

Domestic Market Highlights:

- Steady to weak sentiment was noticed in major spot markets during the day.
- As per the official sources in Andhra Pradesh till date Paddy has been sown in 0.45 lakh hectare of area against 0.79 lakh hectare of area last year for corresponding time period.
- As per the sources according to current monsoon circumstances it is expected that in Bihar Paddy transplanting would be completed by 15th July 2022.
- As of 26th June, the Centre has procured 860.82 lakh tonne (LMT) of paddy in the ongoing 2021-22 marketing year so far at the minimum support price (MSP). Till now, about 125.82 lakh farmers have been benefited with the MSP value.
- As per the latest update of Agriculture department, GoI, India marked a decline in Rice area coverage till 25th June 22 as compared to same period last year due to deficit and uneven distribution of monsoon rains over key states. Till last week Rice has been sown in 19.59 lakh Ha. compared to 36.08 lakh Ha. same period last year, which is approximately 45.62% less. As per the report, largest area coverage under paddy was in Punjab at around 4.34 Lakh hectares as compared to 15.74 Lakh hectares during same period last year, followed by U.P with area coverage of around 2.61 Lakh hectares under paddy against total area coverage of around 2.95 Lakh hectares in 2021 for corresponding period last year.
- As per the sources All India Rice Exporters' Association has stated that around 9,14,000 tonne of Rice has been exported till now under ongoing 2021-22 season from India to Bangladesh against the exports of 4,91,000 tonne during last 2020-2021 for the corresponding time period. This demand was mainly after Bangladesh reduced import duty on Rice due to floods hitting the country.
- As of now the pace of Rice sowing this Kharif is running behind the normal due to uneven distribution of rains over the key growing regions of the country. Given situation and prevailing higher prices is creating concern among the traders that this may force government to put restriction on Rice exports as done for wheat.
- According to the sources during last five days Non-Basmati Indian Rice prices in global markets spiked from \$ 350 per tonne to \$ 360 per tonne after Bangladesh reduced the import duty on Rice. Not only had this domestic Rice prices also taken a firm route during past five days, seeing rise by around 10 percent.
- As per the sources around 93.5 lakh tonnes of Paddy's costume milling has stopped in Telangana after FCI's denial of lifting up milled stocks.
- Sources suggest that demand of Indian White Broken Rice is maintaining an upper hand over its competitor exporting countries due to feasible export prices when compared with others. Although export price of 5% Broken Parboiled Rice variety fell to \$355-\$360 per tonne from \$357-\$365 per tonne last week, as Rupee value against dollar trumbled during past week.
- Due to early paddy sowing in Tamil Nadu, farmers are expecting early crop this season, which would be ready for harvest by last week of August. Looking at the early planting, reportedly state government has requested the Centre to procure paddy a month early in the state by 1st week of Sept 2022.

Domestic Market Outlook (Non-Basmati):

- Foreseeing on going domestic and international demand, with little arrivals it is expected that domestic prices would remain range bound in near term as per existing scenario.

International Market Highlights:

- Sources say that around 14,700 MT of Rice as the part of humanitarian aid has been received at Colombo from the side of India.
- As per the sources government of Vietnam (department of Crop Production at the Ministry of Agriculture and Rural Development) stated that just in case India bans Rice exports, Vietnam would be ready for the export of around 7 million tons of Rice.
- As per the sources in order to control the ongoing instability in domestic Rice market, Bangladesh government has reduced import duty rates for the import of Rice from 62.5 percent to 25 percent. This norm as of now is supposed to continue till 31st October 2022.
- As per the sources Thailand's 5% broken rice prices saw a decline for the consecutive week and fell to \$420-\$425 per tonne from \$430-\$440 last week, following lower demand along with dropped prices of Bhatt. Also surge in the oil prices has led to increased transportation cost making delivery prices not-so-feasible for the buyers.
- Sources state that Vietnam's 5% broken rice prices were down to \$418-\$423 per tonne from 420-\$425 in past week due to supply exceeding demand persisting in the market.
- Reportedly, export prices of Cambodian Rice have escalated over past few days due to persisting international food insecurity due to prolonged Russia-Ukraine conflict. Having analysed current scenario we can expect a further rise in the prices of export at source locations like Cambodia, Thailand and Vietnam, Wheat export ban by various source countries is also acting as the catalyst for souring Rice export prices at various locations.

Indian Weather/ Monsoon Highlights:

- As per the latest update so far ongoing monsoon has covered the entire Northern states and NCR part of the country, including most of the parts of Bihar. The monsoon showers have covered maximum parts of central and eastern parts of the country.
