

Domestic Market Highlights:

Wholesale Prices for India as an average for third week of April traded frail by 1.2% from last week. Prices are currently hovering at Rs.2960-2970/quintal and about 4.24% up from price of Rs.2844/Quintal during corresponding period last year. Agriwatch expects non-basmati rice market to move range bound with some firm tone in coming week.

Wholesale basmati rice prices in India's national capital increased continuously in last three weeks, due to high demand against restricted supplies from producing regions. On April 21, 2016, prices of Pusa 1121 increased to around Rs.5, 600- 5,800 per quintal from previous levels of around Rs.5, 400-5,600 per quintal. Prices of common basmati increased to around Rs.6, 000-6,100 per quintal from previous levels of around Rs. 5, 800- 5,900 per quintal.

Total rice exports in the 2nd week of April (11-17 April) were 150188.68 tons in which aromatic and non basmati rice contribution was 35.15% and 64.84% respectively with quantity of around 52796 tons and 97392.64 tons as per latest data extract from IBIS. Major importers of Indian Basmati rice in this period were Saudi Arabia, UAE, and Iran. We expect Middle East countries to remain the major basmati buyers of Indian Basmati from Mundra and Kandla Port in coming months. Major non basmati importers were Benin, Guinea & Senegal. Kakinada port, Kolkata port and Mundra were the major export destination and more than 70% non basmati rice exported from these ports in this period. Weekly rice export was down by around 29% from last week export of 210139.24 tons.

Commission for Agricultural Costs and Prices recommended an increase in minimum support price (MSP) of paddy by Rs 60 to Rs 1,470 per quintal for common grade for coming Kharif season (2016-17), which is up by around 4.26% from last year price of Rs.1410/Quintal, likely CACP has proposed an increase Grade A variety by same from Rs.1450/quintal in MY-2015-16 to Rs.1510/quintal in 2016-17 which is approx 4% up from last year.

Odisha has procured 41.69 lakh tonnes of paddy during this year's (2015-16) kharif season, an increase of 4% against last year, even though the state was facing a severe drought. The government has targeted procuring 10.29 lakh tonnes of paddy in the rabi season. Paddy procurement for the Rabi season will begin across 19 districts in the second week of May and continue till June 30.

India's rice stocks in the central pool as of April 1, 2016 stood at around 26.811 million tons (including a milled equivalent of about 9.925 million tons of paddy), down about 13.5% from around 23.61 million tons recorded during the same period last year, according to data from the Food Corporation of India (FCI). On monthly basis, India's rice stocks in the central pool are down about 8% from around 29.234 million tons recorded on March 1, 2016. The current rice stocks are about double the required strategic reserve norms of around 13.58 million tons for this time of the year, according to the FCI.

Price Outlook:-Average Rice price in all India is likely to trade steady with firm tone due to normal demand and tight supply.

International Market Highlight:

Unofficial preliminary rice exports (excluding premium white and fragrant rice) for April 4-10, 2016 totaled 28,434 metric tons, down 37,774 metric tons from the previous week, and down 25,451 metric tons from the four-week moving average of 53,885 metric tons. Rice exports from January 1 – April 10, 2016 totaled 1,115,888 metric tons, up 5 percent from last year.

According to data from the Vietnam Food Association (VFA), Vietnam exported around 1.531 million tons of rice during January 1 April to 14, 2016, up about 1.35% from around 1.552 million tons of rice exported in first four months of last year. The average rice export price so far in this year stands at around \$408 per ton (FOB), down about 5% per ton from around \$429 per ton recorded during same time last year.

For MY 2016/17 Bangladesh (May-April), total rice area and production levels are projected to increase slightly to 11.8 million hectares (HA) and 34.55 million metric tons (MMT) assuming good weather and a recovery in Aman rice area, which fell last year due to flooding in key Districts.

MY 2016/17 Korea rice production is forecast to remain around 4 million metric tons (MMT) – down 8 percent from 4.33 MMT in 2015/16 – based on five year average yield. According to a Korea Rural Economic Institute (KREI) survey of rice farmers from December 28, 2015 - January 4, 2016, planted area is expected to decline to 781,716 Hectare, down about 2.2 percent from last year. However, high yield varieties will almost offset the lower acreage planted.

The International Grains Council's forecast that Owing to a smaller outturn and rising consumption, world rice stocks in 2015/16 are expected to be down sharply,

mostly on reductions in the main exporters, namely India and Thailand. Production is seen recovering to a fresh peak in 2016/17 on potentially bigger crops in Asia but, given a further expansion of food use, aggregate inventories are expected to post a further modest y/y contraction. While prospects for trade in 2017 (Jan/Dec) are tentative, volumes should stay high on demand from buyers in Africa and Asia.
