

Domestic & International Market Highlights:

- India's 5% broken rice was quoted at \$363-\$367 per tonne, up from last week's \$361-\$365, with prices also being supported by an appreciation in the rupee. And demand for all types of rice is robust from Asia and Africa.
- Vietnam's 5% broken rice was quoted at \$420 per tonne, up from \$415 a week ago. Prices are edging up on tight supplies as the winter-spring harvest has come to an end, though supplies would increase after the summer-autumn harvest in late-May. Vietnam's rice exports in the first four months of the year likely rose 4.4% from a year earlier to 2.05 million tonnes, while revenue from rice exports in the period fell 6% from a year earlier.
- Thailand's 5% broken rice prices were quoted at \$435-\$445 per tonne, which is an increase from \$432-\$435 last week. There has been more demand from Iraq, with many freighters sent to buy rice and this drove up prices. Ships made available by Middle Eastern clients have eased the burden of high freight costs that were a concern for exporters earlier. The amount of rice in the market will begin to decrease as Thailand move towards the rainy season.
- The Union Ministry has suggested imposing a 5 per cent GST on de-oiled rice bran in order to discourage using product for feed purpose. Due to increased dependence on edible oil imports, domestic production of rice bran oil needs to be increased as only 60% of the capacity is being used.
- Government has decided to allocate additional 55 LMT of rice instead of wheat for the PMGKAY which is extended till September. The decrease in production and procurement of wheat has led to change in allocation norms.
- Centre has extended KMS 2021-22 till May 31st. The extension was done for seventh time with earlier extended till April 30th.
- Vietnam's rice exports to the EU is continuously growing in the first quarter of 2022 mainly due to EU – Vietnam Free Trade agreement. In the first quarter, Vietnam's rice exports reached 1.48 MMT, earning 715 million USD, up by 24 percent in volume and 10.5 percent in value on year. The rice exports to the EU in the first two months of this year recorded a volume of 15,500 MT, earning nearly 12 million USD. The exports rose almost four times in volume and 4.3 times in value compared to 2021.
- Sri Lanka imported 1,000 MT of rice via the Indian credit line over the past few days. And approximately 80,000 MT of rice was imported via the Indian Credit Line to be sold a concessionary price.

- As wheat stocks is becoming low within the central pool, it is likely that the government will raise rice supply for PDS and other distribution schemes. In coming days, we expect more stocks of rice to be supplied within the domestic market keeping the prices under pressure.
- Sri Lankan government has reimposed maximum retail prices for rice. A kilo of red and white nadu rice is priced at Srilankan Rs. 220 per kg and white samba rice is priced at Rs. 230 per kg. This order is expected to come into effect from 02nd May 2022.
- Due to shortage of coal in India, most of the rakes available for Agri commodities have shifted to coal supply in order to provide continuous supply of energy sources. The export trade is expected to be impacted by this.
- In coming days bearish sentiments is expected in domestic market. Rice markets remained dull as traders are anticipating that there will be drop in local prices for the new crop arrivals across major markets.
- Demand from west African regions remain good though container volatility continues due to lockdown in China keeping the domestic market quiet.
- As per trade sources, 32,500 MT of rice vessel LATIKA NAREE is loading at Krishnapatnam port since 01st May 2022. 40,000 MT of rice vessel NAVDHENU SUN is loading at Kakinada Port since 26th April 2022. And 44,500 MT of rice vessel LUCENT is loading at Kandla Port since 26th April 2022. And 25,000 MT of rice vessel PVT AROMA is loading at Kandla Port since 26th April 2022.
