- **Indian rice exporters have a sum of nearly Rs.1, 000 crore stuck mainly because an Iranian importer has defaulted on payments due for aromatic rice exported to the Gulf country. The All India Rice Exporters' Association (AIREA) admitted that there was a fraud by an Iranian company, but said the things are being sorted out with the both governments seized of the matter. In 2017-18, Iran imported 8, 77,422 tons of basmati worth Rs. 5,830 crore, according to the official data. Price Outlook: -Rice prices are expected to trade steady in Last week of July with the normal domestic demand across the country. However, prices during the last quarter of MY 2017-18 will largely depend on the progress of 2018 monsoon and the impact on MY 2018-19 rice planting.

International Market Highlight:

- **Rice exports from Pakistan during first month of current financial year grew by 2.85 percent as compared the** corresponding month of last year and about 212,518 metric tons of rice worth US\$ 110.966 million exported as against the exports of 190,455 metric tons valuing US\$ 107.893 million of same period of last year. - **For marketing year (MY) 2018/19 (May to April), forecast for Bangladesh total rice area and production levels** are revised downward to 11.6 million hectares and 34.4 million tons respectively based on marginal production loss in Boro rice (planted in December/January) due to heavy downpours in harvesting season and lower Aus rice harvested area due to expected flooding in this current monsoon season.
- **Vietnam's rice exports in the first seven months of this year brought home 2 billion USD, rising 32 percent** against the same period last year. From January to July, the country sold 3.86 million tons of the grain abroad, a year-on-year increase of 12.8 percent. In the first six months of the year, China remained the largest importer of Vietnamese rice with 1.13 million tons, followed by African market with 537,000 tons, the Philippines with 429,000 tons, Indonesia with 776,000 tons, and Malaysia with 305,000 tons.
- **The 2017/18 Indonesia harvested area for rice is estimated to decline slightly to 12.2 million hectares due to increased** corn plantings. Production for 2017/18 is estimated to remain at 37.0 million tons of milled rice equivalent as a result of better yields due to fewer incidents of pest and disease and increased use of higher yielding varieties. To replenish stocks, Government of Indonesia (GOI) is expected to continue issuing authorizations for importing rice to state-run procurement agency BULOG. Rice imports for 2017/18 are estimated to increase significantly to 2.0 million tons, over 2016/17 imported volumes.

- **MY 2017/18 Brazil imports are forecast at 650,000 metric tons (MT), virtually unchanged from MY 2016/17 levels.** The vast majority of Brazil's rice imports come in duty-free from its MERCOSUL neighbors: Paraguay, Uruguay, and Argentina, with nearly 60 percent of MY 2016/17 imports coming from Paraguay alone. MY 2018/19 imports are forecast at 725,000 MT to account for a small uptick in consumption based on population growth.
