International Market Highlight:

Since January 2016, the Thai government has sold approximately 3.9 million metric tons from total tenders of 9.3 million metric tons. These sales consist of 3.5 million metric tons of food-grade rice, mainly for exports, and 0.4 million metric tons of non-food grade rice, mainly for feed use. Presently, the government is still holding rice stocks of around 8.4 million metric tons.

Unofficial preliminary Thailand rice exports (excluding premium white and fragrant rice) for September 5- 11, 2016 totaled 105,307 metric tons, up 6,184 metric tons from the previous week and up 4,481 metric tons from the four-week moving average of 100,826 metric tons. Rice exports from January 1 – September 11, 2016 totaled 2,598,866 metric tons, down 11 percent from the same period last year.

Despite winning the 150,000 tons in the Philippines tender, Vietnam export prices decreased about \$5 for most of rice grades during the week of August 27-September 2, 2016, due to reduced export rice prices from other competitors, and poor demand from Vietnam rice export markets.

The Thai government recently approved the sale of 755,000 tons of rice stocks to 11 winning bidders for a combined 7.2 billion baht. Of the 755,000 tons approved, 702,615 are for human consumption and 52,397 are for industrial use. Thailand will vie to sell more rice to the Philippines and to Indonesia after winning a bid last month to supply 100,000 tons of 25% white rice to the Philippines at US\$424.85 a tons. The Philippine delivery is scheduled for September and October. Vietnam also won a bid to supply 150,000 tons at the same price. The government currently controls less than 9 million tons in state stocks, a sharp drop from 18.7 million tons accumulated through various rice-pledging schemes during 2011-14. The government remains confident about disposing of all state rice stocks next year.

Philippines, one of the world's top rice buyers, is planning to import an additional 750,000 tons of rice to secure the country's supplies of the grain staple through 2017. The immediate volume to be purchased will be the 250,000 tons that the government announced earlier, followed by another tranche of 250,000 tons.

Bangladesh rice is forecast to fall to 34.51 million tons from an estimated 11.7 million hectares on reduced planting of its summer rice and increased winter rice production, summer rice production was estimated lower at 2.4 million tons due to decreased acreage against the initial expectation due to insufficient irrigation.

Post revises the estimate of MY 2015/16 Indonesian paddy harvested area to 12.0 million hectares from the previous estimate of 11.8 million hectares. Thus, it is estimated that MY 2015/16 Indonesian paddy production will increase to 36.2 MMT compared to the previous estimate of 35.6 MMT of milled rice equivalent. Considering

higher production estimates, Post expects MY2015/16 Indonesian rice imports will decline to 1.8 MMT compared to the initial estimate of 2.0 MMT.
