

### Domestic Market Highlights:

- All-India progressive procurement of Rice as on 11th October 2019 for 2018-19 is at 443.31 lakh tons** as compared to the procurement of 381.03 lakh tons in the corresponding period of last year. The procurement target set for 2018-19 (October-September) was 448.04 lakh tons. Higher Rice/Paddy procurement is done from Punjab (113.34 lakh tonnes), Telangana (51.86 lakh tonnes), Andhra Pradesh (48.09 lakh tonnes), Odisha (43.83 lakh tonnes), Chhattisgarh (39.71 lakh tonnes), Haryana (39.42 lakh tonnes), and Uttar Pradesh (32.33 lakh tonnes).
- Purchase of paddy in Karnal, Haryana has been stopped for the last 4 days due to which farmers are facing problems.** Paddy is visible everywhere in the mandis. According to the Karnal Market Committee, a total of 42 lakh quintals of paddy had arrived last year, which has now reached 43 lakh tonnes. The arrival of paddy may continue for another 15-20 days, which means that the production of paddy is more than that of last year.
- In top exporter India, prices for the 5% broken parboiled variety rose to \$368-\$372 per tonne from \$365-\$370 a week ago.** The Indian rupee on Thursday hit its highest in more than a week, reducing exporters' margins. According to President of the Rice Exporters Association B. V. Krishna Rao, demand from African countries is still weak. India's rice exports in August fell 29% year-on-year to 644,249 tonnes due to weak demand from African countries for non-basmati rice, among other factors.
- Over 1 lakh acres of paddy infested in Andhra Pradesh. Paddy has been infested by five types of pests in over one lakh acres** in four districts. Paddy in Krishna, Vizianagaram, East Godavari and Prakasam districts has been infested in 1,00,485.4 acres by rice blast, BPH, sheath blight, stem borer and leaf folder. Farmers are, however, able to treat the pestilence in 81,421 acres of paddy and stop the spread of the pests and diseases. Rice blast, considered a major disease, is capable of causing very severe loss (up to 100%). While the data for India is old, the yield loss due to the disease in the Philippines is between 50% and 85% the yield loss caused by sheath blight is 6%. While the infestation of leaf-eating caterpillar, aphids and Spodoptera has been reported in 61,000 acres, farmers have been able to treat the crop in only 51,892 acres and check the spread of the pests and diseases.
- India's Rice Exports Drops 29% due to Less Demand from African Countries. India's rice exports dropped 29%** in August to 644,249 tonnes, due to weak demand from African countries for non-basmati rice, among other factors. Demand from West African countries is weak for non-basmati rice. They have bought a lot from China and don't need to buy huge volumes now". India is the world's biggest rice exporter but its shipments have plunged 27% in the first five months of the 2019/20 financial year, starting on April 1, to 3.8 million tonnes, the data reveals. Moreover, India's biggest buyer of basmati rice, Iran has nearly stopped purchases in the last few weeks as it harvests its own crop. Iran could resume buying early next year after harvesting the local crop. Rice supplies from India's summer-sown crop are expected to improve from next month and this could moderate local prices and make exports competitive. Last month, the government revealed that rice production from the summer-sown crop in 2019 was expected to drop 1.7% from a year ago to 100.35 million tonnes.

- **Nearly 20.9 lakh metric tonne paddy procured in Punjab mandis. The govt. agencies and private millers have procured** 20.9 LMT of paddy from the various mandies across the state. Govt. agencies have procured 2035766 MT and 55130 MT by private millers. PUNGRAIN has purchased 796027 MT, MARKFED 545746 MT, PUNSUP391387 MT, Punjab State Warehousing Corp. 264783 MT and FCI 37823.
- **Punjab government taking steps to control burning crop residue. The state government has been promoting** the adoption of equipment for paddy straw management. In 2018, the state has been able to manage 10.21 million tons of paddy straw out of 20 million tons but it includes around 2.89 million tons of paddy straw as partially burnt. Punjab government has submitted to the National Green Tribunal (NGT), the steps it is taking to control the burning of crop residue. Majority of farmers are not ready to shift to other crops unless an assured procurement on MSP is ensured for alternated crops like maize, cotton and basmati. On the other hand, farmers have been burning paddy residue, primarily because of the limited window between harvesting of paddy and sowing of wheat and other crops. The state government has been promoting the adoption of equipment for paddy straw management. In 2018, the state has been able to manage 10.21 million tons of paddy straw out of 20 million tons but it includes around 2.89 million tons of paddy straw as partially burnt. The Punjab government said that even though the farmers have been provided equipment during the year 2018-19 and additionally will get this year too, the proposal for providing paddy straw management compensation at Rs 100 per quintal of paddy produced is still relevant.

#### **International Market Highlight:**

- **During the period from July-September 2019, about 839,356 metric tons of rice worth \$470.584 million** was exported as compared the exports of 551.5,86 metric tons valuing \$312.147 million of same period of last year. According the data released by the Pakistan Bureau of Statistics, the exports of basmati rice increased by 47.29%, about 212,873 metric tons of basmati rice valuing \$194.669 million exported as compared the 127,669 metric tons worth \$132.166 million of same period of last year.
- **Rice rates for Vietnam's benchmark 5% broken rice were unchanged from last week's \$350 a tonne, a two-month high.** Demand is weak, but low supplies have helped keep prices from falling. However, there were concerns that a move by the Philippines — Vietnam's largest rice export market accounting for 36% of total shipments — to reduce imports could further hit the Vietnamese market. Sluggish demand pushed export prices for Vietnamese rice to their lowest in nearly 12 years, at \$325 per tonne, in September.
- **In second biggest exporter Thailand, which has also been grappling with slow demand and a strong baht, benchmark 5-percent broken rice prices** narrowed to \$395-\$400 a tonne on Thursday from \$396-\$400 last week. Demand has been very small because of our high prices and little else has changed. Prices for the Thai variety have remained higher than competitors due to the firm currency. The continued strength of the baht has prevented exporters quoting lower prices as the market anticipates further strengthening of the currency.
- **Meanwhile, farmers in Bangladesh, who have been struggling with low prices and high harvesting costs, will receive** a subsidy of 30 billion taka (\$354 million) to buy modern agro-tools in an effort to minimize production costs and boost domestic output, Agriculture Minister Abdur

Razzaque said. Dhaka has failed to clinch overseas deals for its rice since a long-standing export ban was lifted in May, losing out to cheaper grain from India and Thailand.

- **Egypt is set to produce 4 million tonnes of white rice in the 2019 season, the figure compares to 2.7 million tonnes produced in the 2018 season.** 2019 production would be enough to cover local needs and leave a surplus. Egyptians consume around 3.2 million tonnes of rice annually. According to government sources, in September that there would be no need for rice imports this current financial year, which ends on June 30, 2020.
