Rice Harvesting of the market year 2016/17 in Pakistan rice crop is complete and initial reports suggest production was 6.6 MMT, down slightly from a year ago. During MY 2015-16, Pakistan exported nearly 4.3 MMT of rice, slightly above the current USDA estimate of 4.2 MMT. **Rice Harvesting of the market year 2016/17 in Pakistan rice crop is complete and initial reports** suggest production was 6.6 MMT, down slightly from a year ago. MY15/16 production is slightly higher based on the latest official data. During MY 2015-16, Pakistan exported nearly 4.3 MMT of rice, slightly above the current USDA estimate of 4.2 MMT.

Sri Lanka is to import over 250,000 tons of rice to maintain a buffer stock sufficient for one and half months owing to a possible shortage of rice during the first quarter of next year, due to drought. The Government has taken a decision to import rice through the private sector and provide bonded warehouse facilities for them as the country's rice production is expected to drop during the drought period. While the private sector will be allowed to freely import rice, there won't be any imports by the government unlike during the previous regime, he pointed out.

Unofficial preliminary Thailand rice exports (excluding premium white and fragrant rice) for November 21-27, 2016 totaled 49,466 metric tons, down 55,567 metric tons from the previous week and down 45,831 metric tons from the four-week moving average of 95,297 metric tons. Rice exports from January 1 – November 27, 2016 totaled 3,834,634 metric tons, down 2 percent from the same period last year.

The Philippines' state grains agency has approved permits for local rice traders to import 641,080 tons of the staple grain from Thailand, Vietnam, Pakistan and India. The approved imports, which must be brought in by Feb. 28, 2017, account for 80 percent of

the maximum volume of 805,200 tons that private traders are allowed to bring in under an annual country-specific quota scheme. Private traders will import 284,780 tons of rice from Thailand; 294,020 tons from Vietnam; 56,140 tons from Pakistan; and 6,140 tons from India. Fresh demand from the Philippines, one of the world's biggest rice buyers, could underpin export prices particularly in Vietnam and Thailand, traditionally its main suppliers. Rice export prices in India and Vietnam weakened last week on thin demand, but still failed to attract buyers, while prices rose slightly in Thailand amid a slowing harvest.

Thai rice export prices hovered around 13-month lows over the past week, attracting more African buyers and leading to dull trade in Vietnam. Currently Thai benchmark 5 percent broken rice prices hovered in between \$345-\$348 /Ton, free-on-board (FOB) basis, from \$345-\$350 /Ton a week ago when they hit their lowest in 13 months. As per market sources, the rainy season may also have an impact on rice prices, The recent rain will prompt farmers to harvest more rice as they fear that their rice will get spoiled and this might have an effect on rice prices. The fall in Thai rice prices has raised concerns among Vietnamese exporters of the grain, as their quotations for the 5 percent broken rice stood at \$350/Ton, FOB basis, against \$350-\$355 last week. Thai rice prices are falling and that could attract African buyers while Vietnam could not do anything because their rice stock has been built at an already high cost. As per trade sources, last week African buyers had already switched to rice offered by Thailand and Pakistan.
