

Domestic Market Highlights:

All India Average rice price in the third week of April was moved weak by 4.35% from previous week and currently hover in the range of Rs2700-2750/quintal; market took some recovery from current level as it was around 11% up from last week. We expect market is likely to move in the range bound to firm in coming weeks. Major producer Andhra Pradesh price was seen too weak and down by 0.66% from last week and now average rice price in the state was hover in between Rs.3550-3660/quintal in this week even with rabi crop damage in the state.

All-India progressive procurement of Riceas on 10.04.2015 for the marketing season 2014-15 was 249.31 lakh tonnes against the procurement of 247.83 lakh tonnes upto the corresponding period of last year. Punjab, Chhattisgarh and Haryana are the major contributor for rice procurement with contribution of 77.81 lakh tonnes, 33.55 Lakh T and 20.01 Lakh T respectively, However in MY-2014-15 contribution by Punjab is lower by 4% from last year same period of 88.06 lakh tonnes due to lower production estimates for MY-2014-15 and comparatively high open market price.

A government advisory body the Commission for Agricultural Costs and Prices (CACP) on crop pricing has recommended a modest increase of Rs 50 per quintal in the minimum support price for paddy farmers. In its MSP proposals made to Agriculture Ministry for various kharif (summer-sown) crops for 2015-16, the paddy MSP has been suggested to be increased to Rs 1,410 a quintal from Rs. 1,360 for common variety and Rs. 1450 from Rs 1,400 for 'A grade' variety paddy. For the 2014-15 kharif seasons, the previous government had also raised the support price of paddy by Rs 50 per quintal to Rs 1,360 for common variety and to Rs 1,400 for 'A grade' variety paddy.

Total rice (non basmati and basmati) export in the month of March was 9.98 lakh tonnes which is up by around 31% from last month due to fresh demand came from African Countries, as per latest data provide by IBIS.

Total Rice export for MY-2014-15 till March-15 was 59.39 lakh tonnes which was up by around 15% from same period last year export of 51.51 lakh tonnes. Non basmati rice export in the month of March was 6.00 lakh tonnes and basmati exports for MY-2014-15(Oct14-Sep-15) in the month was 3.98 lakh tonnes. This month Saudi Arabia was the largest buyer of aromatic rice which contributes around 30% of total export of aromatic rice.

As per data released by Ministry of agriculture, Planting for India's 2014-15 rabi (secondary) rice crop (November-May) has reached about 3.943 million hectares as of March 27, a decrease of about 9.5% from the same period last year.

China is likely to begin rice import from India in July this year, as domestic consumption is increased in 2014-15 by 1.43% from last year as per by USDA. China previously restricted the import of Indian basmati rice due to Khapra beetle.

Price Outlook:-Average Rice price in all India is likely to trade steady to slightly Firm in 02nd Week of April.

International Market Highlight:

The Commerce Ministry is monitoring the price of rice in the world market day by day to see when it can reopen bidding this year for government stocks, since it is afraid of hurting the rice price in the local market. With the sluggishness in global rice trading, local exporters are focusing more on government-to-government contracts, which they see as helping drive shipments for the whole year. Factors affecting sales of rice abroad are global currency volatility, a stronger baht, droughts and monsoons in many producing and importing countries, lower oil prices and the global economic slowdown. With the global rice market cooling down, the ministry has had to delay the year's third rice auction from this month. According to the Thai Rice Exporters Association, rice exports are projected at about 8 million to 8.5 million tonnes this year. The government needs to be more careful about dumping huge quantities of rice on the market in order to prevent prices from dropping.

The FAO has estimated Pakistan will export about 3.8 million tons of rice in 2015, slightly up from 2014 due to expected increased production this year. The FAO estimates Pakistan's 2014 paddy rice production at about 10.1 million tons (about 6.85 million tons, basis milled), down about 1% from about 10.19 million tons (about 6.93 million tons, basis milled) produced in 2013, due to localized crop damages in some eastern parts of Punjab, Gilgit Baltistan and Azad Jammu and Kashmir (AJK), following floods in September and drought in south-eastern parts of Sindh province.

Iran's likely resumption of import is unlikely to drive market up suddenly as stock is ample owing to bumper crop this year. However, higher expected demand from EU may support cash market at current level and resultantly aromatic rice market may get firmer by 2 to 3 percent in the short to medium term. Commerce ministry expects 8 to 10 lakh

tonne import by Iran in 2014-15. Usually Iran imports 12 to 13 lakh tonne basmati rice from India.

Colombian rough/paddy rice production is expected to increase 130,000 MT to 1.98 million MT in MY2015/16. In 2014, the area planted fell by about 60,000 hectares (148,000 acres). As a result, rice production declined 132,000 MT. Reduced supplies at the end of CY 2014 put upward pressure on rice prices, increasing 53% since December 2014.

The MY 2015/16 (October to September) Mexico rice production is forecast at 240,000 MT, with harvested area estimated at 41,000 ha. This year's rough rice production level converts to 165,000 MT of milled rice. The Post/New total rice production estimate for MY 2014/15 has been revised slightly upward from USDA/Official estimates to 230,000 MT (rough production) reflecting the most recent data from SAGARPA (Secretariat of Agriculture, Livestock, Rural Development, Fisheries and Food). The increase in rough rice production is equivalent to 158,000 MT of milled rice.
