

Domestic Market Highlights:

All-India progressive procurement of Rice as on 20.03.2015 for the marketing season 2014-15 was 236.92 lakh tonnes against the procurement of 241.07 lakh tonnes up to the corresponding period of last year. Punjab, Chhattisgarh and Haryana are the major contributor for rice procurement with contribution of 77.81 lakh tonnes, 33.54 Lakh T and 19.96 Lakh T respectively, However in MY-2014-15 contribution by Punjab is lower by 4% from last year same period of 88.06 lakh tonnes due to lower production estimates for MY-2014-15 and comparatively high open market price.

The area under rice in the Rabi season has dropped some 10 per cent to 38.27 lakh hectares (lh) compared with 42.56 lh during the corresponding period a year ago, data released by the Agriculture Ministry on 20th March 2015.

Basmati Rice Market Unaffected due to rain: Recent rains accompanied by strong wind and hails storm have damaged rabi crops, specially wheat, pulses and oilseeds adversely and production of these crops is likely to be revised down by 5 to 10 percent. The rabi rice crop remains unaffected in A.P., West Bengal and Chhattisgarh.

Rice markets in Punjab and Haryana remain unmoved so far. Market participants expect stable price in the weeks ahead as there is no support from demand side. As prices are ruling at lower level, farmers may decrease aromatic rice area by 25 to 30 percent in coming year despite normal weather forecast by IMD.

Karimnagar district, which is now known as the rice bowl of Telangana, now faces a depressing future as the area under paddy cultivation has declined drastically, causing concern among farmers and others. The main reason behind decreasing of paddy area in rabi is due to severe drought condition, a depleting groundwater table. Paddy cultivation came down to 90,850 hectares compared to 1.38 lakh hectares in 2013-14.

Price Outlook:-Average Rice price in all India is likely to trade steady to slightly weak in 04th Week of March.

International Market Highlight:

The MY 2015/16 (October to September) Mexico rice production is forecast at 240,000 MT, with harvested area estimated at 41,000 ha. This year's rough rice production level converts to 165,000 MT of milled rice. The Post/New total rice production estimate for MY 2014/15 has been revised slightly upward from USDA/Official estimates to 230,000 MT (rough production) reflecting the most recent data from SAGARPA (Secretariat of

Agriculture, Livestock, Rural Development, Fisheries and Food). The increase in rough rice production is equivalent to 158,000 MT of milled rice.

The Government of Costa Rica published Executive Decree #38884-MEIC on February 27th, which sets the producer price at colones(Unit) 22,139 per 73.6 kg bag of dry and clean paddy rice. This price is equivalent to \$557/MT at the current exchange rate of colones 540/USD, and represents a 2 percent decline from the previous price. The decree also sets the minimum and maximum price for different presentations and qualities of milled rice, either locally produced or imported. Those prices will enter into effect on June 8th, 2015 so that the millers can sell their current stocks of rice. With the new prices, the consumer will obtain a 4 percent reduction in the price of milled rice. The government had previously said that it would reduce the price of rice as part of an agreement with the rice sector.

In the 2015/16 MY, South Africa's rice imports are expected to increase by 10 percent to 1.3 million tons on increased demand. In the 2014/15 MY, post estimates that rice imports could reach 1.2 million tons. So far in the 2014/15 MY (May 1, 2014 to January 31, 2015), South Africa imported 721,683 tons of rice. In the 2013/14 MY, South Africa imported 1.1 million tons of rice. Thailand regained its position as South Africa's largest trading partner in rice from India. India and Thailand, together, supply more than 70 percent of South Africa's rice demand.

As per latest report by USDA, world rice production is likely to down about 0.4% from last year production of 477,080 Thousand metric tonnes due to major fall in Asian countries like India, Thailand and Pakistan. On the other hand, We can see slightly compensated by increases rice production in Bangladesh, China, Myanmar, Vietnam and Philippines. In 2014-15, India's milled rice production is likely to reach about 102,500 thousand metric tonne, down by around 3.79% from last year production of 106.54 million tonnes.
