- **India's rice exports during 2018-19 financial year dropped 7.2% to 11.95 million tonnes, according** to latest data from the Agricultural and Processed Food Products Export Development Authority (APEDA). The drop was mainly due to poor demand for non-basmati rice from Bangladesh and African countries, adding exports of non-basmati rice fell 14.5 percent from a year ago to 7.53 million tonnes. Exports of basmati rice, however, rose 8.8% to 4.41 million tonnes during FY 2018-19 from 4.05 million tonnes a year earlier.

Exports of** non-basmati rice decreased 13.6% compared to last year to 67.11 lakh tonnes which was 77.66 lakh tonnes from April to February last year. On the other hand exports of basmati rice increased by 6.5% to 38.55 lakh tonnes. Overall rice exports, compared to last year, exports were down by 7.2% to 105 lakh tonnes.
- **Despite the decline in exports compared to last year, due to the normalization of production and the** huge availability of rice in the central pool, due to the decrease in the paddy arrival in amndis, market has started accelerating.

Industry is concerned as India is an importer of crude oil from Iran and any sanction on Iran can impact trade of other commodities India export. India annually exports 30 million kg of tea and one million tonnes of basmati rice to Iran. Iranian

India's 5 percent broken parboiled variety was quoted around \$377-\$380 per tonne, down from last week's \$387-\$390. Demand from African buyers was weak as they have ample inventories. Additionally, exporters are securing white and parboiled rice supplies for contracted shipments, particularly to African and Middle Eastern markets. This export demand for both white and parboiled rice caused further increase in farm-gate prices of white paddy rice by around 3 percent from the previous week.
