

Domestic Market Highlights:

- **Prices of top exporter India's 5% broken parboiled variety also extended losses, dipping to around \$369-\$373** per tonne from \$371-\$375 a week ago on a weak rupee and subdued demand. Demand is weak. Traders are waiting for the new season crop. Indian rice exports in April-July plunged 26.5% from a year ago to 3.14 million tonnes, a government body said last month, on subdued demand for non-basmati rice from Africa.
- **The pace of paddy purchase in Patiala is very slow due to the factional strike: In Punjab, the state that contributed** the most to food grains in the central pool, although the new marketing season for government procurement of paddy was formally started from October 1, the actual procurement pace is slowing down. Only 8500 tonnes of paddy arrived in the grain markets and government purchasing centers of Patiala district. There are 101 purchasing centers built for the purchase of paddy there, but due to very low arrival of paddy, only three centers - Rajpura, Nabha and Samana - could start the procurement process. There is silence in other centers.
- **Saudi Arabia's tightening of rice import rules may affect Rice Exports from India:** Earlier the Indian rice industry is already facing trouble in terms of exports due to the ban on Iran, Saudi Arabia has implemented a new system for quality control from 1 September 2019. A certificate of quality is required for each batch. Only 2 agencies have been allowed to issue COC for rice exports from India.
- **Government Grains Storage may Problem for New Paddy Procurement Year:** All the government warehouses in the country have a storage capacity of 880 lakh tons. On September 1, 676.3 lakh tonnes stock was available in the central pool, which did not include 59.7 lakh tonnes of paddy. Government procurement of rice has started. There may be a shortage of space in warehouses in the future.
- **Sowing of 59.93 lakh hectare kharif crops completed in Odisha: The total production area of Kharif crops in** Orissa till September 28 this year could reach 59.93 lakh hectare, which is 60.40 lakh hectare in the same period last year and less than the fixed target of 61.50 lakh hectare but more than the normal average area of 56.97 lakh hectare. According to the latest weekly report of the State Agriculture Department, the production of paddy in Orissa has improved from 37.06 lakh hectare to 37.52 lakh hectare during the current kharif season as compared to last year.
- **Government procurement of paddy has started since October 1, but FCI rice sales are weak, the stock** of food grains has increased in the go downs compared to the previous year, due to lack of space.
More than 20 shipwrecks were trapped after the US imposed a sanction on Iran. The pressure of arrival of paddy in the mandi of Uttar Pradesh has not been formed yet, the rain on the standing crop has damaged the paddy crop.
- **As per the Ministry of Agriculture, current Kharif Rice acreage as on 27th September 2019 declined by 1.81** per cent at 382.34 lakh hectares as compared to 386.92 lakh hectares last year same period. Less area is reported from Bihar (4.84 lakh tonnes), Jharkhand (1.62 lakh tonnes), Karnataka (1.44 lakh tonnes), West Bengal (2.41 lakh tonnes), Assam (0.93 lakh tonnes), Manipur (0.58 lakh tonnes) Punjab (0.42 lakh tonnes), Mizoram (0.35 lakh tonnes), Jammu and Kashmir

(0.28 lakh tonnes), Maharashtra (0.26 lakh hectares), Tamil Nadu (0.25 lakh hectares) Andhra Pradesh (0.19 lakh hectares), Sikkim (0.11 lakh hectares).

- **Punjab government has directed the Food Department to obtain all receivables from GoI and FCI at the earliest**, to ensure that the Cash Credit Limit (CCL) is availed in time for the smooth procurement of Paddy. The Chief Minister was reviewing the arrangements for the procurement season, beginning from October 1. With 29.20 Lakh hectares of area under paddy cultivation, Punjab is targeting procurement of 170 Lakh Metric tons, requiring CCL to the tune of Rs. 34,500 Crores in Kharif Season 2019-20.

International Market Highlight:

- **Egypt is set to produce 4 million tonnes of white rice in the 2019 season, the figure compares to 2.7 million** tonnes produced in the 2018 season. 2019 production would be enough to cover local needs and leave a surplus. Egyptians consume around 3.2 million tonnes of rice annually. According to government sources, in September that there would be no need for rice imports this current financial year, which ends on June 30, 2020.
- **Thai rice exports are likely to stay below targets as the strong baht weakens competitiveness in the world market. According to Thai Rice Exporters Association, Thai rice shipments may slip to as low as 8 million tons** this year, led by a sharp drop in white rice exports. The continued strong baht -- which makes Thai rice more expensive than grains from other countries -- will lower white rice shipments by up to 35% from 5.49 million tons last year. The free-on-board prices of Thai 5% white rice are quoted at US\$400 a ton, while those of Vietnamese rice are quoted at \$320 a ton. In July, the association cut its target for annual rice exports from 9.5 million tons to 9 million. Of the total, white rice will account for 3.9 million tons, followed by parboiled rice at 2.8 million tons, hommali rice at 1.3 million tons, aromatic rice at 600,000 tons and glutinous rice at 400,000 tons. Key threats to Thai rice exports include the strong baht and lower purchase demand from China, which holds hefty rice stocks.
- **Meanwhile, Vietnam's 5% broken rice rates were unchanged at \$325 per tonne, their lowest since November 2007**, as "trading activity remains subdued on weaker demand. A lack of fresh deals has squeezed the Vietnamese market, with prices now about 13% lower than at the beginning of the year.
- **Prices for second-biggest exporter Thailand's benchmark 5% broken rice were also unchanged at \$400-\$418** a tonne on lack of demand and little fluctuation in the exchange rate between the baht and U.S. dollar. At an average of \$409, Thai rice was still near its highest since June 2018. Demand remains flat as higher prices have deterred buyers, traders said. A strong baht has kept rates elevated compared with competitors since the start of the year.
- **Indonesia Agrees to Import Indian Rice & Sugar to Push Trade Volume to \$50 billion:** South East Asia's biggest nation Indonesia has decided to purchase rice and sugar from India — a move that will help to reduce trade deficit between the two sides and push trade volume to \$ 50 billion by 2025. The bilateral trade is currently in favor of Indonesia and export of rice and sugar from India will help to bridge trade deficit. This decision to import Indian rice and sugar is understood to have been taken by Jakarta in the backdrop of India providing level playing field to Indonesian palm oil by charging same duties on Malaysian palm oil. On September 16 the Embassy of India, Jakarta, in partnership with the Ministry of Trade of Government of Indonesia, jointly hosted a

Multi-Product Road Show, focusing on exports of Bovine Meat, Rice and Sugar from India to Indonesia.

- Sri Lanka has raised a paddy (rough rice) output from both cultivation seasons in 2019 to 4.613 million metric tons up 5.5 percent from an earlier estimate, and up 17 percent from last year.** In the ongoing Yala season, 1,540 paddy is forecast to be produced after crop damage, up from a earlier forecast of 1.47 million metric tonnes. This year's Yala forecast is around the same as 1.53 million metric tonnes produced in 2018. After wastage and seed paddy needs, 1.38 million tonnes of paddy will be available for milling from the Yala crop. About 940,000 metric tonnes milled rice will be available for consumption. The final main Maha rice output is now estimated to 3.073 million metric tonnes up 28 percent from last year and 5.9 percent higher from a preliminary estimate. For the full year 4.613 million metric tonnes of paddy and 2.88 million metric tonnes of milled rice would be available.
