

**Domestic & International Market Highlights:**

- Currently, Indian rice markets saw a disruptive tone over the last week and traders' sentiments were supported by a probable decision by the Government to impose restrictive measure on rice exports from India. And these sentiments have led to sellers backing up contracts with a letter of credit to be issued from the buyer to safeguard the impact against the change of policy.
- As per Brazilian Rice Industry Association (Abiarroz), Brazilian rice exports (husk base) totalled 4.51 LMT during the first quarter, which is more than double the same period in 2021 when 2.07 LMT were shipped. The rice association expects foreign sales to reach at least 14 LMT in 2022, surpassing the volume of around 12 LMT in 2021. During April the main markets for processed rice were Senegal, Peru, Venezuela, Gambia, and Sierra Leone.
- Currently, retail prices for rice and wheat flour have fallen by 7% and 5% in the last ten days. The wheat export ban has helped the costs of the grain and atta to cool down, while the arrival of the summer rice crop has brought down the prices of the commonly consumed non-basmati rice.
- As per sources, Sri Lanka is asking farmers to plant more rice as part of plans to prevent a severe food shortage. Many experts warned of a 50% drop in production that would worsen the impact of its already-severe financial crisis.
- As of 30<sup>th</sup> May, Paddy procurement under the central pool for Kharif Marketing Season (KMS) 2021-22 stood at a total of 810.05 LMT of Paddy (including Kharif Crop 754.69 LMT and Rabi Crop 55.37 LMT), benefiting 117.05 lakh farmers with MSP value of Rs 1,58,770.64 crore.
- Thailand government has planned with Vietnam to create a pact between both the countries in order to raise rice prices which according to the officials seem impossible. As per USDA, Vietnam and Thailand account for about 10% of global production of rough rice, and about 26% of global exports.
- In Philippines, as of April 1<sup>st</sup>, the stocks of rice have marginally increased by 2.5 percent to 2.5 MMT from 2.4 MMT a year ago. But month-on-month, the rice stockpile surged by 53.5 percent from 1.6 MMT. Rice supply in commercial warehouses/wholesalers/retailers expanded but those stored by households and the National Food Authority (NFA) dropped.
- Punjab is targeting cultivating paddy under 12 lakh hectares by direct seeding of rice method. As per our analysis, the acreage of paddy in Punjab is likely to increase in the coming kharif.
- Indian rice export prices continue to lose to their lowest in more than five years this week, which is due to depreciation in rupee and supply continue to be abundant. India's 5% broken rice price was quoted at \$350 to \$354 per tonne, down from last week's \$351 to \$356 per tonne. Demand
