International Market Highlight:

Unofficial preliminary Thailand rice exports (excluding premium white and fragrant rice) for October 24-30, 2016 totaled 102,618 metric tons, down 50,392 metric tons from the previous week and down 22,399 metric tons from the four-week moving average of 125,017 metric tons. Rice exports from January 1 – October 30, 2016 totaled 3,425,042 metric tons, down 6 percent from the same period last year.

Thailand shipped 790,000 tons of rice overseas in September, a growth of 9.9% year-on-year, and lifting total exports of the grain for the first nine months of 2016 to 6.85 million tons. For the nine-month period, rice exports rose 3.7% in volume compared to the same period last year, but the value increased by only 1.6% to 108 billion baht. Exports of parboiled rice to African markets totaled 255,000 tons in September, up 103% from August. Benin was the largest buyer, taking 177,000 tons of parboiled rice. The export of white rice to African and Asian countries also rose by 22% in the month to 371,000 tons. However, exports of Jasmine fragrant rice dropped by 13% to 158,000 tons.

Total rice production in Vietnam for MY 2015/2016 is down about a million tons, due mainly to the impact of drought weather conditions caused by El Nino, which lowered the spring crop production in the Mekong River Delta. However, the planting expansion of the late autumn crop in the Delta, and in other areas has superseded the loss

of harvested area. Currently, the annual flooding in the Mekong River Delta is diminished due to dams constructed up-stream.

Bangladesh rice is forecast to fall to 34.51 million tons from an estimated 11.7 million hectares on reduced planting of its summer rice and increased winter rice production, summer rice production was estimated lower at 2.4 million tons due to decreased acreage against the initial expectation due to insufficient irrigation.

Post revises the estimate of MY 2015/16 Indonesian paddy harvested area to 12.0 million hectares from the previous estimate of 11.8 million hectares. Thus, it is estimated that MY 2015/16 Indonesian paddy production will increase to 36.2 MMT compared to the previous estimate of 35.6 MMT of milled rice equivalent. Considering higher production estimates, Post expects MY2015/16 Indonesian rice imports will decline to 1.8 MMT compared to the initial estimate of 2.0 MMT.
