

Domestic Market Highlights:

- **The Madhya Pradesh government claims that Basmati rice is traditionally produced in many districts** of the state, so the region should be given Geographical Indicator (GI) status (tag). The Madhya Pradesh government has been struggling for this GI tag for years, but it has not been successful so far. Government had filed a petition in this regard in the Madras High Court, but there it was a disappointment. Now the Madhya Pradesh government has decided to move the Supreme Court (Supreme Court) to challenge the decision of the Madras High Court. It is to be noted that in the year 2016, the Government of Madhya Pradesh and Basmati Producers Association had filed a separate petition for the GI tag in the Madras High Court, which was heard and in the beginning of the year 2020, the court rejected both the petitions. .
- **After a decade, this time the southwest monsoon has reached the right time in Bihar, which is raining** in different parts of the state and farmers are busy in cultivating other kharif crops including paddy, maize and pulses. It is unusual is that this time most of the migrant labourers of Bihar have returned; hence there is no shortage of agricultural labourers. Farmers of Bihar depend to a large extent on the monsoon for paddy cultivation because its crop requires the most water. During the current Kharif season, the target of paddy production area in Bihar has been set at 33 lakh hectares. So far, paddy has been planted in about 84 thousand hectares, which is more than 53 thousand hectares in the same period last year.
- **India's rice production is likely to surge to a record high as farmers are expanding the area under paddy** because of good monsoon rains and after the government raised the MSP for the new-season crop. Higher output by India, the world's biggest rice exporter, could dampen domestic prices and make exports more competitive, compensating for lower supplies from rivals Thailand and Vietnam. As per by AIREA (All India Rice Export Association) , India could produce 112 million tons of rice with bountiful monsoon this year. The government raised the MSP by 2.9% to Rs 1868/qtl from Rs 1815/qtl.
- **During the current week, the export offer price of Indian rice declined to a low of two months as the exchange** rate of one rupee and demand from other African countries remained weak. On the other hand, due to increase in supply and availability of new crop rice in Vietnam, prices have softened somewhat. The world's largest exporting country - India's free on-board average unit export offer price of 5 percent broken sela rice, fell from \$ 368-373 a tonne last week to \$ 366-372 a tonne, the lowest since March 26 is the level. During the current year, the rupee has weakened by more than 6 percent against the dollar, so exporters have no problem in reducing the export price of rice. But despite the decrease in prices, there is not much improvement in the export demand of Indian rice.
- **Meanwhile, export demand for Vietnamese rice has also weakened. Its 5 percent broken rice export** offer price has now softened to \$ 450 a tonne, a two-month low. Earlier on June 4, the price of rice had jumped to \$ 475 per tonne, which was the highest level in the last eight years. According to trade sources, at present, the rice that is being harvested will produce rice so much that Vietnam will be able to export 23-25 lakh tonnes of rice after meeting its domestic demand and requirement.
- **The export price of Thailand's benchmark 5 percent broken rice was running between \$ 505-533 per** tonne last week, which has come down slightly to \$ 505-525 per tonne in the current week. His posture (Baht) remains strong. Thailand's export demand for rice remains sluggish due to the higher Thailand price compared to India and Vietnam.

- As per the latest assessment by FAO (Food & Agriculture Organization) the Coronavirus Pandemic is would lead to the fall in Rice stock of Bangladesh. The percentage decline in the stocks of rice in Bangladesh would be 8.33% by 2021.
- According to the latest export data shared by Government of Cambodia the Exports of Milled rice to the Global markets is likely to see a 29 per cent jump in this current. Last year the Export of Milled Rice was 6,20,106 tons , which is expected to go up by 29 per cent and reaching at 8,00,000 tons. For Cambodia, the top markets for Export of Milled Rice are China & Europe. During the last five months the exports to China has grown by 25 per cent, reaching to 1,36,825 tons of Milled rice. Whereas the exports to Europe has gone up by 51 per cent as compared to last year, reaching to 122010 tons of Milled Rice.
