India's food grain production is expected to rise by 3.74 percent to a new record of 308.65 million tonnes in the crop year 2020-21 compared to 297.5 million tonnes in 2019-20 due to good monsoon rains last year.

For the farmers, the prices have improved compared to last year but still lower than Rs 3000 per quintal in 2019.

According to the specification, the broken rice percentage has reduced from 25% to 20%, the moisture content in rice has reduced from 15% to 14% and the damaged grain percentage has reduced from 3% to 2%.
