

### Domestic Market Highlights:

- **Bulbul storms damaged 1.5 million hectares of crops in West Bengal. The government assured farmers** to recover 100% loss. In West Bengal, the sowing of pulses-oilseeds crops is very less, so this storm did not have much effect on the pulses-oilseeds, the most impact was on paddy. Out of 4 million area under paddy, it is expected that around 0.9 million hectares were under damage.
- **Tamil Nadu is one of the few states in the country where the production of kharif crops will be the same as last year.** There is less damage to the crop in Tamil Nadu as compared to other states, Tamil Nadu mainly sows paddy and rain is a boon for paddy. Paddy sowing reached 11 lakh hectares in Sambha season (Kharif season) of Tamil Nadu. The paddy crop benefited from good rains.
- **Paddy crop in 71K ha damaged in Odisha. Farmers of coastal areas in the district are a worried lot after the cyclonic storm** destroyed their standing paddy crop. Kharif paddy was cultivated in over 1.24 lakh hectare in the district. A preliminary report of the district administration states that 71,000 ha of standing paddy crop was damaged due to heavy rainfall and gusty winds. Of the nine blocks where standing paddy crops were affected, Rajnagar, Rajkanika and parts of Pattamundai blocks were the worst hit, said Kendrapara sub-collector Jyotishankar Mohapatra. A prelim report of district agriculture department estimates the paddy crop loss in over 39,092 ha to the extent of 33%.
- **Cyclone Bulbul causes massive damage to paddy crops in Odisha. Odisha was lucky enough to escape** the direct wrath of cyclonic storm Bulbul which made a landfall in West Bengal. However, farmers in coastal districts in the State are now left in lurch as standing paddy crops in several hectares of agricultural lands have reportedly been damaged due to heavy rainfall triggered by the cyclonic storm. There has been extensive damage to paddy and other standing crops in Bhadrak, Kendrapara and Jagatsinghpur districts. Though the agriculture department had earlier issued advisory for farmers to initiate measures to protect crops in view of heavy rain forecast by BKC WeatherSys, farmers are now staring at a huge loss as the crops which were ready for harvest have been damaged.
- **Over 66 lakh tons of paddy arrived in Haryana:** During the current Kharif marketing season, more than 66.58 lakh tons of paddy arrived in the grain markets of Haryana between October 1 and November 11, which is about 1.90 lakh tons more than the quantity of 64.68 lakh tons in the same period last year. According to the Food Department, out of this total arrival of 66.58 lakh tons, 62.02 lakh tons of paddy was procured by government agencies, while the remaining 4.55 lakh tons of paddy was purchased by rice millers and traders. More than 33.58 lakh tons of paddy has been purchased by the Food, Civil Supplies and Consumer Affairs Department of Haryana at the minimum support price from farmers in the mandi, while HAFED has 19.43 lakh tons, 8.95 lakh tons in Haryana Warehousing Corporation and Food Corporation of India (FCI) Has purchased about 4600 tons of paddy.
- **According to the official spokesperson, during the period under review, maximum 16.76 lakh tons of paddy arrived in Karnal** mandi of Haryana, 11.42 lakh tons in Kurukshetra, 8.36 lakh tons in Ambala and 8.11 lakh tons in the mandi of Fatehabad. Apart from this, 6.95 lakh tons in the mandi of Yamuna-Nagar by farmers, 6.92 lakh tons in Kaithal, 1.53 lakh tons in Panchkula, 1.41 lakh tons in Sirsa, 1.28 lakh tons in Jind, 1.21 lakh tons in Palwal, about 55 thousand tons in Panipat, 71 thousand tons of paddy arrived in Hisar, 11 thousand tons in Faridabad, 8 thousand tons in Rohtak and about 7 thousand tons of paddy arrival in the mandis of Mewat.

• Thu, 5:09 PM

- Indian FOB for 1121 steam traded weak in the month of October and currently is in the range of USD 1045-1047/MT** which is down by 3.07% from last month price of USD 1080.83/T due to arrival pressure and also export as many companies in Iran, who is largest basmati importer, Exporters are facing a fund crunch with their payments stuck in Iran for five months. Over 30 per cent of basmati export is affected due to the crisis, making exporters reluctant to purchase basmati; Agriwatch expects that aromatic international rice price is likely to trade steady to weak in coming month due arrival pressure from major producing states. According to the UN's Food and Agriculture Organization (FAO), Currently Pakistani basmati FOB is moving weak from last month and is now hovering in the range of USD 988/MT which is down 5.38 % from last month FOB of USD 1045/MT.
- Top exporter India's 5 percent broken parboiled variety was quoted around \$365-\$370 per ton this week**, down from \$368-\$372 last week. Demand is weak. We are waiting for the new season supplies that could rise from this month. Many rice growing states received rainfall in the last two weeks, which delayed harvesting and damaged paddy crops ready for harvesting.
- Under the FCI OMSS scheme, 21,000 metric tonnes of rice was sold from Karnataka on November 6 at a price of Rs 2,785 per quintal.**
- Indian Government Tight the Rice Export Rule to EU Countries:** The central government has tightened the export rules of rice to European Union countries. To export rice to these countries, it will now be mandatory for exporters to obtain a certificate from the Export Inspection Agency or Export Inspection Council. It is expected to have an impact on rice export transactions. According to the notification of the Directorate General of Foreign Trade (DGFT), exporters of European Union countries for basmati as well as non-basmati rice exports will have to get a certificate from the Export Inspection Agency or Export Inspection Council. This decision has come into force immediately. According to sources, the government has made the inspection certificate mandatory due to the pesticides in the rice. This is expected to affect rice exports.
- Basmati rice exports declined by 11.33 per cent during the first half of this financial year from April to September** and the total exports stood at 18.70 lakh tonnes. Its exports during the same period of the last financial year was 20.82 lakh tonnes. Export of non-basmati rice has come down to 25.17 lakh tonnes as against 38.68 lakh tonnes in the same period last fiscal. The total exports of basmati rice from the country were 44.14 lakh tonnes and non-basmati 75.99 lakh tonnes in the financial year 2018-19.
- India's rice stocks in the central pool as on October- 1, 2019 stood at 27.63 million tons up by 40%** from 19.74 million tons recorded during the corresponding period last year, according to data from the Food Corporation of India (FCI). India's rice stocks in the central pool are down by 8.31% by from 30.14 million tons recorded on September-01, 2019. Highest stock could be seen in the state of Punjab (88.85 lakh tons) followed by Telangana (24.28 lakh tons), A.P (19.84 lakh tons) Uttar Pradesh (13.52 Lakh Tons) and Haryana (18.98 lakh tons).
- All-India progressive procurement of Rice as on 11<sup>th</sup> October 2019 for 2018-19 is at 443.31 lakh tons** as compared to the procurement of 381.03 lakh tons in the corresponding period of last year. The procurement target set for 2018-19 (October-September) was 448.04 lakh tons. Higher Rice/Paddy procurement is done from Punjab (113.34 lakh tonnes), Telangana (51.86 lakh

tonnes), Andhra Pradesh (48.09 lakh tonnes), Odisha (43.83 lakh tonnes), Chhattisgarh (39.71 lakh tonnes), Haryana (39.42 lakh tonnes), and Uttar Pradesh (32.33 lakh tonnes).

- **India's Rice Exports Drops 29% due to Less Demand from African Countries.** India's rice exports **dropped 29%** in August to 644,249 tonnes, due to weak demand from African countries for non-basmati rice, among other factors. Demand from West African countries is weak for non-basmati rice. They have bought a lot from China and don't need to buy huge volumes now". India is the world's biggest rice exporter but its shipments have plunged 27% in the first five months of the 2019/20 financial year, starting on April 1, to 3.8 million tonnes, the data reveals. Moreover, India's biggest buyer of basmati rice, Iran has nearly stopped purchases in the last few weeks as it harvests its own crop. Iran could resume buying early next year after harvesting the local crop. Rice supplies from India's summer-sown crop are expected to improve from next month and this could moderate local prices and make exports competitive. Last month, the government revealed that rice production from the summer-sown crop in 2019 was expected to drop 1.7% from a year ago to 100.35 million tonnes.

#### International Market Highlight:

- **For rice marketing year (MY) 2019/20 (May-April), Bangladesh's rice production area and output have been** marginally increased to 11.8 million hectares (HA) and 35.8 million metric tons (MMT), respectively. The increase is due to a reportedly strong year for Aus rice (April-August) production and a forecasted good season for Aman rice (July-December). Harvested Aus rice area is revised up to 1.1 million HA and production up to 2.45 MMT, based on official data from the Government of Bangladesh (GOB). Harvest of Aman rice is just started in November. The planted Aman rice area is revised at 5.8 million HA and production forecast is raised to 14 MMT as official sources and other contacts believe that continued favorable weather will result in an above average Aman rice harvest.
- **The MY 2019-20 Bangladesh rice import forecast is lowered to 50,000 MT, which is 50 percent lower than MY 2018-19 imports.** The forecasted decrease in imports is the result of the increased import tariff to on rice, from 28 percent to 55 percent.
- **During the period from July-September 2019, about 839,356 metric tons of rice worth \$470.584 million** was exported as compared the exports of 551.5,86 metric tons valuing \$312.147 million of same period of last year. According the data released by the Pakistan Bureau of Statistics, the exports of basmati rice increased by 47.29%, about 212,873 metric tons of basmati rice valuing \$194.669 million exported as compared the 127,669 metric tons worth \$132.166 million of same period of last year.
- **Rice rates for Vietnam's benchmark 5% broken rice were unchanged from last week's \$350 a tonne, a two-month high.** Demand is weak, but low supplies have helped keep prices from falling. However, there were concerns that a move by the Philippines — Vietnam's largest rice export market accounting for 36% of total shipments — to reduce imports could further hit the Vietnamese market. Sluggish demand pushed export prices for Vietnamese rice to their lowest in nearly 12 years, at \$325 per tonne, in September.

- In second biggest exporter Thailand, which has also been grappling with slow demand and a strong baht, benchmark 5-percent broken rice prices narrowed to \$395-\$400 a tonne on Thursday from \$396-\$400 last week. Demand has been very small because of our high prices and little else has changed. Prices for the Thai variety have remained higher than competitors due to the firm currency. The continued strength of the baht has prevented exporters quoting lower prices as the market anticipates further strengthening of the currency.
