

Domestic Market Highlights:

- **The monsoon revives in Telangana sharply from the last 10 days. Farmers increased Kharif crop sowing speed.** 10 days ago the rainfall in Telangana was around 60-70% less than the average which is now comes to 19% only. However, paddy area is still lag behind from last year area of 5.87 lakh hectares which was reduced to 3.16 lakh hectares in MY-2019-20. On the same hand, area under paddy in Major states like Andhra Pradesh lag behind by 34% from 7.25 lakh hectares to 4.81 lakh hectares this year, West Bengal paddy area down by 39% from last year area of 16.91 lakh hectares to 10.33 lakh hectares.
- **Despite the recovery of the monsoon in July, the pace of Kharif crops continues to lag behind last year.** As per the latest Kharif crop acreage report released on 2nd Aug-2019, Rice acreage has declined by 12.50 per cent at 223.53 lakh hectares as compared to 255.48 lakh hectares same period last year. Higher acreage is done in Madhya Pradesh (12.22 lakh hectares), Maharashtra (5.93 lakh hectares), Nagaland (2.08 lakh hectares) and Tamil Nadu (1.13 lakh hectares). While, lower acreage is reported from major states such as West Bengal (6.00 lakh hectares), Bihar (18.57 lakh hectares), Uttar Pradesh (47.78 lakh hectares), Odisha (16.61 lakh hectares), Assam (12.90 lakh hectares), Chhattisgarh (28.66 lakh hectares), Jharkhand (4.68 lakh hectares, Haryana (12.08 lakh hectares).
- **Due to delayed arrival of monsoon in Andhra Pradesh and the decrease in the rainfall, kharif crops are being interrupted.** This year, till July 31, total area of Kharif crops reached 13.85 lakh hectares, whereas in 2018 it reached 19.15 lakh hectares and in 2017 it was 17.55 lakh hectares. For the current kharif season, the normal average area is estimated to be 38.30 lakh hectare, whereas the State Government has fixed the target of sowing of kharif crops in 42.05 lakh hectares. According to the latest data of State Agriculture Department, this year, the area of paddy in Andhra Pradesh dropped from 7.25 lakh hectares to 4.80 lakh hectares compared to last year.
- **Due to the record production and high MSP compared to open market prices, government rice procurement** during the ongoing season has continued to grow. Government estimates MY 2018-19 rice procurement through July 30, 2018 at 43.91 MMT compared to 36.5 MMT during the same period last year. With some additional procurement in eastern and southern states to continue through September, total MY 2018-19 rice procurement is likely to cross a record 44 MMT, a whopping 15 percent increase over last year's record procurement.
- **Barrier to Transplantation of Paddy by the Lack of Rainfall in the Coastal Districts of Karnataka:** In the coastal districts of Karnataka, due to lack of rainfall, paddy cultivation has been possible in only 40 percent of the area as compared to the target of these three districts. On the other hand, there are signs of monsoon activity going up in the last 10 days, which is expected to accelerate the pace of transplantation of paddy. Kharif crop-paddy cultivation is being badly affected here. Water crisis is particularly serious in Southern Kannada, Udupi and North Kannada districts. Monsoon has received 19 percent less rain in this area.
- **Due to the Defaulter of Iranian importers, there may be a huge loss to Indian rice Exporters.** Being a defaulter of Iran's leading rice importer company, payment of 1000 crores (\$ 14 million) of many Indian rice exporter firms has been hanging in the balance. It is understood that the Iranian company has filed an application for declaring itself as bankruptcies, which has questioned the expectations of the payment recovery. Payment of Indian exporters is stuck on some other Iranian firms too.

- **Paddy crop in Thailand is affected by drought, while the crop in Bangladesh is battling floods and around 50,000 hectares** paddy area has been affected due to flood. According to the Thailand Meteorological Department, the rainfall is the lowest in the last 10 years; and thus the paddy production may have an impact. This year Thailand has targeted to export 9 million tonnes, which is less than 5 lakh tonnes from the first target given this year. There is also the possibility of the reduction of sowing area in India due to poor monsoon.
- **Farmers are disturbed by the lack of rainfall in the major paddy producing areas of West Bengal, Hubli, Vardhaman, Midnapore and Bankura.** Transplanting of paddy has not started yet in many areas. Transplanting of paddy in West Bengal usually starts at the end of May but this year, due to lack of water, sowing is getting delay. West Bengal produces 200-250 lakh tonnes of paddy per year. This year the West Bengal government can purchase 56 lakh tonnes of paddy. Bangladesh cannot import rice from West Bengal due to hike in import duty on rice by 28% by the country.
- **In the absence of monsoon, Chhattisgarh is once again becoming dry like situation. With fewer monsoons, paddy** cropping was not done in 50% of the area of Chhattisgarh. Durg and Rajnandgaon districts are battling shortage of water. Rainfall in the state so far 24% less than normal. If the rain does not rain at the right time, the productivity of crops especially paddy in Chhattisgarh can fall.
- **15,000 farmers of Haryana, who were producing traditional paddy for the last 20 years, sown maize** instead of paddy this year. Paddy has been sown in 6.8 lakh hectares in Haryana till July 18, which was 10.6 lakh hectare last year. About 23 thousand hectares of maize has been sown, which was 21 thousand hectare last year.
- **The Government has announced to increase the MSP of normal grade paddy by 65 rupees to 1815** and 'A' grade Paddy MSP of 1835 rupees per quintal. MSP increased in paddy, not according to expectation. The government does not want to encourage paddy sowing to see the water crisis. Increasing the MSP will not affect the prices of paddy.

International Market Highlight:

- **Rice production in India's eastern neighbor, Bangladesh is likely to be better than the previous season.** Data from the Bangladesh-based representative of the US Department of Agriculture (USDA) shows that paddy and rice production will be better in the 2019-20 season than in the 2018-19 season, which will help it reduce rice imports. Paddy area in Bangladesh is expected to decrease from 117.70 lakh hectare in 2018 to 117.30 lakh hectare in 2019 but its average productivity is expected to increase from 4.45 tons per hectare to 4.50 tons per hectare. As a result, the production of paddy there is expected to improve from 523.70 lakh tons to 528.05 lakh tons and milled rice production from 349.10 lakh tons to reach 352 lakh tons. However, after this estimate, torrential rains caused severe flooding in Bangladesh, which poses a serious threat to the paddy crop area at least 50 thousand hectares of land, but still there is a good rice production estimates which could fulfill the domestic demand in this season and thus import of rice would likely to go down.
- **Thailand Rice export prices increased around 1 percent from the previous week due mainly to concerns** about the Thai baht which appreciated to 30.7 baht/U.S. \$1.00 from the previous week's exchange rate of 30.8 baht/U.S. \$1.00. Additionally, the government has not yet finalized the results of the rice tenders for 208,650 thousand metric tons which were issued on July 25, 2019.

The government reported that around 60 traders participated in these tenders: (1) 29 traders for the tender of 82,444 metric tons of food quality rice, (2) 21 traders for the tender of 74,350 metric tons of feed quality rice, and (3) 15 traders for the tender of 51,856 metric tons of deteriorated rice. The rice stocks for sale, which were acquired during MY2011/12 and MY2012/13 pledging programs, had been previously auctioned off, but remain unsold due to concerns over quality. Rice Export Update Unofficial and preliminary rice exports (excluding fragrant rice) for July 15-21, 2019 totaled 77,789 metric tons, down 61,094 metric tons from the previous week and down 19,099 metric tons from the four weeks moving an average of 96,888 metric tons. Rice exports from January 1 – July 21, 2019, totaled 3,660,769 metric tons, down 28 percent from the same period last year.

- **Restrictions will be imposed on rice cultivation in Iranian provinces other than the two Northern provinces** of Gilan and Mazandaran. According to deputy agriculture minister for water and soil affairs, the decision has been made by the Cabinet and conveyed to provinces across the country for implementation.
- **In the international market, India's 5% broken parboiled rice was quoted around \$371 - \$374 per tonne this week**- down from last week's \$373 - \$376. Aggressive selling of old inventories by China was reported to weigh on the global prices.
- **Bangladesh has postponed a decision on lifting its ban on rice exports** until the completion of summer rice harvest as cyclone Fani is estimated to have partially damaged the summer sown "Boro" crop on 55,600 hectares of land.
- **Egypt is seeking to buy at least 20,000 tonnes of 10-12 percent broken rice for delivery between July 25 and Aug. 20**, a source with Vietnam's Ministry of Industry and Trade was reported saying.
- **Ivory Coast banned rice imports from Singapore-based commodity trader Olam International for one year** after destroying an 18,000-tonne shipment of spoilt.
