

### RED CHILLI

#### Fundamentals:

#### Today's Update:

- Mixed sentiment was reported in the Red Chilli spot markets on Monday.
- Cold-storage supply in the Khammam cash market with good demand led to an increase in prices which reported up by INR 2,500 per quintal.
- AgriWatch predicts that arrivals in the AP and Telangana market will increase after mid-June due to improved demand from China, Bangladesh, Malaysia, and Indonesia. Additionally, the demand from masala companies will further contribute to the rising arrivals. However, prices in the Karnataka cash markets will remain stable and comfortable due to continuous demand from major importers, especially China, Bangladesh, and Sri Lanka. However, price stability will depend on current weather conditions and clarity regarding the upcoming sowing expectations, which might become clear by June 15, 2023.
- In the Warangal Red Chilli spot market, there is currently a higher supply of inferior quality chillies compared to premium quality Red Chilli crop. This is because farmers and stockists are awaiting a potential price rebound, which they anticipate after the start of cold-storage supply in the Guntur and Khammam markets. The cold-storage supply is expected to enhance demand and support prices in this month (June).

#### Previous Update:

- As per AgriWatch estimates, Red Chilli all India production for 2023 is estimated at 15.56 lakh metric tonne (LMT). Last year's production was 14.07 lakh MT, up by 10.59%.
