

### **Domestic Market Highlights:**

Wholesale basmati rice prices in Delhi increased by about Rs.300 per quintal recently due to increased demand from stockiest but lower supplies. Prices of common basmati rice increased to around Rs.5, 000-Rs.5, 400 per quintal from around Rs.5, 000-5,100 per quintal. Prices of Pusa 1121 increased to around Rs.4, 200-5,000 per quintal from around Rs.4, 100-4,800 per. Farmers' unwillingness to sell basmati paddy at low prices to millers is understood to be resulting in fewer supplies of milled rice in the markets. As per traders feedback, pulses stockiest shifted from pulses to rice business due to lower rice and higher pulses prices. New entrance in rice market as stockiest remained active during last two months and it encouraged rice price suddenly in the open market despite normal domestic and export demand.

Rice procurement by Food Corporation of India (FCI) and state government-owned agencies in the kharif marketing season 2015-16 has procured 12.22 million tonnes which is up by 25% (9.7 million tonnes in 2014-15) from last year. As per the latest data, out of the total rice equivalent of paddy procurement in Punjab, the agencies have purchased 8.3 mt of rice from the farmers till now against 7.5 mt of rice was purchased during the same period last year. The rice procurement in states like Chhattisgarh, Odisha, West Bengal and Assam would commence at the end of next month.

Rice prices are expected to move up in coming months as stock is depleting and kharif production prospects too look not so sound. As of now prices are ruling lower. However emerging scenario points towards firmness, Kharif rice production is estimated at 90.61 million tonnes in 2015-16 crop years. As major growing states are facing deficit rainfall, estimated production is unlikely to turn into a reality now.

Besides, higher export volume and supply for PDS (Public Distribution System) and other welfare schemes will continue to weigh on availability in the open market. All these developments may lend support to cash market fundamentals.

Wholesale Prices for India as an average for first week of November traded slightly firm by 0.46% and are currently hovering at Rs.2670-2675/quintal. We expect non-basmati rice market to move range bound in coming week. Sluggish trading activities are being expected due to continuous holidays this week. Fresh trade may be expected from next week. No major developments in bench mark markets have been reported.

Aromatic rice monthly average prices in the first week of November were registered at Rs.3700/quintal (1121 Sela) and Rs.4800/quintal (Steam). We expect price of 1121 varieties to move range bound in coming week.

Despite ban imposed by Iran on aromatic rice import Indian basmati rice continued to enter into Iran Market through UAE. Notably, world powers had agreed to lift sanctions on Iran four months ago and after this Dubai has emerged the new stopover for India's basmati rice exports to Iran. According to market experts Indian aromatic rice export volume has suddenly increased from Ave of 15000 T to Around 80,000 T now. Normalcy in trading conditions has given Indian basmati rice exporters the opportunity to use ports in Dubai to ship basmati rice to Iran.

Government procurement of MY 2015/16 rice under the minimum support price is significantly ahead of last year due to the timely harvest of rice unlike last year where harvest was delayed by about two weeks due to October rains. Government procurement through October 25, 2015, is estimated at 6.54 MMT compared to 5.05 MMT during the corresponding period of MY 2014/15. Most of the procurement is currently limited to the northern states, but will gradually spread to other parts of the country from November onwards as harvest progresses. Based on the production and procurement estimates suggested by various states, the government has set the MY 2015/16 kharif rice procurement target of 30 MMT compared to MY 2014/15 kharif rice procurement of 25.3 MMT (target 30.1 MMT).

As per Agriwatch second preliminary estimates after final Kharif sowing ,Indian rice production (including rabi) is expected to down by 4-5% from last year production of 104.5 million tonnes to 99-100 million tonnes in KMS 2015-16 due to lower area and lower rainfall in major growing states. Average rice price is likely to trade steady even with harvesting season starts, due to lower production estimates and lower carryover stock.

Price Outlook:-Average Rice price in all India is likely to reel under pressure with beginning of new arrival.

# **International Market Highlight:**

**Unofficial preliminary rice exports (excluding premium white and fragrant rice) for November 2-8,** 2015 totaled 49,877 metric tons, down 47,941 metric tons from the previous week, and down 31,621 metric tons from the four-week moving average of 81,498 metric tons. Rice exports (excluding premium white and fragrant rice) from January 1 – November 8, 2015, totaled 3,732,422 metric tons, down 18 percent from the same period last year. Total Thai rice exports from January to September 2015 totaled 6.6 million metric tons, down 13 percent from the same period last year.

**According to the Guyana Rice Development Board (GRDB),** Guyana has exported around 437,448 tons of rice in the first ten months (January - October) of 2015, up about 6% from around 412,228 tons exported during the same period last year.

Rice exporters in Cambodia are not happy with local export policy as they are paying higher tax per container in comparison to Vietnam & Thailand. They pay \$50 per container higher for export as tax. Higher port and container cost would derail export target of 1 MMT for the country. A group of Analysts opined that the target would be possible only if the country successfully sort out issues like blocking competitiveness, including high costs related to transportation.

According to the UN's Food and Agriculture Organization (FAO), Pakistan basmati rice export prices have declined for second consecutive month after increasing in August 2015. The decline can be attributed to increasing supplies from the current harvest, lack of export demand as well as surging stocks. Pakistan rice exporters reportedly hold around 500,000 tons of basmati rice from last season. In October 2015, Pakistan's basmati rice export prices have declined by about 23% to around \$661 per ton from around \$855 per ton in September 2015, and down about 54% from their year-ago levels of around \$1,435 per ton. Unlikely, Indian FOB in the month of October moved up from last month and currently is in the range of USD 820-825/MT which is up by around 3.86% from last month price.

Iran may do away with ban on aromatic rice import from Pakistan. However, prevailing condition is not in favor of Pakistan. If ban is lifted Pakistan would not be able to grab opportunity again as the decision will remain ineffective until proper currency transfer arrangements between the two countries are made. Pak Rice association chairman says that an effective and trusted formal banking channel of currency transfer and Good Manufacturing Practices (GMP) Certificates by Iran government for Pakistani exporters can revive rice export from Pakistan. Under current condition India is taking advantage of preferential exchange rate due to availability of official channel against Pakistani exporters.

The IGC forecasts 2015-16 global rice trade at around 42 million tons, unchanged from the previous year's 42 million tons as well as its previous estimate of around 42 million tons. Thailand is projected to be the world's leading exporter in 2016.
