International Market Highlight:

For MY 2016/17 Bangladesh (May-April), total rice area and production levels are projected to increase slightly to 11.8 million hectares (HA) and 34.55 million metric tons (MMT) assuming good weather and a recovery in Aman rice area, which fell last year due to flooding in key Districts.

MY 2016/17 Korea rice production is forecast to remain around 4 million metric tons (MMT) – down 8 percent from 4.33 MMT in 2015/16 – based on five year average yield. According to a Korea Rural Economic Institute (KREI) survey of rice farmers from December 28, 2015 - January 4, 2016, planted area is expected to decline to 781,716 Hectare, down about 2.2 percent from last year. However, high yield varieties will almost offset the lower acreage planted.

The International Grains Council's forecast that Owing to a smaller outturn and rising consumption, world rice stocks in 2015/16 are expected to be down sharply, mostly on reductions in the main exporters, namely India and Thailand. Production is seen recovering to a fresh peak in 2016/17 on potentially bigger crops in Asia but, given a further expansion of food use, aggregate inventories are expected to post a further modest y/y contraction. While prospects for trade in 2017 (Jan/Dec) are tentative, volumes should stay high on demand from buyers in Africa and Asia.

Vietnam exported 1.426 million tons of rice in first three months of 2016 (January – March), up about 58% from 901,692 tons of rice exported during corresponding period in last year, according to data from the Vietnam Food Association (VFA). The average rice export price so far in this year stands at around \$405 per ton (FOB), down about 7% per ton from around \$434 per ton recorded during corresponding last year.
