

Domestic & International Market Highlights:

- India's basmati rice production to be higher than last year's level due to monsoon boost.**
 India's basmati rice production this year is likely to be 7% higher than last year's level at 8 million tonnes because of good rains and availability of farm hands during the sowing period. Production of basmati rice will be higher this year, which is good for the industry. Domestic consumption is increasing and newer markets for exports are opening up. Even though payments from Iran is still due, but country is getting good export orders from Middle-east countries like Saudi Arabia and Iraq. Eastern European countries are also keen to buy basmati rice from India. In the last kharif season, the country had produced 7.5 million tonnes of basmati rice. This year, the acreage has increased and expecting 80 lakh (8 million) tonnes of rice.
- Global production of rice is estimated to increase by around 4.3 million tonnes during the current year compared to last year, while demand is expected to remain strong in major importing countries due to the Corona epidemic.** In view of this, the US Department of Agriculture (USDA) has expected the global trade in rice to increase by about 2.8 million tonnes during the 2020-21 season as compared to 2019-20 season.
- As per USDA, the total global consumption of rice is expected to be 49.09 million tonnes in the 2019-20 season, which can rise to above 49.65 million tonnes in the 2020-21 season and the remaining surplus stock of 18.52 million tonnes of rice will be present at the end of the season.**
- Government's big decision on basmati and non-basmati rice, export rules relaxed.** The Central Government (Government of India) has decided to relax the terms of export of Basmati Rice Export and Non-Basmati Rice Export. This exemption is given in export for European countries. The Ministry of Commerce has issued a notification. Let you know that India is the world's largest rice exporting country with 25 percent global share. Basmati rice during April 11 to February, first 11 months of FY 2019-20 Exports of 38.36 lakh tonnes have been slightly lower than 38.55 lakh tonnes in the same period of the last financial year. Basmati rice exports by value have been valued at Rs 27,427 crore during April-February of FY 2019-20 as against Rs 28,604 crore in the previous financial year. Non-basmati rice exports for FY 2019- In the first 11 months of 20, it was reduced to 46.56 lakh tonnes, while in the last financial year it exported 68.25 lakh tonnes. The demand for basmati rice continues to be sustained by Saudi Arabia, Yemen, the US and European countries. The import demand of these countries has been good even during the Corona virus epidemic, due to which the prices of rice and paddy have improved in the domestic market.
- India's exports of non-basmati rice in the first two months of FY21 has jumped 52.5% to 11.13 lakh tonnes from 7.3 lakh tonnes in the same period of FY20.** Africa has emerged as the major buyer of non-basmati rice and exporters are hoping volumes will increase further when Bangladesh starts importing this variety. Africa is depending on India for rice supply this year as Thai rice prices have skyrocketed. Non-basmati rice will do well this year. Indian non-basmati rice exports will touch FY18 levels when the country exported 8.64 million tonnes. "Exports of non-basmati rice subsequently went down in the next two years and in FY20 we had achieved exports of 5.04 million tonnes.
- This drop in non-basmati rice was because the government increased the minimum support price of paddy and farmers were not interested in exports.** Also, the government had procured huge quantities of rice. That is why the exports went down. Bangladesh too, will open up opportunities for Indian non-basmati rice exports. Either they will directly buy from private players or they will buy through government-to-government scheme. Whichever way it happens; it will provide a fillip to the country's rice exports.

- **Top exporter India's 5% broken parboiled variety prices was unchanged at \$380-\$385 per tonne** from the previous week. India's rice exporters are struggling to fulfil orders due to limited availability of containers and workers at mills and the country's biggest rice handling port due to surging coronavirus cases. As per trade sources, loading is still limited at Kakinada port due to labour shortage.
- **Andhra Pradesh, an important agricultural producing state of South India, has received very good** southwest monsoon rains this time, which has excited farmers and is showing great interest in sowing kharif crops. During the current year, the target of production area of Kharif crops in Andhra Pradesh has been increased to 39.60 lakh hectares, which is 2.20 lakh hectares more than the normal average area of 37.40 lakh hectares. Paddy, cotton, groundnut, pigeon pea, coarse cereals and sugarcane etc. are widely cultivated during the Kharif season in Andhra Pradesh. The target of paddy production area has been reduced from 16.25 lakh hectare last year to 15.90 lakh hectare this time. The agriculture department is hopeful that the production area of kharif crops will reach the fixed target by the end of the current month. Out of target area around 6.49 lakh hectares is completed as of 7th August which was 6.33 lakh hectares corresponding year last year.
- **Besides timely and sufficient monsoon rains, the record pace of planting has been supported by** higher labour availability resulting from the migration of the urban/industrial un/semi-skilled labourers in May/June. Due to the COVID19 lockdown imposed at the end of March, and resultant economic crisis leading to job losses in urban areas, literally hundreds of thousand workers returned to their home village in the late spring/early summer months. About 321.79 lakh ha area coverage under rice as compared to 274.19 lakh hectares during the corresponding period of last year. Thus 47.60 lakh ha more area has been covered compared to last year.
- **Myanmar exported over 2.25 million tons of rice and broken rice as of July 17-2020, according to a data** release from the Myanmar Rice Federation. Traders are expecting to reach target of 2.4 million tons of rice export in present fiscal year which will end in two months. According to the figures released by the federation, the country exported over 1.4 million tons of rice and 839,956 tons of broken rice, earning over 678.29 million U.S. dollars.
- **Export prices of Indian rice rose this week while overriding the worsening coronavirus crisis in the** country leading to logistical snags. The prices of India's 5-percent broken parboiled variety went up from last week's price of USD 377- USD 382 per tonne to USD 380- USD 385 per tonne.
- **In Bangladesh the pervading floods severely damaged crops. According to the agriculture** ministry of Bangladesh the on-going floods has impacted nearly 50,000 hectares of paddy fields.
- **Due to shortage of containers and workers at mills at the Kakinada port, Indian rice exporters** are struggling to fulfil the export demand. The existing capacity of Kakinada port has gone down to around 8,000 tonnes of rice per day through only five vessels. This has slowed down the loading of rice and compelled others to wait in anchorage.
- **The strengthening of Thailand's Bhat against Dollar has pushed the prices of benchmark 5-percent** broken rice which rose to USD 465-USD 483 as compared to USD 450–USD 482 quoted last week. According to trade sources, supply remains a concern in Thailand. Thai's market is expecting a new batch of off-season rice next month that may lead to the prices to go down.
- **During the current year till July 31, the area of all kharif crops in India has increased to 88.22 million** hectares, which is about 14 percent more than the sowing area of 77.44 million hectares in the same period last year. This time the general average area of kharif crops is estimated at 1063.65 lakh hectares. According to the latest weekly data of the Union Ministry of Agriculture, the area under paddy has increased from 22.395 million hectares to 26.66 million hectares as compared to last year.

- **India's support price for rice under WTO lens as US, EU question 'peace clause'.** India's minimum support programme (MSP) for rice is under scrutiny at the World Trade Organisation with the US and the EU challenging the increase in subsidies beyond ceiling (de minimis) limits in the marketing year 2018-19. Invocation of the 'peace clause' by India to justify the subsidies was also questioned by the opposing members who posed several queries on the various conditions
- **Corona has Less Effect on Paddy Cultivation in Myanmar:** Although, like many countries of the world, there is a serious outbreak of corona virus disease in Myanmar, but paddy cultivation is not affected much. The good monsoon rains are helping farmers to plant paddy, but farmer's economic condition is very weak and they are finding it difficult to get government loans. Compared to 2018-19, there was an increase of 4 lakh tonnes in export volume. Rice exports from Myanmar are expected to rise above 2.5 million tonnes by the end of the current financial year, ie, 30 September 2020.
- **Uttar Pradesh farmers expect bumper paddy crop this year with good monsoons:** While there is considerable gloom on the industrial front in Uttar Pradesh, paddy farmers in the state are expecting a good crop due to above-average rain this monsoon. After several years, UP farmers completed paddy plantation in more than 80 per cent of crop area in the third week of July. In most of the paddy-rich districts above average rain has been recorded this year in July. In most of the districts the plantation of early variety of paddy has been completed
