

Domestic Market Highlights:

As per market sources as on 16th December, total paddy arrival in Narela mandi is 80000 bags and 1121 paddy traded at Rs.2665/quintal while 1509 paddy traded at Rs.2450/quintal, Sugandh paddy traded at Rs.2345/quintal and sarbati paddy traded at Rs.1970/quintal.

As per market sources as on 16 December 2016, 1121 paddy arrival in Tarn Taran Mandi is 25000 bags and traded at Rs. 2300-2838/quintal, 1121 paddy arrival is 300 bags at price Rs.3800/quintal.

As per latest report released by ICRA, India's Basmati Rice exports is expected to grow by 10% to Rs 25,500 crore in 2017/18, mainly due to China's decision to open its market to India. In FY17, Basmati Rice export value is expected to remain in line with the FY16 levels; it is expected to grow by 10% cent to Rs 25,500 crore in FY18. China has agreed to import Basmati Rice from 14 companies in India and in the on-going harvesting season the volume of Basmati paddy is expected to be lower than last year. Opening up of China as an export destination is a positive for the Indian Basmati Rice industry. India and China together contribute around 40 per cent of the global Rice production, which is estimated at around 740 million tonnes.

Wholesale Prices for India as an average for 04th week of November traded firmed by 0.36% from last week. Prices are currently hovering at Rs.2825-2830/quintal and 7.36% up from price of Rs.2635Quintal during corresponding period last year. Agriwatch expects rice market to move in firm tone as cash crunch in the market and thus arrival is lower than previous week.

Indian FOB for 1121 steam in the month of November moved firm from last month and currently is in the range of USD 835-836/MT which is up by 4.47% from last month price of 812USD/T. Average basmati rice price too firm even with arrival pressure as aromatic rice production estimates is 25-30% lower than last year, according to the UN's Food and Agriculture Organization (FAO). Currently Pakistani basmati FOB is hovering in the range of USD 823-825/MT which is almost same from last month FOB of USD 825/MT.

India's rice stocks in the central pool as on November 1, 2016 stood at around 31.2 million tons up by about 20.50% from around 25.89 million tons recorded during the corresponding period last year, according to data from the Food Corporation of India (FCI). India's rice stocks in the central pool are up about 88% from around 16.56 million tons recorded on October-01, 2016. The current rice stocks are about one million tons more than the required strategic reserve norms of around 1.25 million tons for this time of the year, according to the FCI.

As per latest report released by USDA, MY 2016/17 milled rice production at a record 106.5 million metric tons (MMT) on higher planted area and normal 2016 monsoon in the major growing states. Planting of rabi (winter planted) rice is also likely to be slightly higher than last year at 4 million hectare compared to 3.9 million hectare last year on improved availability of availability of irrigation water, particularly in south India.

Among the food grains, the inflation for Cereals has increased to 7.23% from the previous month's level of 7.03%, Rice to 4.76% from the previous month's level of 4.08% and Wheat 7.27% from the previous month's level of 6.90%. The inflation for Pulses has decreased to 34.55% from the previous month's level of 35.76%.

As per 01st Advance Estimate released by Union Agriculture Minister, Total production of Kharif rice is estimated at 93.88 million tons which is a new record. This year rice production is higher by 1.1 million tons than previous record production of 92.78 million tons achieved during 2011-12. Production of Kharif rice is also higher by 4.16 million tons and 2.57 million tons over the average production of the last five years and the last year's Kharif rice production respectively.

Price Outlook:-Average Rice price in all India is likely to trade steady tone due to normal demand even with regular arrival.

International Market Highlight:

Sri Lanka is to import over 250,000 tons of rice to maintain a buffer stock sufficient for one and half months owing to a possible shortage of rice during the first quarter of next year, due to drought. The Government has taken a decision to import rice through the private sector and provide bonded warehouse facilities for them as the country's rice production is expected to drop during the drought period. While the private sector will be allowed to freely import rice, there won't be any imports by the government unlike during the previous regime, he pointed out.

Unofficial preliminary Thailand rice exports (excluding premium white and fragrant rice) for November 21-27, 2016 totaled 49,466 metric tons, down 55,567 metric tons from the previous week and down 45,831 metric tons from the four-week moving average of 95,297 metric tons. Rice exports from January 1 – November 27, 2016 totaled 3,834,634 metric tons, down 2 percent from the same period last year.

The Philippines' state grains agency has approved permits for local rice traders to import 641,080 tons of the staple grain from Thailand, Vietnam, Pakistan and India. The approved imports, which must be brought in by Feb. 28, 2017, account for 80 percent of the maximum volume of 805,200 tons that private traders are allowed to bring in under an annual country-specific quota scheme. Private traders will import 284,780 tons of rice from Thailand; 294,020 tons from Vietnam; 56,140 tons from Pakistan; and 6,140 tons from India. Fresh demand from the Philippines, one of the world's biggest rice

buyers, could underpin export prices particularly in Vietnam and Thailand, traditionally its main suppliers. Rice export prices in India and Vietnam weakened last week on thin demand, but still failed to attract buyers, while prices rose slightly in Thailand amid a slowing harvest.

Thai rice export prices hovered around 13-month lows over the past week, attracting more African buyers and leading to dull trade in Vietnam. Currently Thai benchmark 5 percent broken rice prices hovered in between \$345-\$348 /Ton, free-on-board (FOB) basis, from \$345-\$350 /Ton a week ago when they hit their lowest in 13 months. As per market sources, the rainy season may also have an impact on rice prices, The recent rain will prompt farmers to harvest more rice as they fear that their rice will get spoiled and this might have an effect on rice prices. The fall in Thai rice prices has raised concerns among Vietnamese exporters of the grain, as their quotations for the 5 percent broken rice stood at \$350/Ton, FOB basis, against \$350-\$355 last week. Thai rice prices are falling and that could attract African buyers while Vietnam could not do anything because their rice stock has been built at an already high cost. As per trade sources, last week African buyers had already switched to rice offered by Thailand and Pakistan.
