

Domestic & International Market Highlights:

- Thailand government has planned with Vietnam to create a pact between both the countries in order to raise rice prices which according to the officials seem impossible. As per USDA, Vietnam and Thailand account for about 10% of global production of rough rice, and about 26% of global exports.
- In Philippines, as of April 1st, the stocks of rice have marginally increased by 2.5 percent to 2.5 MMT from 2.4 MMT a year ago. But month-on-month, the rice stockpile surged by 53.5 percent from 1.6 MMT. Rice supply in commercial warehouses/wholesalers/retailers expanded but those stored by households and the National Food Authority (NFA) dropped.
- Punjab is targeting cultivating paddy under 12 lakh hectares by direct seeding of rice method. As per our analysis, the acreage of paddy in Punjab is likely to increase in the coming kharif.
- Indian rice export prices continue to lose to their lowest in more than five years this week, which is due to depreciation in rupee and supply continue to be abundant. India's 5% broken rice price was quoted at \$350 to \$354 per tonne, down from last week's \$351 to \$356 per tonne. Demand is there but supplies are also ample. Many buyers are looking for 100% broken rice to replace expensive corn in animal feed.
- Thailand's 5% broken rice prices were quoted at \$450 per tonne, which is up from \$430-\$445 last week, due to strengthening of Thai baht and rising cost of production. Supply remains good, but rice prices have gone up due to higher prices of fertilizers. Demand has been muted in the past several weeks as higher prices have deterred potential buyers.
- Vietnam's 5% broken rice was offered at \$415-\$420 per tonne, unchanged from a week ago. The Philippines will continue to be Vietnam's largest export market, but shipments to the European Union are expected to witness the fastest growth backed by the EU-Vietnam free trade agreement. Preliminary shipping data showed 369,882 tonnes of rice is to be loaded at Ho Chi Minh City port from May 1 to May 28, with most of the rice heading to the Philippines, Africa and Cuba.
- Many traders believe that after sugar and wheat, there might be export restrictions for rice. It is expected that the export quota will be pegged at 10 MMT. But from our analysis, it is unlikely that there will be any export restriction as the stocks within the government is huge.
- Due to increased inflation in Mexico, the government is trying to suspend the import tariff for paddy and other food materials. USA will see some increased competition for paddy sales to Mexico specially from Uruguay rice. Brazil has also reduced their tariffs by an additional 10 percent through the end of 2023, thus bringing the tariff for milled rice down to 9.6 percent and rough rice down to 8 percent.
