

Domestic & International Market Highlights:

- As of 13th January 2022, 560.93 lakh metric tonnes (LMT) of paddy has been procured in KMS 2021-22 in the procuring states. Till now approximately, 68.11 lakh farmers have been benefitted from the procurement.
- In Punjab, the highest paddy procurement was done with 186.86 LMT benefitting 9.24 lakh farmers at MSP value of Rs. 36,623.64 crores. Haryana follows next with 55.31 LMT of paddy procurement benefitting 3.10 lakh farmers at MSP value of Rs. 10,839.97 crores. The procurement in Southern states are ongoing while procurement of northern states are completed.
- As per trade sources, during the month of December, around 18.04 LMT of rice was exported from India at an average FOB of \$772.07 per tonne. Iran is the largest buyer of rice in the month of December with 2.14 LMT followed by Sri Lanka with 1.68 LMT. Nepal has imported 1.89 LMT of rice and China with 1.26 LMT imports. The exports are 4.3 LMT higher than the November month export of 13.74 LMT. The increase in exports is mainly due to higher demand received from middle east countries owing to Ramzan festival in the month of March. Also, China had imported India's broken rice due to its competitive price compared to other competitors.
- In West Bengal, the prices of rice shot up mainly due to delay in supply as the demand rises amid covid surge and also due to crop loss reported due to untimely rains. The cost of rice per kg has gone up by Rs 5 to Rs 10 depending upon the quality. The price of minikit rice is currently trading at Rs. 48-50 from Rs 36-40 in December. Baskati was Rs 48- Rs 50 in December and currently trading at Rs 55-60. For Ratna rice, the price rose from Rs. 26-30 in December to Rs.30-35 per kg. Price of Dehradun rice also rose from Rs. 70-80 to Rs. 90-100 per kg.
- The Philippines' paddy rice production in 2021 is likely to exceed 20 million tonnes, marking a new record high for the annual harvest despite crop losses reported from a powerful typhoon last month. This indicates that the country will be having enough stocks of rice and once the largest importer of rice, wouldn't be purchasing much rice this year. Vietnam used to be the major exporter of rice to Philippines. Philippines is not a major market for Indian rice and hence the higher production and stocks are not going to impact India's rice exports.
- The lowest price offered in the tender from Bangladesh's state grains buyer to purchase 50,000 tonnes of rice which closed on 16th January 2022 was \$421.99 per tonne. Offers are still being considered and no purchase had yet been made. The lowest offer from India was made at \$427.88 per tonne CIF.
- China will soon send a shipment of rice to Sri Lanka as a donation. The donation comes in the wake of the 70-year anniversary of the Sri Lanka – China Rubber Rice pact on 1952. The shipment will impact India's rice market as Sri Lanka used to be a major importer of Indian Rice.

- One third of India's rice exports for the month of January are stuck due to a shortage of freight trains and most traders have stopped signing February export contracts to avoid demurrage charges. The slowdown in exports from India has allowed rival suppliers such as Thailand, Myanmar and Vietnam to increase overseas sales at higher prices. Slowing exports could force the Indian government to increase procurement from farmers. Shipments of more than 500,000 tonnes of non-basmati rice that need to be transported to Kakinada port from Chhattisgarh have been stuck due to the shortage of freight trains. Railways have diverted wagons to ship fertilizers and to serve thermal coal power plants to ensure adequate power supply this winter after power plants ran out of coal a few months ago.
- In Pakistan, due to the lack of availability of containers and high freight costs, 250,000 tonnes of rice could not be exported last year and this quantity may increase to 500,000 tonnes this year due to the severity of the situation. The country is likely to lose \$400 million in export revenue if timely steps are not taken through policy measures by restricting the movement of empty containers. Container charges which were \$70 to \$80 last year have increased to over \$1,300 per container for their Chinese destination.
- As of 14th January, Rabi paddy sowing was done in 19.82 lakh hectares down by 18.52% from 24.33 lakh hectares the previous year. Tamil Nadu has sown 11.19 lakh hectares of paddy so far up from 10.12 lakh hectares. The decrease in the acreage is mainly due to Telangana and Andhra Pradesh farmers opting out sowing of paddy due to the procurement issues with centre and government's crop diversification policies.
- As per sources, 55,000 metric tonnes (MT) of rice vessel ELEFTHEROTRIA is expected to arrive at Kandla Port on 17th January 2022. 15,000 MT of rice vessel KEMET STAR is loading at Kandla Port since 09th January 2022. Also 4,000 MT of rice vessel ABDULLATIF is loading at Kandla Port since 13th January 2022. Also, 29,000 MT of rice vessel PROPEL PROGRESS is loading at Kandla Port since 08th January 2022. Also, 22,000 MT of rice vessel MOMENTUM PHONIX is loading at Krishnapatnam Port since 06th January 2022. Also, 41,000 MT of rice vessel SUPRA ONIKI is loading at Krishnapatnam Port since 08th January 2022.
