

Domestic Market Highlights:

- Indian wholesale rice price increased slightly from last week as arrival of fresh crop is around 15-20 days away and demand of local millers is normal, meanwhile increasing in MSP of common paddy and grade "A" paddy would not allow to pressure on paddy as well rice prices. Agriwatch expects that rice prices will move steady in coming week.
- Indian rice export prices rose this week on a resurgent rupee, while sluggish demand kept Vietnamese rates near a 12-year low even as the country looks to encourage private investment to make its rice more competitive. Top exporter India's 5% broken parboiled variety rose to around \$373-\$379 per ton from \$370-\$376 a week ago, despite faltering demand from African countries. The rupee on Thursday moved further away from a near two-week low touched earlier in the week. Buying from west African countries, especially from key buyer Benin, has been faltering.
- Organic Basmati Promotes in Punjab: Exporters can happily give a bonus of Rs 150 per quintal by Punjab farmers for increasing the production of organic basmati rice. Punjab produced around 200 lakh tonnes of paddy on 23.64 lakh hectares during 2017 which is 6% more than in 2016. Punjab is included in the 'Agricultural Ranking Award' 2017-18 list due to excess production.
- Sowing of Kharif Crops in Andhra Pradesh is Behind Last Year: So far this year in Andhra Pradesh, an important agricultural producing state of South India, the total production area of Kharif crops has reached 31.35 lakh hectare, which is 3.00 lakh hectare less than the 33.30 lakh hectare in the same period last year. The area is about 82 percent of 42.05 lakh hectares. According to the new weekly report of the State Agriculture Department, the area under paddy production in Andhra Pradesh decreased from 13.87 lakh hectare to 13.23 lakh hectare in the current kharif season as compared to the same period last year.
- 101 Percent of Kharif Crops Sown in Telangana: The area of Kharif crops in the South Indian state Telangana has increased to 43.94 lakh hectare, which is much higher than the 41.39 lakh hectare sowing area and 101 percent of the normal average area of 43.35 lakh hectare in the same period last year. Late monsoon but good rains helped farmers in the state to increase sowing of kharif crops. According to the latest report of the State Agriculture Department, the production of paddy in Telangana jumped from 10.32 lakh hectare to 12.58 lakh hectare during the current kharif season as compared to last year.
- Chhattisgarh government can declare a bonus of Rs 685 per quintal on the government procurement of paddy in the current season, this purchase will start from October 1. The Central Government had declared MSP of Common Grade Paddy at Rs 1815 per quintal, after a bonus of Rs 685, the purchase price will be Rs 2500 per quintal. Which is equal to the previous year. Last year, the state government announced a bonus of Rs 750 per quintal in December. 39.7 lakh tonnes of paddy was procured from Chhattisgarh in 18-19 which was 32. 17lakh tonnes during 17-18. If the government buys at this price, then even the mandis of Chhattisgarh will have to buy paddy at high prices, which is not good news for exporters.
- Government Procurement of Rice Likely to Fall Behind Fixed Target: The central government has set a target of procuring 416 lakh tons of rice in the 2019-20 kharif marketing season, while the actual purchase is likely to be much lower, paddy production is likely to decrease in states like Punjab, Andhra Pradesh, Karnataka and Maharashtra this time compared to last year. The new Kharif marketing season for government procurement of rice is going to start from 1 October 2019. According to official sources, due to the severe floods in Punjab and Maharashtra in recent times, the standing paddy crop in the fields is expected to be damaged. In some parts, the entire crop is being reported to be ruined. A similar situation has arisen in some areas of Karnataka. Paddy production in Andhra Pradesh is likely to decrease this time due to dry weather during

- planting season. Till last week, the paddy area in the state reached only 11 lakh hectares, which was 11.3 percent less than the previous year. Despite this, the target of purchasing 40 lakh tonnes of rice has been set there, whereas in 2018-19, this purchase could reach only 29.60 lakh tons in Andhra Pradesh.
- High prices cut non-Basmati rice exports 37%: Rising domestic rice prices have affected exports
 this year with shipment of the non-Basmati variety falling about 37 per cent or 10 lakh tonnes,
 over the previous year. According to APEDA data, 17,06,891 tonnes of non-Basmati rice were
 exported in April-July of FY20 against 26,94,827 tonnes in the same period of FY19. The nonBasmati rice exports have declined around 9.88 lakh tonnes or 36.66 per cent.
- As per the Ministry of Agriculture, current Kharif Rice acreage as on 13th September 2019 declined by 2 per cent at 374.09 lakh hectares as compared to 381.75 lakh hectares last year same period. Higher acreage under Rice is reported from Madhya Pradesh (24.60 lakh hectares), Telangana (11.67 lakh hectares), Odisha (37.17 lakh hectares), Chhattisgarh (38.14 lakh hectares), Uttar Pradesh (60.05 lakh hectares), Haryana (13.05 lakh hectares), Lower acreage is reported from Bihar (27.72 lakh hectares), Jharkhand (13.57 lakh hectares), West Bengal (39.83 lakh hectares), Karnataka (7.00 lakh hectares), Tamil Nadu (3.02 lakh hectares), Andhra Pradesh (12.38 lakh hectares), Manipur (0.58 lakh hectares), Punjab (29.20 lakh hectares).
- The Madhya Pradesh government has set a target of purchasing 50 lakh tons of paddy in the current marketing year and farmers will also be given an additional amount of Rs 20 per quintal for cleanliness of paddy.

International Market Highlight:

- Meanwhile, Vietnam's 5% broken rice rates were unchanged at \$325 per tonne, their lowest since November 2007, as "trading activity remains subdued on weaker demand. A lack of fresh deals has squeezed the Vietnamese market, with prices now about 13% lower than at the beginning of the year.
- Prices for second-biggest exporter Thailand's benchmark 5% broken rice were also unchanged at \$400-\$418 a tonne on lack of demand and little fluctuation in the exchange rate between the baht and U.S. dollar. At an average of \$409, Thai rice was still near its highest since June 2018. Demand remains flat as higher prices have deterred buyers, traders said. A strong baht has kept rates elevated compared with competitors since the start of the year.
- Indonesia Agrees to Import Indian Rice & Sugar to Push Trade Volume to \$50 billion: South East Asia's biggest nation Indonesia has decided to purchase rice and suga rNSE 0.74 % from India a move that will help to reduce trade deficit between the two sides and push trade volume to \$50 billion by 2025. The bilateral trade is currently in favor of Indonesia and export of rice and sugar from India will help to bridge trade deficit. This decision to import Indian rice and sugar is understood to have been taken by Jakarta in the backdrop of India providing level playing field to Indonesian palm oil by charging same duties on Malaysian palm oil. On September 16 the Embassy of India, Jakarta, in partnership with the Ministry of Trade of Government of Indonesia, jointly hosted a Multi-Product Road Show, focusing on exports of Bovine Meat, Rice and Sugar from India to Indonesia.
- Sri Lanka has raised a paddy (rough rice) output from both cultivation seasons in 2019 to 4.613 million metric tons up 5.5 percent from an earlier estimate, and up 17 percent from last year.

In the ongoing Yala season, 1,540 paddy is forecast to be produced after crop damage, up from a earlier forecast of 1.47 million metric tonnes. This year's Yala forecast is around the same as 1.53 million metric tonnes produced in 2018. After wastage and seed paddy needs, 1.38 million tonnes of paddy will be available for milling from the Yala crop. About 940,000 metric tonnes milled rice will be available for consumption. The final main Maha rice output is now estimated to 3.073 million metric tonnes up 28 percent from last year and 5.9 percent higher from a preliminary estimate. For the full year 4.613 million metric tonnes of paddy and 2.88 million metric tonnes of milled rice would be available.

- Myanmar earned more than US\$120 million from exporting over 450,000 tons of broken rice in 11 months this fiscal year but the amount fell by over US\$14 million when compared to the same period of last year as over 17,000 tons were reduced this year, From October 1 to August 30 in the current 2018-2019 fiscal year, 459,927.860 tons of broken rice worth US\$122.392 million. In the same period of last fiscal year, US\$136.510 million was earned from export of 477,017.635 tons of broken rice. Therefore, this year saw a fall of 17,089 tons worth over US\$14.188 million. Myanmar exports broken rice mainly to Belgium, Indonesia, China, the Netherlands and Britain, according to Myanmar Rice Federation.
- An official report showed that 132,947 tons of milled rice have been exported from Cambodia to China in the starting 8 months of 2019, having a 54 percent rise from the same time frame of the previous year. Rice Export from Cambodia showed that China remains the top buyer of Cambodian rice during the period. The exports to China made up 39 percent of the total rice exports in Cambodia. 120,061 tons of rice was shipped from Cambodia to the European market, having a 47 percent decrease. The European Union (EU)'s market share for Cambodian rice had gone down from 52 percent to 35 percent. According to the report, Cambodia exported a total of 342,045 tons of rice to 51 countries and regions during the first eight months of this year, up only 0.1 percent over the same period last year.
