

Domestic Market Highlights:

Paddy acreage is likely to be around 30 lakh hectares during current kharif season in Punjab, which has the highest contribution of rice in the central pool. From June 20 onwards, in Punjab, paddy transplanting started accordingly. The state government had asked the farmers not to transplant it before this. Last year there was about 30.65 lakh hectares of farming under paddy. Typically paddy transplant starts in Punjab from June 15 but due to lack of water, the state government had announced to start transplanting it from June 20 this year. Agriculture department officials say that in the process of transplantation, delay of 5 days will save about 24 lakh liters of water in Punjab. But it is understood that in some parts of the state, farmers have started transplanting the paddy before 20th June while ignoring the government directive. The Agriculture Department also took action against such a few farmers. Under this, action has been taken against farmers in Barnala, Sangrur and Bhatinda districts. In some places the sown crop was destroyed. In fact, the Agriculture Department is suggesting the farmers that a lot of moisture may be present in the cropped rice crop before June 20, which could hinder its government procurement. Alongside this, farmers have been advised not to cultivate paddy varieties that are suitable for long periods, including Pusa 44. Instead, farmers are being encouraged to cultivate paddy of PR 12-, 14 and 16 varieties.
