International Market Highlight:

Record Rice production in Sri Lanka is expected in MY 2015-16 due to better yield and higher area under paddy. Sri Lanka rice production in this year is expected around 3.3 million tonnes which is higher by around 16% from corresponding period last year production of 2.8 million tonnes. This could be the reason for lower imports by the country in this year. This year only 50, 000 Mt of rice is expected to imports which is 250,000 mt lower from last year imports.

Vietnam Rice stock in MY 2014/2015 is estimated to be very low due to unexpected increase in demand from Indonesia and the Philippines. Rice stock in MY 2015/2016, however, is expected to be at an identical low level compared to MY 2014/2015, which will prevent Vietnam exporting large amounts in MY 2015/2016.

Unofficial preliminary rice exports (excluding premium white and fragrant rice) for January 11-17, 2016 totaled 51,342 metric tons, down 21,648 metric tons from the previous week. Rice exports from January 1-17, 2016 totaled 124,539 metric tons, up 103 percent from the previous week.

The EU imported about 419,524 tons of rice during the period September 1, 2015 - January 12, 2016, up about 31% from around 392,569 tons imported during the same period last year. The UK remained the largest importer in September 1, 2015 - January 12, 2016 period with around 101,903 tons followed by France (75,397 tons), Netherlands (46,412 tons), Germany (31,874 tons), Poland (29,552 tons) and Italy (28,264 tons). Other EU countries imported 106,122 tons. The EU imported around 1.143 million tons of rice in the crop year 2014-15, up about 12.7% from around 1.013 million tons imported in the crop year 2013-14.

The UN's Food and Agriculture organization (FAO) estimates Malawi's 2015 paddy rice production at around 120,000 tons which is down about 8% from around 131,000 tons in 2014. Dryness and moisture deficits due to El-Nino in major crop growing regions in south have impacted the 2015-16 crops planting. However Malawi is relatively less affected by the impact of El Niño compared to neighboring countries to its geographical location, but rainfall forecasts point to below average rains in central and southern parts until the start of the harvesting period
