International Market Highlight:

In a recent tender, Iran purchased about 40,000 tons of rice from Thailand which indicates that sanctions have been lifted. According to Thailand authorities, in late January that they had secured a deal to sell rice to Iran for the first time in 10 years, with delivery of 50,000 to 100,000 tons of white rice due over the next one to two months. About 300,000 tons in shipments would be made in total. The Iranian state grains buyer GTC bought Hom Mali grade A rice from Thailand at about €600 (US\$645) a ton. The rice was for shipment between April 15 and May 15 to Bandar Imam Khomeini or Bandar Abbas ports.

Mexican rice production for MY2017/18 (October-September) is forecast to reach 290,000 MT (rough rice) due to additional harvested area in the southeast region (mainly Campeche and Veracruz), as well as in the state of Nayarit. This year's rough rice production level converts to 199,000 MT of milled rice. According to private sources, the main factor driving this increase in harvested area is the governmental support program announced last July 2016 (see 2016 GAIN Report MX6031 "Wheat, Corn, and Sorghum Estimates Down Slightly; New Rice Program Announced"). Increased planting of new certified long grain variety seeds and the use of new cultivation technological package, based on the Brazilian model, will also contribute to the production increase. The National Rice Product System industry group stated that the adoption of this new technological package in the last couple years has allowed slight production and productivity increases in several planting areas.

Thailand Unofficial preliminary rice exports (excluding premium white and fragrant rice) for February 27 – March 5, 2017, totaled 39,166 metric tons, down 99,799 metric tons from the previous week, and down 92,910 metric tons from the four-week moving average of 132,076 metric tons. Rice exports from January 1 – March 5, 2017, totaled 1,280,409 metric tons. Export prices declined 1-2 percent following the sale of 1.3 million metric tons of government foodquality rice stocks. The government is likely to retender the remaining food-quality rice stocks and issue a new tender for feed-quality rice stocks by the end of March 2017.

According to the Thai Custom Department, rice exports totaled 9.9 million metric tons in 2016, up around 1 percent from 2015 (Figure 1.3). This is due to a surge in

fragrant rice exports which increased 19 percent from last year to reach 2.4 million metric tons. Meanwhile, parboiled rice exports declined to 2.1 million metric tons, down 10 percent from last year due to tight supplies caused by reduced 2016 off-season rice production. Also, white rice exports declined slightly to 5.4 million metric tons as the government suspended sales of rice stocks from September to December in 2016.
