

### Domestic Market Highlights:

- **Indian export rice prices fell to their lowest in more than two months this week due to a weaker rupee** and muted demand, while mounting supplies from an on-going harvest weighed on Vietnamese rates. Top exporter India saw rates for its 5% broken parboiled variety fall to \$366-\$372 per tonne, the lowest since March 26, from \$368-\$373 last week. The rupee has fallen more than 6% this year, prompting exporters to cut rates. Even after lowering prices, there is no improvement in demand. India's rice production could surge to a record as farmers are expanding the area under paddy because of good monsoon rains.
- **India's rice production is likely to surge to a record high as farmers are expanding the area under paddy** because of good monsoon rains and after the government raised the price at which it will buy the new-season crop. Higher output by the world's biggest rice exporter could dampen domestic prices and make exports more competitive, compensating for lower supplies from rivals Thailand and Vietnam. As per by IREA, Country could produce 112 million tons of rice with bountiful monsoon this year. The government raised the price at which it will buy new-season rice from farmers by 2.9%.
- **Direct Seeding of Rice Method: Punjab agri dept expects 25% of area under paddy to be DSR.** With labour scarce due to the covid-19 pandemic, the state agricultural department estimates that nearly 25% of area under paddy will come under Direct Seeding of Rice (DSR), instead of the traditional transplantation of the crop this year. The department has sanctioned 4,000 DSR machines and 800 paddy transplanting machines to farmers on subsidy ranging between 40% and 50%. DSR technique would be instrumental in saving about 30% of water and would also cut down cost of paddy cultivation by nearly Rs 6,000 per acre. As per PAU experts, yield of paddy from DSR is on a par with the crop grown by conventional technique of transplanting. As paddy yield in DSR method is generally down by 15-20%, so overall production on rice could be hampered in Punjab.
- **Labour shortage and scarcity of containers at the ports has hit India's rice exports to Africa, Saudi Arabia, Iraq, Iran and the United Arab Emirates.** While Africa imports non-basmati rice from India, the Gulf countries rely on India's basmati rice for their domestic consumption. Trucks are standing at the Kandla and Mundra ports for a minimum seven days as there is no labour to unload the trucks. Also, since imports of all products have lessened, containers are not coming to the ports. This is creating a lot of problems for basmati rice exporters. Exports are getting delayed. This year Saudi Arabia and the UAE have emerged as the biggest buyers of basmati rice. Exports to Iran have gone down as there are payment issues with the country. Exporters from India are yet to get their payments. Nearly 300,000 tonnes of basmati rice is lying at Iranian ports. In 2019-20, India had exported 4.4 million tonnes of basmati rice. Africa had imported 1.1 million tonnes of rice at an estimated cost of Rs 2,500 crore. They generally buy rice which is priced at Rs 24 -25 per kg.
- **Govt. to accept 1 million tons more rice from Chhattisgarh in central pool.** Centre has agreed to take back over 1.0 million tons of rice procured by the Chhattisgarh government in the central pool. Since the beginning of the kharif marketing season in October, the Centre and the Chhattisgarh government have been at loggerheads over rice procurement, including over the state's initial announcement to pay a bonus for paddy purchases, which was later reversed. Chhattisgarh had announced a 685-rupee bonus on procurement of every 100 kg of paddy. Initially, the Centre limited Chhattisgarh's procurement at 1.6 million tons, the state's requirement under the national food security plan. In December, however, it decided to accept an additional 2.4 million tons of rice from the state's procured quantity in the central pool on the condition that the state wouldn't provide any bonus. With this, the limit on procurement was officially increased to 4.0 million tons.

- **Minimum Support Price of Paddy Hike by 2.92% from Last Year to Rs. 1868/Quintal for Common Grade:** As per by Union Agriculture Minister Narendra Singh Tomar ,the Union Cabinet on June 1 approved minimum support price for 14 kharif crops. The revised prices will provide farmers nearly 50-83 percent more than the cost. The MSP for paddy has been raised by Rs 53 per to Rs 1,868 per quintal for the 2020-21 crop year. For Grade A, price increases by Rs.53 from last year price of Rs.1835 /quintal to Rs.1888/ quintal in this year.

### International Market Highlight:

- **Prices of Thailand's benchmark 5% broken rice eased to \$505-\$525 a tonne on Thursday, from \$505-\$533** last week, with traders attributing the slip to a stronger Baht. Demand remains flat because our prices are higher than India and Vietnam. Concerns over supply lingered after a drought hampered production earlier this year. More rains this monsoon season will vastly improve supply, but the market is still slightly concerned, hence the high prices.
- **Stocks in Bangladesh, the world's fourth-biggest rice producer, will likely fall by 8.33% in 2021** because of the coronavirus pandemic, threatening food security, the Food and Agriculture Organisation said earlier this month.
- **As per by Cambodia government, country's milled rice exports to the international market are expected to reach 800,000 tonnes in 2020**, an estimated rise of 29 per cent from 620,106 tons last year. China and Europe were the biggest buyers of Cambodia's milled rice during the first five months of this year, and country shipped 136,825 tons of milled rice to China, up 25 per cent, and 122,010 tons to Europe, up 51 per cent from last year.
- **Guyana Harvesting of the 2020 first season paddy crop, which accounts for half of the annual production**, is virtually complete and yields of the harvested crops are similar to the record high yields obtained in 2019. The improvement of extension services of the Guyana Rice Development Board (GRDB) and the expanding of public agricultural investments supported crop yields.
- **Rice export prices increased 4 percent as Thai rice exporters are sourcing new-crop rice to fulfill large** volume contracted shipments of white and parboiled rice to Asian and African buyers. Also, foreign buyers began to seek Thai rice as prices of Thai and Vietnamese white rice are currently about the same, compared to a typical price difference of around U.S. \$15-20/MT, after the Vietnamese government removed its rice export restrictions earlier this month.

| Rice Daily Prices: |                           |                 |           |        |
