

## RED CHILLI

### Fundamentals:

#### Today's Update:

- Steady sentiment was reported in the Red Chilli spot markets on Friday.
- In the Telangana growing regions, around 70-75% of the Red Chilli Nursery preparation has been completed, and it is projected to reach full completion by the end of this month. Similarly, in the Andhra Pradesh growing regions, the preparation is expected to be finished by the first week of August. Due to the delayed monsoon, farmers are experiencing a delay in sowing, which is anticipated to begin from mid-August.
- Meanwhile, recent favorable rainfall in certain districts of Telangana, like Warangal, has led to an accelerated rate of sowing. However, in regions such as Khammam, farmers are still awaiting more monsoon showers before starting their sowing activities.
- Farmers are considering a shift from Cotton to Red Chilli cultivation due to attractive price levels and the potential for higher returns, leading to a possible increase in Red Chilli cultivation area during the current season.
- In the MP growing regions, sowing is completed by almost 80-85% with a expecting decline of 12% due to higher returns in cotton crop.

#### Previous Update:

- AgriWatch predicts that Red Chilli prices will remain within a stable range this week due to upcoming festive demand in both domestic and export markets with marginal decline of INR 500-1,500 per quintal. However, as sowing activities accelerate, prices are expected to decline starting from August onwards.
- Furthermore, AgriWatch expects increased supply in the upcoming week due to profit booking by traders and market participants.
- As per AgriWatch estimates, Red Chilli all India production for 2023 is estimated at 15.56 lakh metric tonnes (LMT). Last year's production was 14.07 lakh MT, up by 10.59%.
