

## **Domestic Market Highlights:**

- Chhattisgarh government can declare a bonus of Rs 685 per quintal on the government procurement of paddy in the current season, this purchase will start from October 1. The Central Government had declared MSP of Common Grade Paddy at Rs 1815 per quintal, after a bonus of Rs 685, the purchase price will be Rs 2500 per quintal. Which is equal to the previous year. Last year, the state government announced a bonus of Rs 750 per quintal in December. 39.7 lakh tonnes of paddy was procured from Chhattisgarh in 18-19 which was 32. 17lakh tonnes during 17-18. If the government buys at this price, then even the mandis of Chhattisgarh will have to buy paddy at high prices, which is not good news for exporters.
- Government Procurement of Rice Likely to Fall Behind Fixed Target: The central government has set a target of procuring 416 lakh tons of rice in the 2019-20 kharif marketing season, while the actual purchase is likely to be much lower, paddy production is likely to decrease in states like Punjab, Andhra Pradesh, Karnataka and Maharashtra this time compared to last year. The new Kharif marketing season for government procurement of rice is going to start from 1 October 2019. According to official sources, due to the severe floods in Punjab and Maharashtra in recent times, the standing paddy crop in the fields is expected to be damaged. In some parts, the entire crop is being reported to be ruined. A similar situation has arisen in some areas of Karnataka. Paddy production in Andhra Pradesh is likely to decrease this time due to dry weather during planting season. Till last week, the paddy area in the state reached only 11 lakh hectares, which was 11.3 percent less than the previous year. Despite this, the target of purchasing 40 lakh tonnes of rice has been set there, whereas in 2018-19, this purchase could reach only 29.60 lakh tons in Andhra Pradesh.
- High prices cut non-Basmati rice exports 37%: Rising domestic rice prices have affected exports
  this year with shipment of the non-Basmati variety falling about 37 per cent or 10 lakh tonnes,
  over the previous year. According to APEDA data, 17,06,891 tonnes of non-Basmati rice were
  exported in April-July of FY20 against 26,94,827 tonnes in the same period of FY19. The nonBasmati rice exports have declined around 9.88 lakh tonnes or 36.66 per cent.
- Top-exporter India's 5% broken parboiled variety rose to \$370-\$376 per ton from \$369-\$374 a week ago, amid good demand from African nations and a resurgent rupee. Local paddy supplies are limited and prices are firm, forcing exporters to increase rates, the rupee rose to an over three-week high on Thursday. The country's rice exports in April-July, however, had plunged 26.5% from a year ago to 3.14 million tons.
- As per the Ministry of Agriculture, current Kharif Rice acreage as on 13th September 2019 declined by 2 per cent at 374.09 lakh hectares as compared to 381.75 lakh hectares last year same period. Higher acreage under Rice is reported from Madhya Pradesh (24.60 lakh hectares), Telangana (11.67 lakh hectares), Odisha (37.17 lakh hectares), Chhattisgarh (38.14 lakh hectares), Uttar Pradesh (60.05 lakh hectares), Haryana (13.05 lakh hectares), Lower acreage is reported from Bihar (27.72 lakh hectares), Jharkhand (13.57 lakh hectares), West Bengal (39.83 lakh hectares), Karnataka (7.00 lakh hectares), Tamil Nadu (3.02 lakh hectares), Andhra Pradesh (12.38 lakh hectares), Manipur (0.58 lakh hectares), Punjab (29.20 lakh hectares).
- In Andhra Pradesh, by September 11, the rainfall was 19% below average. Till September 11, Kharif crops were sown on 30 lakh hectare in Andhra Pradesh which was 32.53 lakh hectare last

- year. Paddy sowing reached 12.38 lakh hectare as on September 11 in Andhra Pradesh which was 13.5 lakh hectare last year.
- The Madhya Pradesh government has set a target of purchasing 50 lakh tons of paddy in the current marketing year and farmers will also be given an additional amount of Rs 20 per quintal for cleanliness of paddy.
- Basmati paddy prices strong despite uncertainty in global rice trade: Domestic market price of basmati paddy remains strong at present due to factors like the last outstanding stock being very low and the basmati rice exports being excellent during the last financial year, otherwise the price should fall due to the current environment of uncertainty in global trade.
- One of the major rice producing states, Andhra Pradesh exported around 2.934 Million tons of rice in MY-2018-19 which is down by 1.2% from last year rice export of 2.971 million tons. Kakinada port is the major export source in Andhra Pradesh which contribute around 60-70% of total export followed by Visakhapatnam Sea and Krishnapatnam Sea.
- Uttar Pradesh has set a target of procuring 50 lakh tonnes of paddy at MSP. Last season, 48.25 lakh tonnes of paddy was purchased from Uttar Pradesh, this purchase will start from October 1 and continue till February 28.India's rice exports in April-July plunged 26.5% from a year ago to 3.14 million tonnes, as demand for non-basmati rice was subdued from African buyers.
- Due to the record production and high MSP compared to open market prices, government rice procurement during the ongoing season has continued to grow. Government estimates MY 2018-19 rice procurement through August 23rd, 2019 at 44.19 MMT compared to 36.4MMT during the same period last year. With some additional procurement in eastern and southern states to continue through September, total MY 2018-19 rice procurement is already crosses the record of 44 MMT, a whopping 15 percent increase over last year's record procurement.
- According to the August report released by IGC, the production of rice in the world is estimated
  to be 501 million tons, the world will be trading 460 million tons of rice this year, after consuming
  496 million tons, the outstanding stock of 1780 lakh tons of rice will be left for next year carry
  over stock.

## **International Market Highlight:**

- Sri Lanka has raised a paddy (rough rice) output from both cultivation seasons in 2019 to 4.613 million metric tons up 5.5 percent from an earlier estimate, and up 17 percent from last year. In the ongoing Yala season, 1,540 paddy is forecast to be produced after crop damage, up from a earlier forecast of 1.47 million metric tonnes. This year's Yala forecast is around the same as 1.53 million metric tonnes produced in 2018. After wastage and seed paddy needs, 1.38 million tonnes of paddy will be available for milling from the Yala crop. About 940,000 metric tonnes milled rice will be available for consumption. The final main Maha rice output is now estimated to 3.073 million metric tonnes up 28 percent from last year and 5.9 percent higher from a preliminary estimate. For the full year 4.613 million metric tonnes of paddy and 2.88 million metric tonnes of milled rice would be available.
- Myanmar earned more than US\$120 million from exporting over 450,000 tons of broken rice in 11 months this fiscal year but the amount fell by over US\$14 million when compared to the same period of last year as over 17,000 tons were reduced this year, From October 1 to August 30 in the current 2018-2019 fiscal year, 459,927.860 tons of broken rice worth US\$122.392 million. In the same period of last fiscal year, US\$136.510 million was earned from export of

477,017.635 tons of broken rice. Therefore, this year saw a fall of 17,089 tons worth over US\$14.188 million. Myanmar exports broken rice mainly to Belgium, Indonesia, China, the Netherlands and Britain, according to Myanmar Rice Federation.

- An official report showed that 132,947 tons of milled rice have been exported from Cambodia to China in the starting 8 months of 2019, having a 54 percent rise from the same time frame of the previous year. Rice Export from Cambodia showed that China remains the top buyer of Cambodian rice during the period. The exports to China made up 39 percent of the total rice exports in Cambodia. 120,061 tons of rice was shipped from Cambodia to the European market, having a 47 percent decrease. The European Union (EU)'s market share for Cambodian rice had gone down from 52 percent to 35 percent. According to the report, Cambodia exported a total of 342,045 tons of rice to 51 countries and regions during the first eight months of this year, up only 0.1 percent over the same period last year.
- Farmers in South-East Asia- farmers are worried about the regular fall in the price of plant rice in the Philippines and are being forced to cut the paddy production area. The area under paddy declined by 1.87 percent while the average yield rate of the crop also decreased by 4 percent. An official statement of Manila said that in 16 of the 16 producing regions of the Philippines, production of plant paddy declined in 13 areas. Production of paddy in Mimaropa Division, Bicol and Western Visayas decreased by about 51 thousand tonnes. Mimaropa Division consists of four provinces Mindoro, Marinduk, Romblon and Palawan. Paddy-rice production has increased in only three divisions of Jambonga Peninsula and Northern Mindanao.
- Thailand Rice export prices further increased around 3 percent from the previous week due to strong export demand for white rice, particularly to Malaysia. Large exporters are reportedly securing new-crop white rice supplies to fulfill contracted shipments with the Malaysian government. These contracted shipments which will take place in the latter half of August have put upward pressure on the domestic price of white rice. The government is proposing for cabinet approval this week to replace the Paddy Rice Pledging program with the Paddy Rice Price Guarantee program for MY-2019-20 main crop rice. The government previously implemented this program during MY-2009-2010 MY-2010-11. This year the proposed guarantee prices of white paddy rice are approximately 30 percent above current market prices. Meanwhile, the proposed guarantee prices of other rice varieties are mostly lower than current market prices. The eligible tonnage will vary by rice varieties based on the average yield of paddy rice production from a maximum acreage of 40 rai (6.4 hectares) per household. Farmers will directly receive this compensation when market prices are lower than the guarantee prices.
- Philippine's rice stocks inventory for July increased by more than 31 percent from year-ago levels as more imports came in following the passage of the rice tariffication law. The country's rice buffer during the period reached 2.62 million metric tons (MT), exceeding the previous year's level of 1.99 million MT and enough to meet the country's daily requirement for 81 days. Of the total inventory, 41.9 percent came from commercial warehouses while 38.4 percent were in the households. NFA depositories contributed 19.7 percent of the total stocks, a majority of which were imports commissioned by the agency last year. A total of 967,000 MT of rice had passed through the Bureau of Customs since the passage of the rice tariffication law, generating about

P5.89 billion in taxes. That number is expected to swell as the country enters the lean months when local rice harvest is almost nil.
