International Market Highlight:

The UN's Food and Agriculture Organization (FAO) forecasts china's MY 201516 (June May) rice imports to decline about 6% y/y due to government's efforts to limit informal imports. It also forecasts China's 2015 paddy rice output at around 208.25 million tons, up from around 206.507 million tons in 2014 due to favorable weather conditions.

The EU imported about 572,619 tons of rice during the period September 1, 2015 February 16, 2016, up about 22.5% from around 467,256 tons imported during the same period last year. The UK remained the largest importer in September 1, 2015 February 16, 2016 period with around 127,867 tons followed by France (95,218 tons), The Netherlands (64,495 tons), Germany (60,871 tons), Poland (41,907 tons), , and Italy (40,210 tons). Other EU countries imported 142,051 tons. During the week ended February 16, 2016, the EU imported around 42,196 tons of rice, up about 43% from around 29,564 tons imported during the week ended February 9, 2015.

According to data from the Vietnam Food Association (VFA), country exported around 589,646 tons of rice in January 1 February 18, 2016, up about 40% from around 421,202 tons of rice exported in first two months of 2015. The average rice export price so far in this year stands at around \$400 per ton (FOB), down about 11% per ton from around \$452 per ton recorded during same last year.

THE Philippines, one of the world's top rice importers, is set to buy 400,000 tons of the grain for delivery in the second quarter, and may need an additional 800,000 tons to cover this year's requirements. This volume is required for the lean month which is beginning from July. The Philippines' fresh demand could give a boost to rice prices in Vietnam and Thailand -- the country's main suppliers and the world's third and second biggest exporters, respectively after India.

In MY2015-16 planted off-season rice areas in Thailand are revised down to 5.8 million rai (0.9 million hectares. This is a 52-percent reduction of off-season rice areas from last year due to limited irrigation availability. As a result, total rice planting will

likely decline to around 63 million rai (10 million hectares). This is approximately 11 percent lower than last year. Off-season rice production is expected to decline to 2 million metric tons (milled equivalent), a decline of 57 percent from MY2014/15. This will result in a reduction of total MY2015/16 rice production to 15.9 million metric tons, down 18 percent from last year.
