

**Domestic & International Market Highlights:**

- As of 5<sup>th</sup> November, Rabi paddy sowing was done in 5.62 lakh hectares down by 2.8 lakh hectares from 8.42 lakh hectares the previous year.
- FCI has made it clear to Telangana government that it will not purchase parboiled rice from the state as FCI has enough stocks for next four years. They further added that they will be purchasing white rice from Telangana.
- FCI is also not going to purchase the parboiled rice from Chhattisgarh as well. The major reason for FCI to cut its procurement of parboiled rice is that many states have developed their own variety and use decentralized procurement system for their consumption.
- As on 11<sup>th</sup> November 2021, FCI and state agencies have procured 231.46 lakh tonnes of paddy in India. Punjab is the top state with 165.18 lakh tonnes of procurement followed by Haryana with 53.38 lakh tonnes. Also 155.05 lakh tonnes of rice are procured all over India.
- In Srikakulam district of Andhra Pradesh, the harvesting has been delayed by 3-4 days further due to rains and cyclonic developments in the coast of Andhra Pradesh. Millers are not accepting the paddy which are discoloured due to the rains.
- In Karnal, procurement of PR variety exceeded the target value by 2 lakh tonnes indicating selling of paddy from other states as well. As per reports, the agencies have procured 10.50 lakh tonnes against the targeted 8.40 lakh tonnes of PR variety paddy. Last year till November 11, around 12.40 lakh tonnes of PR variety paddy were procured against overall 13 lakh tonnes.
- In Karimnagar district of Telangana, paddy is cultivated in about 2,72,851 acres in Kharif. Yields are estimated at 20,000 metric tonnes. A total of 351 purchasing centers have been opened while purchasing started in 260 centers.
- As per reports, In East Godavari district of Andhra Pradesh around 22,274 hectares has been damaged due to the rains and officials asked farmers to postpone the harvesting for few more days. The government is expected to start the procurement in the state within few days by 1018 RBKs in the district.
- Thailand rice export prices fell to four and half year low this week. The 5% broken rice prices fell to \$377-\$383 per tonne down from \$382-\$384 per tonne. Low exports during most of the 2021 has led to abundant domestic supply and also the harvesting continues till the end of December. It is expected that the export demand would increase as interest from old buyers can be seen along with good export figures due to expensive Vietnam rice.

- Vietnam's 5% broken rice was unchanged from previous week at \$430-\$435 per tonne. Domestic supply of fresh paddy is running low and is creating an upward price trend in export prices. It is expected to follow the same trend until next harvest.
- In Bangladesh, farmers said production cost could rise in case of rice by 30 percent due to the increase in the price of diesel and petrol. The government has increased the price of kerosene by 23 percent which is expected to increase the transportation cost by 27 percent.
