from 562,237 tonnes in the same period last year. Decline is due to the lack of stockpiles and competition with neighboring countries.

- **Indonesian Rice imports for 2017/18 are estimated to reach 2.15 million tons, based on realized imports of** state owned purchasing and logistics agency BULOG. Ample stocks will lead to lower imports of 800,000 tons in 2018/19. According to Global Trade Atlas, during the period of January to September 2018, Indonesia sourced the imported rice from Vietnam (36 percent), Thailand (34 percent), Pakistan (17 percent), and India (11 percent). As of September 2018, BULOG had distributed 960,000 tons of rice under rastra and 381,000 tons of rice under market operations. Continuing market sales for the final quarter of 2018 along with rastra allocation for December are estimated to leave BULOG with 2.2 million tons of rice stocks at the end of 2018. Under normal rastra distribution and market operations this level of stocks should be sufficient to sustain BULOG until the first harvest of 2019, without need for imports.
- **On November 13, 2018, Statistics Korea (KOSTAT) released its revised 2018 rice production estimate of 3,868,045 metric tons**, representing a minor decrease (7,000 MT) from the recent update of PSD (KS1837) due to unfavorable weather developments during planting and growing stages that resulted in a lower rice yield of 5,244 kg per hectare (ha), down 0.4 percent from 2017. The PSD has been revised accordingly.

The first shipment totaling 250,000 metric tons will be delivered in December 2018 and the remainder in January 2019. Traders expect that around half of the shipments will be the Thai origin white rice. In Vietnam, the news media reports that 118,000 metric tons will come from Vietnam. The remainder will be white rice from other origins, including Pakistan and India. Unofficial and preliminary rice exports (excluding premium white and fragrant rice) for November 12- 18 totaled 158,941 metric tons, up 2,426 metric tons from the previous week and up 1,587 metric tons from the four-week moving average of 157,354 metric tons.
