As per latest report released by USDA, MY 2016/17 milled rice production at a record 106.5 million metric tons (MMT) on higher planted area and normal 2016 monsoon in the major growing states. Planting of rabi (winter planted) rice is also likely to be slightly higher than last year at 4 million hectare compared to 3.9 million hectare last year on improved availability of availability of irrigation water, particularly in south India.

International Market Highlight:

The Philippines paddy rice output is now expected to hit 17.91 million tons in 2016, the lowest in three years and below a July forecast of 18.135 million tons, due to crop losses from an El Niño dry spell and typhoons. The Philippines, one of the world's biggest rice importers, could buy another 250,000 tons of rice in addition to the 250,000 tons purchased recently from Vietnam and Thailand, if it sees a need to boost state buffer stocks. The latest forecast from the Philippine Statistics Authority for output this year is 1.3% lower than a 2015 harvest of 18.15 million tons, which followed record production of 18.97 million tons in 2014.

Thai rice export prices hovered around 13-month lows over the past week, attracting more African buyers and leading to dull trade in Vietnam. Currently Thai benchmark 5 percent broken rice prices hovered in between \$345-\$348 /Ton, free-on-board (FOB) basis, from \$345-\$350 /Ton a week ago when they hit their lowest in 13 months. As per market sources, the rainy season may also have an impact on rice prices, The recent rain will prompt farmers to harvest more rice as they fear that their rice will

get spoiled and this might have an effect on rice prices. The fall in Thai rice prices has raised concerns among Vietnamese exporters of the grain, as their quotations for the 5 percent broken rice stood at \$350/Ton, FOB basis, against \$350-\$355 last week. Thai rice prices are falling and that could attract African buyers while Vietnam could not do anything because their rice stock has been built at an already high cost. As per trade sources, last week African buyers had already switched to rice offered by Thailand and Pakistan.

Unofficial preliminary Thailand rice exports (excluding premium white and fragrant rice) for October 24-30, 2016 totaled 102,618 metric tons, down 50,392 metric tons from the previous week and down 22,399 metric tons from the four-week moving average of 125,017 metric tons. Rice exports from January 1 – October 30, 2016 totaled 3,425,042 metric tons, down 6 percent from the same period last year.

Total rice production in Vietnam for MY 2015/2016 is down about a million tons, due mainly to the impact of drought weather conditions caused by El Nino, which lowered the spring crop production in the Mekong River Delta. However, the planting expansion of the late autumn crop in the Delta, and in other areas has superseded the loss of harvested area. Currently, the annual flooding in the Mekong River Delta is diminished due to dams constructed up-stream.

Bangladesh rice is forecast to fall to 34.51 million tons from an estimated 11.7 million hectares on reduced planting of its summer rice and increased winter rice production, summer rice production was estimated lower at 2.4 million tons due to decreased acreage against the initial expectation due to insufficient irrigation.
