

Domestic Market Highlights:

India's food grains production increased marginally to 252.23 million tonnes in the 2015-16 crop years, as per the third advance estimates, despite setback due to deficient rainfall and shortage of water in reservoirs. As per the 3rd advance estimates for 2015-16 total food grains production in the country has been higher than that in the last year. Total food grains production during 2015-16, estimated at 252.23 million tonnes, has been higher by 0.21 million tonnes over the production of 252.02 million tonnes during 2014-15. Rice production during 2015-16 is estimated at 103.36 million tonnes, which is lower by 2.12 million tonnes than its production of 105.48 million tonnes during 2014-15.

All-India progressive procurement of Rice as on 06.05.2016 for the marketing season 2015-16 was 321.95 lakh tonnes against the procurement of 275.18 lakh tonnes upto the corresponding period of last year.

Wholesale Prices for India as an average for first week of May traded firmed by 0.15% from last week. Prices are currently hovering at Rs.2958-2960/quintal and about 6.5% up from price of Rs.2844/Quintal during corresponding period last year. Agriwatch expects non-basmati rice market to move range bound with some firm tone in coming week. Wholesale basmati rice prices in the national capital too firmed from last week due to local demand from retailers against limited supplies from producing regions.

After the impressive gain in food grain production over recent years in eastern India, procurement has also started picking up, particularly in Assam, Jharkhand, West Bengal and eastern Uttar Pradesh. As of end-April, 6.56 million tones of paddy was procured from Assam, Jharkhand, Bihar, West Bengal and east UP in the 2015-16 season that started in October. This is 61 per cent more than that in the same period last year. The rise has come with involvement of the private sector for rice procurement on behalf of Food Corporation of India (FCI), on an experimental basis.

Indian FOB for 1121 steam in the month of April moved up from last month and currently is in the range of USD 870-875/MT which is up by around 11% from last month price. Average basmati rice price increased due to increase buying interest for stockpiling which push the price in northward direction. Pakistani basmati price has decreased from USD 681/MT to 679\$/MT, according to the UN's Food and Agriculture Organization (FAO). Currently Pakistani basmati FOB is hovering in the range of USD 675-679/MT which is down by 0.33% from last month FOB of USD 681.3/MT.

FCI revises economic cost for rice to Rs. 3266.70 per quintal or the season 2016-17 till 31st March-2017. It was 3193.73 per quintal for 2015-16. Increase of around Rs 73 per quintal would increase subsidy burden if rice is sold at Rs 2400 per quintal for open market scheme.

Price Outlook:-Average Rice price in all India is likely to trade steady with firm tone due to normal demand and tight supply.

International Market Highlight:

The Vietnam Food Association (VFA) aims to export 1.6 million tonnes of rice in the second quarter of this year, 200,000 tonnes lower than initially planned. In the first three months of this year, the country exported 1.59 million tonnes of rice. As so, rice exports in the first half of this year are expected to hit over 3 million tonnes, up 12 percent against the same period last year. For the whole year, the export volume is expected to remain at last year's 6.5 million tonnes.

Thailand plans to sell the remaining 11.4 million tons of rice in government stockpiles within two months. The military government which took control following a May 2014 coup has auctioned off 5.05 million tons of rice worth \$1.53 billion through several tenders since taking power. The government had previously said it aimed to clear the stockpile by the end of 2017. Auctions will start next week, with one million tons of rice for each lot. They aim to auction it all off within two months, however according to president of Tanasan Rice Group government's target of offloading the rice within two months was not possible.

For MY 2016/17 Bangladesh (May-April), total rice area and production levels are projected to increase slightly to 11.8 million hectares (HA) and 34.55 million metric tons (MMT) assuming good weather and a recovery in Aman rice area, which fell last year due to flooding in key Districts.
