

### Domestic Market Highlights:

**Wholesale Prices for India as an average for first week of December traded steady to firm by 0.80%** and are currently hovering at Rs.2655-2660/quintal. We expect non-basmati rice market to move range bound with firm tone in coming week. India average wholesale rice prices, which declined in October 2015 with the beginning of the kharif (June-December) rice harvest, have increased in November on concerns of lower output due to El Nino-induced below average monsoon rains in many rice-growing areas.

**Total Rice exported from India in the last week of November was 175045.09 tonnes out of which basmati rice contributes 37.56%, and non-basmati rice is 62.43% in this month with quantity** of around 65761 tonnes and 109283 tonnes respectively as per latest data extract from IBIS. Major importers for Indian Basmati rice in this period were Iran, Saudi Arabia and UAE. We expect Middle East countries to remain the major basmati buyers for Indian Basmati from Mundra, kandla and Kainada Port in coming months. On the other hand Ivory Coast, Senegal and Benin were the top importers for Indian non basmati rice in this period.

**Indian FOB for 1121 steam in the month of November moved up from last month and currently** is in the range of USD 840-845/MT which is up by around 2.36% from last month price. Demand from international market push the price upward in recent weeks. On the other hand Pakistani basmati price have declined for third consecutive month in November 2015 after increasing in August 2015, according to the UN's Food and Agriculture Organization (FAO). Currently Pakistani basmati FOB is hover in the range of USD 621/MT which is down by 6.05% from last month FOB of USD 661/MT. The decline can be attributed to increasing supplies from the current harvest, lack of export demand as well as surging stocks. Pakistan rice exporters reportedly hold around 500,000 tons of basmati rice from last season. They have been urging the government to intervene in the export market and support them.

**Saudi Arabia continues to be the largest importer of rice from India, importing more than Iran during** the first six months of 2015-16. Saudi Arabia imported 598,001 tonnes of rice during the April-September period, as against Iran which imported 361,474 tonnes of rice valued at \$319.71 million. Besides Saudi Arabia and Iran, other rice importers include the UAE, Iraq and Kuwait.

**Wholesale Prices for India as an average for fourth week of November traded steady to firm by 0.75%** and are currently hovering at Rs.2650-2655/quintal. We expect non-basmati rice market to move range bound with firm tone in coming week.

**Aromatic rice monthly average prices in the fourth week of November were firmed from last week and currently move with Rs.5300/quintal (1121 Sela) and**

Rs.6200/quintal (Steam). We expect price of 1121 varieties to move range bound with firm tone in coming week.

**Throughout the month of November basmati rice prices have seen a robust growth. A month ago** 1121 Steam rice price was Rs. 5000/quintal and now it is 24% up from last month and 35% up from last week and currently hovers in the range of Rs.6200/quintal. The major reason is the shift of pulses stockiest from pulses to rice business due to lower rice and higher pulses prices. New entrants in rice market as stockiest remained active during last two months and it encouraged rice price in the open market despite normal domestic and export demand. Overseas and domestic demands are normal and lower stocks too push the price northward.

**Total non-basmati Rice export in the month of Oct -15 was 338918.07 tonnes. Mundra Sea, Vizag,** and Kolkata Sea were the major ports for non-basmati rice export during this period. Total basmati Rice export in the month of Oct-15 was 294943.40 tonnes. Mundra Sea, Kandla Sea and Loni ICD, were the major port for basmati rice export center during this period.

**Price Outlook:-Average Rice price in all India is likely to trade steady with firm tone due to higher demand and tight supply.**

### **International Market Highlight:**

**Asian rice markets saw little movement over the past week due to thin demand, while tight** supply kept prices high in Vietnam and purchases by China and some Middle East clients failed to move up Thai prices. As per trader's feedback, Vietnamese prices are high and they won't decrease as supply is tight. China, the biggest buyer of Vietnamese rice, imported 199,350 tonnes from its southern neighbor in October, up 81 percent from a year ago, this brought China's total purchases from Vietnam in the first 10 months of 2015 to nearly 1.6 million tonnes, up 42 percent from a year ago. Overall, Vietnam's rice exports in January-November rose 3.6 percent from a year ago to 6.24 million tonnes,

**The Philippines' imports of additional volumes of rice in 2016 will be "much lower" than the initial estimate** of 1.3 million tonnes due to better-than-expected domestic output. Lesser purchases by the Philippines, one of the world's biggest rice buyers, could knock export prices in Vietnam and Thailand, the country's main suppliers.

**The UN's Food and Agricultural Organization (FAO) forecasts that Pakistan 2015 paddy** rice production at around 9.9 million tons, down about 6% from around 10.502 million tons in 2014. The FAO aspects the decline to a 5% decline in area planted in response to large stocks and high production costs. The lower production estimates could keep the price in the range bound in coming months.

**B,desh Raises Import Duty On Rice From !0 To 20 %:** B,Desh has raised import duty from 10 percent to 20percent on rice to protect local farmers from cheaper import flow. Local Rice millers association was demanding hike in import duty. Besides, it was also demanding restriction on imported quantity during July-Dec harvest of Aman Crop. The government will probably procure 200,000 tons of 2015 Aman rice from millers at Taka 31 per kilogram (around \$388.5 per ton) between December 15, 2015 and March 15, 2016. Before it 10 % import duty was imposed on rice in May-2015

**Unofficial preliminary rice exports (excluding premium white and fragrant rice) for November 9-15, 2015** totaled 58,118 metric tons, up 8,241 metric tons from the previous week, but down 15,160 metric tons from the four-week moving average of 73,278 metric tons. Rice exports (excluding premium white and fragrant rice) from January 1 – November 15, 2015, totaled 3,790,540 metric tons, down 19 percent from the same period last year. Total Thai rice exports from January to September 2015 totaled 6.6 million metric tons, down 13 percent from the same period last year.

**The IGC forecasts 2015-16 global rice trade at around 42 million tons, unchanged from the previous year's 42 million tons** as well as its previous estimate of around 42 million tons. Thailand is projected to be the world's leading exporter in 2016.
