:

Peas physical market prices traded down by 7%, on an average during the week under review due to profit booking at higher levels. However, processed dal demand from millers and processors for upcoming festival and ongoing marriage season is reportedly satisfactory but, expected new crop arrivals from 1st week of March in UP as well MP amidst hefty inventory would continue to cap on any sudden spike in prices. However, prices may correct by INR 100-200 per quintal given these fundamentals. Desi Peas and White Peas prices in Kanpur traded down by 7% at INR 4,200 per quintal and at INR 4,100 per quintal respectively.

Outlook for the week: Pea prices may correct by INR 100-200 per quintal.

Lentils (Masoor):

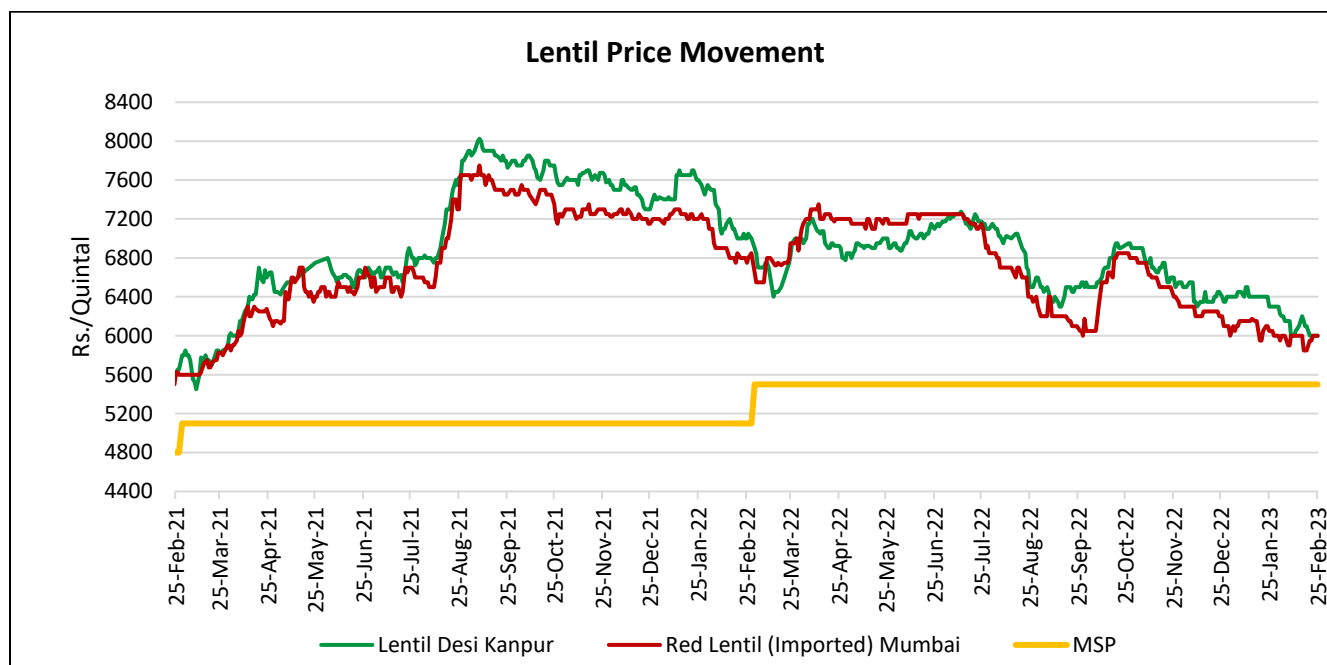

Market Recap:

Lentil prices traded mostly down by 2 to 6%, on an average during the week under review due to new crop arrivals in MP and UP coupled with easy and regular availability of influx from Canada (around 23 lakh tonnes production) and Australia (10.53 lakh tonnes production) at cheaper prices. At present, new local crop arrival is reportedly low which is bound to increase after Holi. Masur production in India is expected to increase this year due to higher

sowing area and conducive weather so far. Moreover, extended timeline for import till next year upto 31.03.2024 would continue to keep cap on any sudden hike in prices. So, prices are likely to trade in a range with slightly weak bias continue in coming week. It traded down by 1.64% at INR 6000 per quintal in Kanpur and by 6.78% at INR 5500 per quintal in Ashok Nagar, M.P.

Market Outlook: Lentil , prices are likely to trade in a range with slightly weak bias continue in coming week.

Pigeon Pea (Tur/Toor):

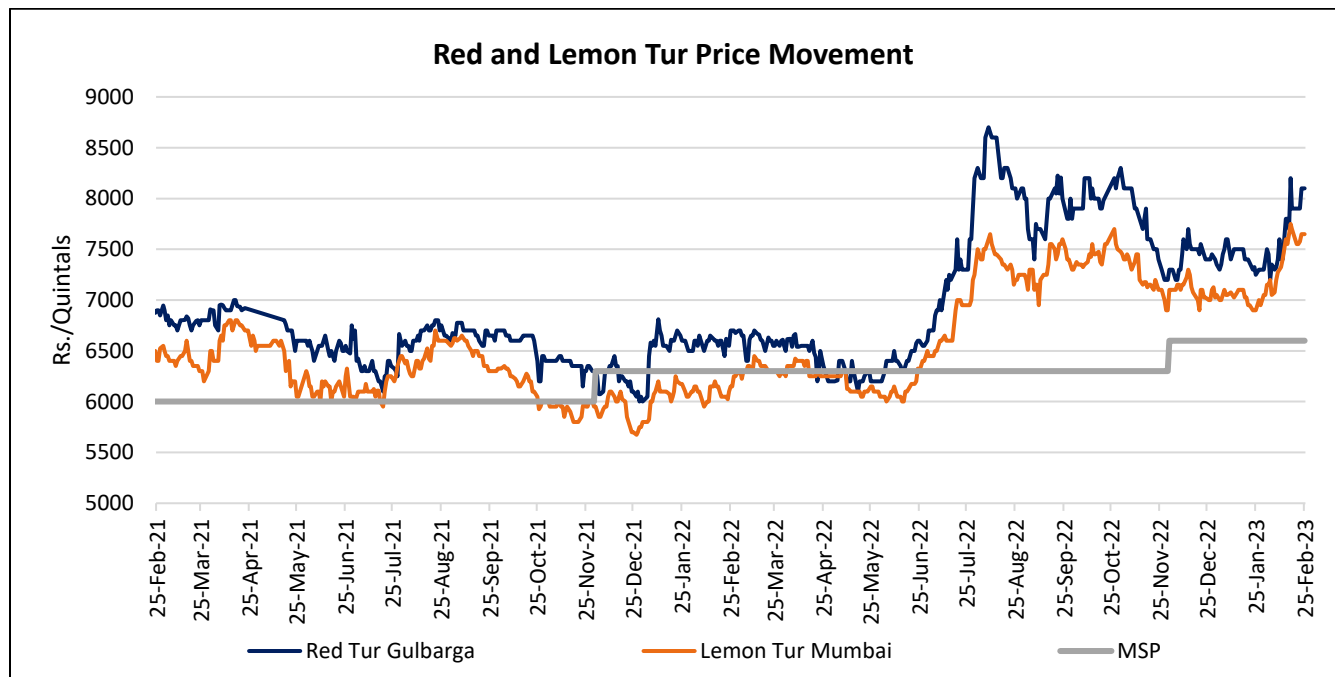

Market Recap:

Tur prices continued to trade firm except imported Lemon Tur which traded down by 0.65% to INR 7650 per quintal on profit booking. Gulbarga and Latur cash prices traded higher at INR 8100 per quintal, up by 2.53% and at INR 8200 per quintal, up by 5% due to higher import parity amidst lower local crop. Moreover, extended timeline for import till next year also supported the prices. Tur prices are likely to remain firm for coming week.

However, profit booking and expected Govt. intervention is capable to change the market direction Demand is reportedly good for processed Tur (Dall) amid ongoing marriage season and upcoming festivities which would restrict any major decline in prices. C&F offers for Lemon Tur decreased by \$2/MT to \$948 per MT from \$950 per MT last week.

Outlook for the week: Tur prices likely to remain firm for coming week.

Black Matpe (Urad):

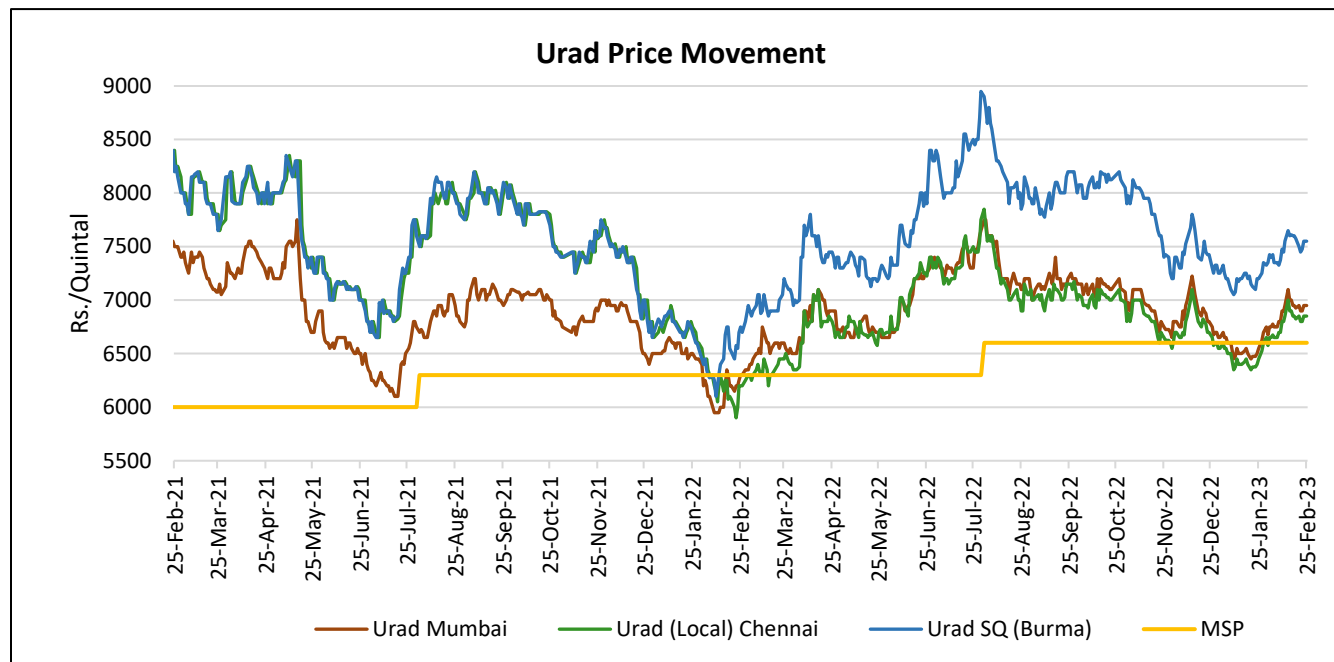

Market Recap:

Urad prices in key benchmark markets traded almost flat and only SQ variety noticed a fall of 0.66% and traded at INR 7550 per quintal in Chennai. However, Mumbai and Chennai FAQ quality physical prices remained unchanged at INR 6950 per quintal and INR 6850 per quintal respectively. Quotes for FAQ and SQ varieties decreased by \$15 for each to \$835 per MT and to \$935 per MT, basis Indian ports respectively. Urad prices are likely to remain supportive in the coming week due to lower inventory and stock holding tendency by Myanmar

traders in anticipation of higher demand from India, which are supporting the prices. Extended timeline for import till next year is also aiding the prices. New crop arrivals in Myanmar have already started, leading to higher supplies.

Outlook for the week: Urad prices are likely to remain supportive in the coming week

Green Gram (Moong):

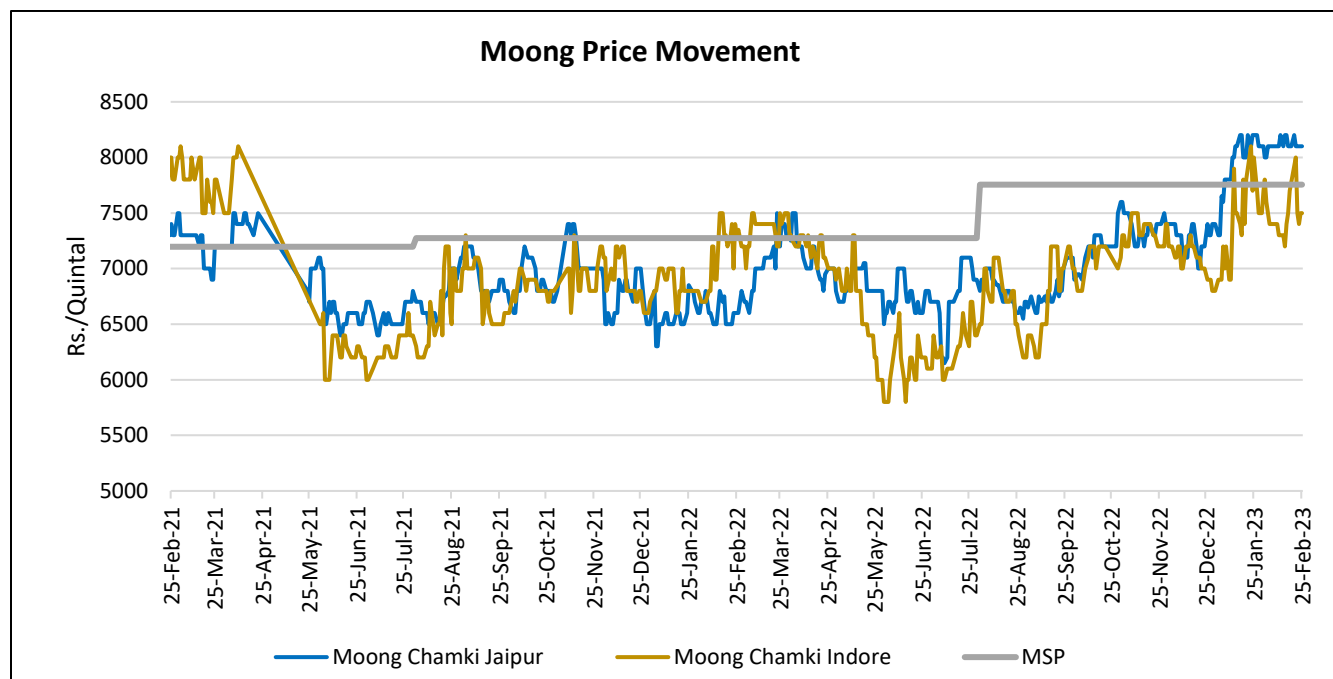

Market Recap:

Moong cash market prices traded bearish by 1 to 4%, on an average during the week under review due to selling by both, first farmers at higher levels and second NAFED to cap on rising prices. NAFED is carrying a sizable quantity of Moong (around 6 lakh tonnes). Moreover, there is talk in market that Govt. agencies in MP may start selling around 2 lakh tonnes Moong shortly. If this happens, market prices may fall slightly from current levels. However, scarcity of stocks in Rajasthan and Maharashtra is reportedly from last few days which is supporting the prices amidst ongoing festival and marriage season. FAQ Moong prices traded flat at INR 7700 per quintal in Jaipur while

it traded down by 1.25% at INR 7900 per quintal in Jalgaon. Moong prices likely to fall by INR 100-200 per quintal in coming days on expected selling by Govt. agencies.
