International Market Highlight:

Unofficial preliminary rice exports (excluding premium white and fragrant rice) for September 12- 18, 2016 totaled 91,958 metric tons, down 13,349 metric tons from the previous week and down 12,254 metric tons from the four-week moving average of 104,212 metric tons. Rice exports from January 1 – September 18, 2016 totaled 2,690,824 metric tons, down 11 percent from the same period last year.

Total rice production in Vietnam for MY 2015/2016 is down about a million tons, due mainly to the impact of drought weather conditions caused by El Nino, which lowered the spring crop production in the Mekong River Delta. However, the planting expansion of the late autumn crop in the Delta, and in other areas has superseded the loss of harvested area. Currently, the annual flooding in the Mekong River Delta is diminished due to dams constructed up-stream.

Thailand remained the world's second-largest rice exporter after India in the first eight months of this year, with exports down almost 11% last month, From January to August; Thailand shipped 6.06 million tonnes of rice, in August, exports fell 10.7% year-on-year but jumped 40% from the previous month as African buyers returned,. The largest markets during the period were Benin (11% of total volume), China (9%), Ivory Coast (8.4%), South Africa (6.2%) and Indonesia (5.8%).By comparison, India shipped 6.71 million tonnes in the same period. The third largest exporter was Vietnam, which shipped 3.12 million tonnes.

Bangladesh rice is forecast to fall to 34.51 million tons from an estimated 11.7 million hectares on reduced planting of its summer rice and increased winter rice production, summer rice production was estimated lower at 2.4 million tons due to decreased acreage against the initial expectation due to insufficient irrigation.

Post revises the estimate of MY 2015/16 Indonesian paddy harvested area to 12.0 million hectares from the previous estimate of 11.8 million hectares. Thus, it is estimated that MY 2015/16 Indonesian paddy production will increase to 36.2 MMT compared to the previous estimate of 35.6 MMT of milled rice equivalent. Considering higher production estimates, Post expects MY2015/16 Indonesian rice imports will decline to 1.8 MMT compared to the initial estimate of 2.0 MMT.
