

KHARIF SOWING UPDATE: -

- Due to a shortfall in rainfall during the month, the sowing of Red Chilli and Turmeric has been delayed by a period of 15-20 days. At present, farmers are awaiting 2-3 monsoon showers before commencing the sowing process.
- The onset of southwest monsoon 2023 was delayed by one week over Kerala.
- Westerly and South West flow of winds from the Arabian Sea has intensified leading to increase rain activities over South Peninsula. There will be a significant increase in rain over Kerala, Karnataka, Tamil Nadu, Rayalaseema, and parts of South Telangana which will be favourable for the Kharif sowing.
- Almost all the Meteorological divisions of South India are rain deficient to large rain deficient except Andaman and Nicobar Islands and the situation will improve gradually with the active conditions of monsoon. *(Source IMD and Skymet)*

RED CHILLI
Fundamentals:
Today's Update:

- Mostly steady to firm sentiment was reported in the Red Chilli spot markets on Wednesday.
- Farmers and stockists are concerned about sowing due to a delay in the monsoon after the start of cold-storage supply. Consequently, they are hesitant to release their stocks in large quantities. According to AgriWatch data, there have been approximately 245,000 bags of arrivals reported after the commencement of cold-storage supply (from 12th June 2023), which is a 31.94% decrease compared to the same period following cold-storage supply.
- AgriWatch predicts that farmers and stockists may hold back from releasing their stocks in bulk quantity until there is more clarity regarding the progress of sowing.
- Additionally, both domestic and export market buyers are currently refraining from purchasing in bulk quantities, and their activity is expected to pick up from July onwards, which will provide support to prices in the short-term.

Previous Update:

- The Red Chilli prices are expected to maintain a bullish sentiment in the medium term due to export demand from China and other countries, as well as from Oleoresin companies and masala companies. However, in the long term, particularly between August and September, prices are likely to decrease due to higher stock availability.
- As per AgriWatch estimates, Red Chilli all India production for 2023 is estimated at 15.56 lakh metric tonne (LMT). Last year's production was 14.07 lakh MT, up by 10.59%.
