

Domestic Market Highlights:

- **Due to the stability in production and increase in consumption, the global outstanding stock of rice is likely** to be reduced from 12.60 million tons in the year 2018-18 season to 12.40 million tons at the end of the 2018-19 season. Out of the five top exporting countries - India, Thailand, Vietnam, Pakistan and USA, the outstanding stocks of rice will be presently combined with 310 million tons. The majority of this is that 229 lakh tons is expected to be available in India.
- **Under the guidelines of Environmental Pollution (Prevention and Control) Authority, nearly 500 rice mills of Haryana, Uttar Pradesh and Rajasthan will have to close their business** from 4th November.
- **India's 2018-19 (Oct-Sep) basmati rice output at 5.31 million tons, down 6% from 5.64 million tons in the** previous year. At 5.31 million tons, basmati rice output projection for 2018 is lower than the industry estimate of 5.56 Million tons. According to a crop survey report, conducted by Agricultural and Processed Food products Export Development Authority, the fall in basmati rice output this year was because of a decline in acreage due to crop shift in key growing regions. Total acreage under the notified varieties of basmati rice has declined around 2.48% on year to 1.52 million tons.
- **1121 Paddy arrival in Jind mandi is down by 76% from last year to 29185 quintals as on 30th Oct 2018**, PR paddy is also down in the mandi by 58% from last year arrival of 38269 quintals to 15835 quintal this year where as 1509 paddy arrival is higher than last year arrival of 55317 quintal to 107920 quintals this year. Arrival of Duplicate basmati in Pundri mandi is higher this year by 207% from 1130 quintal in 2017 to 3475 quintals in 2018.
- **Basmati paddy price is ruling around 20% higher in India compared with last year due to the depreciating rupee**, the government's decision to increase the minimum support price for non-basmati rice and a low carryover stock. The price is likely to firm up further as sentiment from global markets is positive and traders are keen to replenish stocks. The price is likely to firm up further as sentiment from global markets is positive and traders are keen to replenish stocks.
- **China recently sanctioned 4 more Indian Rice mills / companies to export rice. Now, 24 rice millers can export** non-basmati rice to China. China is one of the largest rice producing and consuming countries in the world and imports 5 million tons of rice annually. India can export one million tons of rice to China. India has become the world's largest exporting country by exporting 127 million tons of rice. During the visit of Prime Minister of India to China, the two countries had compromised on rice imports, after which the first shipments of 100 metric tons from Nagpur to China came out in November. If the pesticide in exported rice is done according to excise standards then it will be good news for rice markets.
- **Due to the all-round active buying of paddy, the prices touched the sky. Small Rice Millers are in a state** of distress and confused by seeing this fast that they do not buy or buy paddy. The fastest firmness came in the fine paddy, the production of fine rice this year, half of last year and the end of the old stock got support. The other paddy also caught the speed of the fine rice arrival.
- **In the domestic division, the prices of basmati paddy are high; especially Punjab and the farmers are getting** better earnings. Demand for Indian basmati rice is being revived in the global market due to which the millers and exporters are showing good interest in procurement of

this paddy. Basmati rice prices in Haryana's mandis have reached this level of Rs 3,700 per quintal, which is about 30 percent higher than last year.

- **Despite the increase of paddy, the prices of paddy are going up fast. Whatever the paddy arrival are coming** in the market, rice millers are buying it in greater quantity. With the possibility of lower production of paddy and the old stock was reduced, rice mills came in all round purchase. This is the half of the paddy arrival in comparison to the previous year due to which the prices of paddy remained steady to firm. 1121 paddy price is likely to touch Rs.4000/quintal in coming month.
- **Saudi Arabia eased the rules of rice imported from India and said that India will have to reduce the level of pesticide** in rice in the future. This issue was discussed in a high-level meeting between India and Saudi Arabia last week. This is good news for rice markets.

International Market Highlight:

- **Iran has sold 74 tonnes of rice to Canada, marking the first export of the crop since the Islamic Republic in 1979.**
- **As per latest report by USDA, Bangladesh rice production estimate for marketing year (MY) 2018/19 (May-April)** is revised slightly upward to 34.5 million metric tons (MMT) based on increased Aus rice production. It is raised for MY 2018/19 rice imports to 0.8 million metric tons based on slightly increased demand until the next Aman rice harvest. Based on the latest official data, in MY 2018-19, Aus rice area and production estimates (May-April) are revised up to 1.1 million ha and production of 2.4 MMT. Aman rice cultivated area and its production forecast are marginally revised to 5.8 million ha and 13.2 MMT, assuming optimal growth and normal yield.
- **The TY 2017/18 (Jan-Dec) Bangladesh rice import forecast is lowered to 1.7 MMT from old post's estimate** based on weak import pace after imposing a higher import duty on rice in the July budget for FY 2018-19. According to official sources, 1.626 MMT of rice was imported in the period January to September, 2018. Imports in Jan-June were 1.557 MMT, and from July to September it was 0.68 MMT. In MY 2018/19, the rice import forecast is raised to 0.8 MMT from old post's estimate following yearly average imports.
- **Thailand Rice export prices declined 1-2 percent due mainly to the weakening Thai baht which declined** to 32.73 baht/U.S. \$1.00 from 32.08 baht/U.S. \$1.00 over the past week. The weaker Thai baht will help Thai rice to better compete with Vietnamese and Indian rice on the new Philippine tender for 250,000 metric tons of 25 % grade white rice to be issued October 18, 2018. Traders expect strong competition for this public tender as the shipment will take place in November 2018 when new-crop rice supplies are entering the market. Unofficial and preliminary rice exports (excluding premium white and fragrant rice) for September 24-30, 2018, totaled 187,224 metric tons, down 4,402 metric tons from the previous week and down 11,366 metric

tons from the four-week moving average of 198,590 metric tons. Rice exports from January 1 – September 30, 2018 totaled 7,126,897 metric tons.

- **Hom mali fragrant rice production for the 2018-19 main crop is expected to drop 10% from the previous season** because of drought in the North and Northeast. As a result, paddy production for the annual harvest season, which starts later this month, will decline from 7.6 million tonnes in the previous season. Last year's premium rice production also fell from 7.9-8 million tonnes of paddy in previous years because of the impact of floods. Overall rice production will stay at around 25 million tonnes of paddy rice this year, on par with the previous season, boosted by white paddy and glutinous paddy production. White paddy production is estimated at 9.2 million tonnes, a marginal rise from the previous season, while glutinous paddy production is predicted to rise to 6.2 million tonnes from 6 million.
- **The National Food Authority of the Philippines has issued an invitation to a tender, expected to take place on October 18, for importing 250,000 tons of 25% broken rice under government-to-private (G2P) contracts, according to the Vietnam Food Association in an announcement to local food traders.**
- **MY 17-18 Philippines rice production is revised downwards to 19.4 million tons (paddy) based on the latest estimates from the PSA.** Like corn, rice production in the second quarter of 2018 declined 1.4 percent from the previous year's level as area harvested and yields were lower by 1.5 percent and 0.1 percent, respectively, due to early plantings in some areas. Output during the July-September 2018 period will again likely decline 2.0 percent compared to the previous year's level as area harvested and yields are estimated to drop by 2.8 percent and 0.9 percent, respectively.
- **Rice exports from Pakistan during first month of current financial year grew by 2.85 percent as compared the corresponding month of last year** and about 212,518 metric tons of rice worth US\$ 110.966 million exported as against the exports of 190,455 metric tons valuing US\$ 107.893 million of same period of last year. During the month of July, 2018, about 37,661 metric tons of basmati rice worth US\$ 34.832 million exported as compared the exports of 31,433 metric tons valuing US\$ 33.91 million of the corresponding month of last year.
- **Iraq's state grains board said on Thursday it had purchased a total of 60,000 tons of rice in an international tender, which closed this week.** Traders said separately some 30,000 tons of rice was purchased from the United States at around \$655 a ton c&f free out.
- **The 2017/18 Indonesia harvested area for rice is estimated to decline slightly to 12.2 million hectares due to increased corn plantings.** Production for 2017/18 is estimated to remain at 37.0 million tons of milled rice equivalent as a result of better yields due to fewer incidents of pest and disease and increased use of higher yielding varieties. To replenish stocks, Government of Indonesia (GOI) is expected to continue issuing authorizations for importing rice to state-run procurement agency BULOG. Rice imports for 2017/18 are estimated to increase significantly to 2.0 million tons, over 2016/17 imported volumes.
