

**Domestic & International Market Highlights:**

- Vietnam's 5% broken rice were quoted at \$420-\$425 per tonne FOB, which is up from \$415-\$420 a week ago. Traders are increasing their purchases from farmers to prepare for their upcoming contracts. Vietnam has exported 2.86 MMT of rice valued at \$1.39 billion in the first five months of 2022, up by 10.3% in volume, but down by 1.0% in value from a year earlier.
- India's 5% broken rice was quoted at \$355 to \$360 per tonne FOB, up from \$350 to \$354 per tonne last week. Buyers are moving towards India because prices are more competitive than supplies from Thailand and Vietnam. Government sources had said last week that India does not plan to curb rice exports as it has sufficient stocks and local rates are lower than state-set support prices.
- Thailand's 5% broken rice prices were quoted at \$455-\$460 per tonne FOB, which is up from last week's \$450, which traders attributed to a small pickup in domestic and international demand. There was demand from Iraq, which increased market activity.
- Pakistan's rice export to China has crossed \$225.52 million in the first four months of 2022, while broken rice shipments increased by 40.27% as compared with last year in the same period.
- Indonesia has set 2023 unhusked rice production target at 55.39 MMT, below the 56.08 MMT target presented in March. Indonesia has produced 54.42 MMT of unhusked rice in 2021 and an estimated 25.4 MMT in January-April period of 2022.
- Currently, Indian rice markets saw a disruptive tone over the last week and traders' sentiments were supported by a probable decision by the Government to impose restrictive measure on rice exports from India. And these sentiments have led to sellers backing up contracts with a letter of credit to be issued from the buyer to safeguard the impact against the change of policy.
- As per Brazilian Rice Industry Association (Abiarroz), Brazilian rice exports (husk base) totalled 4.51 LMT during the first quarter, which is more than double the same period in 2021 when 2.07 LMT were shipped. The rice association expects foreign sales to reach at least 14 LMT in 2022, surpassing the volume of around 12 LMT in 2021. During April the main markets for processed rice were Senegal, Peru, Venezuela, Gambia, and Sierra Leone.
- Currently, retail prices for rice and wheat flour have fallen by 7% and 5% in the last ten days. The wheat export ban has helped the costs of the grain and atta to cool down, while the arrival of the summer rice crop has brought down the prices of the commonly consumed non-basmati rice.
- As per sources, Sri Lanka is asking farmers to plant more rice as part of plans to prevent a severe food shortage. Many experts warned of a 50% drop in production that would worsen the impact of its already-severe financial crisis.
